[Law, Technology and Cognition](#) Hayleigh Boshier,2019-11-04 This book considers a new approach to online copyright infringement Rather than looking at the subject within a purely technological context it provides legal analysis from a human perspective This book highlights that there are three key instances in which the capacity of a human mind intersects with the development of copyright regulation

1 the development of copyright statutory law 2 the interpretation of the copyright statutory law the judiciary and 3 human interaction with new technology Using a novel framework for constructing digital perspectives the author Dr Hayleigh Bosher analyses the laws relating to online copyright infringement She provides insights into why the law appears as it does shedding light on the circumstances of how it came to pass and demonstrates a clear malfunction in the interpretation and application of copyright law to online activities that derives from the disconnect between the technological and the human perspectives The book proposes putting the human element back into copyright analysis to enable the return of reason where it has been lost and provide a clearer more consistent and fair legal regulation of online copyright infringement Law Technology and Cognition The Human Element in Online Copyright Infringement will be of interest to students academics researchers as well as practitioners
