manufacturers have deployed fifty six types of sugar to add to their products creating in us the expectation that everything should be cloying we've evolved to prefer convenient meals so three fourths of the calories we get from groceries come from ready to eat foods Moss goes on to show how the processed food industry has not only tried to deny this troubling discovery but exploit it to its advantage For instance in a response to recent dieting trends food manufacturers have simply turned junk food into junk diets filling grocery stores with diet foods that are hardly distinguishable from the products that got us into trouble in the first place With more people unable to make dieting work for them manufacturers are now claiming to add ingredients that can effortlessly cure our compulsive eating habits A gripping account of the legal battles insidious marketing campaigns and cutting edge food science that have brought us to our current public health crisis Hooked lays out all that the food industry is doing to exploit and deepen our addictions and shows us what we can do so that we can once again seize control
