Social Security Bulletin ,1982-07 *Volume 6, Tome I: Kierkegaard and His German Contemporaries - Philosophy* Jon Stewart,2017-05-15 This volume explores in detail Kierkegaard s various relations to his German contemporaries Kierkegaard read German fluently and made extensive use of the writings of German speaking authors Apart from his contemporary Danish sources the German sources were probably the most important in the development of his thought generally This volume represents source work research dedicated to tracing Kierkegaard s readings and use of the various

German speaking authors in the different fields in a way that is as clearly documented as possible The volume has been divided into three tomes reflecting Kierkegaard s main areas of interest with regard to the German speaking sources namely philosophy theology and a more loosely conceived category which has here been designated literature and aesthetics This first tome treats the German philosophical influences on Kierkegaard The dependence of Danish philosophy on German philosophy is beyond question In a book review in his Hegelian journal *Perseus* the poet playwright and critic Johan Ludvig Heiberg laments the sad state of philosophy in Denmark while lauding German speculative philosophy Moreover Kierkegaard s lifelong enemy the theologian Hans Lassen Martensen claims without exaggeration that the Danish systems of philosophy can be regarded as the *disjecta membra* of earlier German systems All of the major German idealist philosophers made an impact in Denmark Kant Fichte Schelling and most significantly Hegel Kierkegaard was widely read in the German philosophical literature which he made use of in countless ways throughout his authorship *Works Issued by the Hakluyt Society*, 1928 *The Anchor of a Believer's Hope* Jason D. Edwards, 2025-10-13 The fundamentals of every faith are exposed in their conceptualization of death Recent studies have caricatured Post Reformation Calvinist theology of death as cold and fatalistic Jason D Edwards examines the Reformed English Puritan John Flavel s ca 1627 1691 theology of death through close analysis of his writings on mortality dying and eternal destiny The spine of his doctrine was covenant theology or how he understood the terms and applications of divine covenants though this aspect of his theology has been largely neglected Inquiry into Flavel s treatment of death demonstrates how the Puritan minister emphasized union to Christ as Mediator as the only grounds for a believer s hope Flavel applied his theology to the spiritual needs of those facing death and dying with warmth clarity and conviction to anchor all hope in death upon Christ **New Light on Drake** Zelia Nuttall, 1926

partially or almost entirely completed but unpublished works Kierkegaard's Journals and Notebooks enables us to see the thinker in dialogue with his times and with himself Kierkegaard wrote his journals in a two column format one for his initial entries and the second for the extensive marginal comments that he added later This edition of the journals reproduces this format includes several photographs of original manuscript pages and contains extensive scholarly commentary on the various entries and on the history of the manuscripts being reproduced Volume 9 of this 11 volume series includes five of Kierkegaard's important NB journals Journals NB26 through NB30 which span from June 1852 to August 1854 This period was marked by Kierkegaard's increasing preoccupation with what he saw as an unbridgeable gulf in Christianity between the absolute ideal of the religion of the New Testament and the official state sanctioned culture of Christendom which embodied by the Danish People's Church Kierkegaard rejected with increasing vehemence Crucially Kierkegaard's nemesis Bishop Jakob Peter Mynster died during this period and in the months following Kierkegaard can be seen moving inexorably toward the famous attack on Christendom with which he ended his life Quarterly Bulletin of the Providence Public Library

Hewitson,2017-01-26 How did ministers journalists academics artists and subjects in the German lands imagine war during the nineteenth century The Napoleonic Wars had been the bloodiest in Europe s history directly affecting millions of Germans yet their long term consequences on individuals and on politics are still poorly understood This study makes sense of contemporaries memories and histories of the Revolutionary and Napoleonic campaigns within a much wider context of press reportage of wars elsewhere in Europe and overseas debates about military service and the reform of Germany s armies revolution and counter revolution and individuals experiences of violence and death in their everyday lives For the majority of the populations of the German states wars during an era of conscription were not merely a matter of history and memory rather they concerned subjects hopes fears and expectations of the future This is the second volume of Mark Hewitson s study of the violence of war in the German lands during the nineteenth and twentieth centuries It investigates the complex relationship between military conflicts and the violent acts of individual soldiers In particular it considers the contradictory impact of pacification in civilian life and exposure to increasingly destructive technologies of killing during war time This contradiction reached its nineteenth century apogee during the wars of unification leaving an ambiguous imprint on post war discussions of military conflict Nutrition and Economic Development in the Eighteenth-Century Habsburg Monarchy John Komlos,2014-07-14 John Komlos examines the industrial expansion of Austria from a fresh viewpoint and develops a new model for the industrial revolution By integrating recent advances in the study of human biology and nutrition as they relate to physical stature population growth and levels of economic development he reveals an intense Malthusian crisis in the Habsburg lands during the second half of the eighteenth century At that time food shortages brought about by the accelerated population growth of the 1730s forced the government to adopt a reform program that opened the way for the beginning of the industrial revolution in Austria and in the Czech Crownlands Comparing this Austrian model of economic growth to the industrial revolution in Britain Komlos argues that the model is general enough to explain demographic and economic growth elsewhere in Europe despite obvious regional differences The main feature of the model is the interplay between a persistent even if small tendency to accumulate capital and a population with an underlying tendency to grow in numbers while remaining subject to Malthusian checks particularly a limited availability of food

According to Komlos modern economic growth in Europe began when the food constraint was finally lifted Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
