Why Buddhism? the Evil of Religion Joseph T. Arellano,2004-04 This work supports the proposition that the eradication of religion will make us live as one and there is only one way to remove religion and that is to remove the need for it Armed only with reason this work will prove that due to ignorance religion is just an invention to fill a need This work has three segments The first explores from the point of view of a Christian practicing Pagan the process on how myth became reality It will prove that God was invented and re invented perpetually for necessity and convenience It is that need that gave the bible its religious relevance Understood with a naked mind the bible is far from being just a religious document but a political one This work explores why religion and politics cannot and will not separate Hence unavoidably it dipped its hands into one painful political issue the Israeli Palestinian conflict The second part elucidates that if the foundation is a myth it only follows that what was founded on it Jesus is a lie It will give proof to the fact that the New Testament was manipulated to further vested interest Understood with an unconditioned mind that is without the traditional spirituality attached to it it will prove that Jesus is just selfishly scheming to regain his grandfather David s throne it will also prove that Jesus is gay The last part is my way of introducing Buddhism It could shed light to what Western science is exiting themselves about It answers why man will never find the Missing Link It explains how and why advanced civilizations deteriorated to their present state In our fight against virus causing disease we must explore all avenues to defeat it Buddhism offers one Buddhism is not only about

science it is also about religion it delves into the reality of a soul Buddhism gives us reason on why we must discriminate on account of race or for any other reason **What God Would Have Known** J. L. Schellenberg, 2024-06-26 Classical Christian ideas loom large in philosophy of religion today But arguments against Christian doctrine have been neglected J L Schellenberg s new book remedies this neglect And it does so in a novel way by linking facts about human intellectual and moral development to what God would have known at the time of Jesus The tide of human development which the early Christians might have expected to corroborate their teaching has in fact brought many results that run contrary to that teaching Or at least it will be seen to have done so says Schellenberg when we think about the consequences of any God existent then being fully cognizant when Christian doctrine was first formed of all that we have laboriously learned since then Newly discovered facts not just about such things as evolution and the formation of the New Testament but also about mental illness violent punishment the relations between women and men and the status of same sex intimacy suggest detailed new arguments against the content of the Christian revelation Schellenberg designs and defends twenty when the prior understanding of the purported revealer is taken into account Written with Schellenberg s characteristic combination of verve and careful precision What God Would Have Known offers a thorough and incisive treatment of its subject that remains respectful and fair minded throughout It is not concerned with the overworked question of whether classical Christians believe irrationally but with what overlooked arguments about human development show in relation to the truth or falsity of Christian claims about reality Fully conversant with relevant developments in science the book is particularly generous in its attention to recent developments in social and ethical spheres as it works toward its striking conclusion that the God of the Christians all good and all wise would not have believed Christian doctrine **Did God Die on the Way to Houston?
