GRID AND CLUSTER COMPUTING C. S. R. PRABHU, 2008-02-14 Grid Computing and Cluster Computing are advanced topics and latest trends in computer science that find a place in the computer science and information technology curricula of many engineering institutes and universities today Divided into two parts Part I Grid Computing and Part II Cluster Computing this compact and concise text strives to make the concepts of grid computing and cluster computing comprehensible to the students through its fine presentation and accessible style Part I of the book enables the student not only to understand the concepts involved in grid computing but also to build their own grids for specific applications Similarly as today supercomputers are being built using cluster computing architectures Part II provides an insight into the basic principles involved in cluster computing and equips the readers with the knowledge to build their own clusters in house Diagrams are used to illustrate the concepts discussed and to enable the reader to actually construct a grid or a cluster himself The book is intended as a text for undergraduate and postgraduate students of computer science and engineering information technology B Tech M Tech Computer Science and Engineering IT and post graduate students of computer science information technology M Sc Computer Science and M Sc IT Besides practising engineers and computer science professionals should find the text very useful Grid Computing Marios D. Cloud computing is the current most trendy and social technology that has been launched on the network world which can  
also be called as a reincarnation or evolution of Grid computing so the Clouds are considered as a new generation of Grid  
computing These Clouds consist of data centres which are owned by individual institute organisations or companies The  
homogeneity within each data centre in the infrastructure is the main feature for the cloud computing compared to grid  
computing Cloud Computing has become another most used word on internet after Web 2.0 There are many definitions for  
Cloud computing and there seems to be no consensus on what a Cloud is Cloud Computing is not a completely new concept it  
has intricate connection to the relatively new but thirteen year established Grid Computing paradigm and other relevant  
technologies such as utility computing cluster computing and distributed systems when we go through the structure and
