**Creative Arts in Education and Culture** Samuel Leong, Bo Wah Leung, 2013-12-01 This book offers insights into the exciting dynamics permeating creative arts education in the Greater China region focusing on the challenges of forging a

future that would not reject but be enriched by its Confucian and colonial past Today's Greater China comprising China Hong Kong Macau and Taiwan has grown into a vibrant and rapidly transforming region characterized by rich historical legacies enormous dynamism and exciting cultural metamorphosis Concomitant with the economic rise of China and widespread calls for more creative and liberal education the educational and cultural sectors in the region have witnessed significant reforms in recent years Other factors that will influence the future of arts education are the emergence of a new awareness of Chinese cultural values and the uniqueness of being Chinese

**The Creative Turn** Anne M. Harris, 2014-04-16 The conundrum of understanding practising and teaching contemporary creativity is that it wants to be all things to all people Almost all modern lists of creativity creative thinking and how to becoming creative books begin with one premise the creative individual artist is not special rather each of us is creative in a special way and these skills can and must be nurtured Increasingly industry and education leaders are claiming that creativity is the core skill to take us into a prosperous future signalling the democratisation of creativity as industry Yet centuries of association between aesthetics mastery and creativity are hard to dismantle These days it is increasingly difficult to discuss creativity without reference to business industry and innovation Why do we love to think of creativity in this way and no longer as that rare visitation of the muse or the elite gift of the few This book looks at the possibility that creativity is taking a turn what that turn might be and how it relates to industry education and ultimately cultural role of creativity and aesthetics for the 21st century In proliferating discourses of the commodification of creativity there is one thing all the experts agree on creativity is undefinable possibly unteachable largely unassessable and becoming the most valuable commodity in 21st century markets

*Collaborative Creative Thought and Practice in Music* Margaret S. Barrett, 2016-05-23 The notion of the individual creator a product in part of the Western romantic ideal is now troubled by accounts and explanations of creativity as a social construct While in collectivist cultures the assimilation but not the denial of individual authorship into the complexities of group production and benefit has been a feature the notion of the lone individual creator has been persistent Systems theories acknowledge the role of others yet at heart these are still individual views of creativity focusing on the creative individual drawing upon the work of others rather than recognizing the mutually constitutive elements of social interactions across time and space Focusing on the domain of music the approach taken in this book falls into three sections investigations of the people processes products and places of collaborative creativity in compositional thought and practice explorations of the ways in which creative collaboration provides a means of crossing boundaries between disciplines such as music performance and musicology and studies of the emergence of creative thought and practice in educational contexts including that of the composer and the classroom The volume concludes with an extended chapter that reflects on the ways in which the studies reported advance understandings of creative thought and practice The book provides new perspectives to our understandings of the role of collaborative thought and processes in creative work across the domain of music including composition musicology performance music

**The Creative Imperative** Jami Biles Jones, Lori J. Flint, 2013-09-23 Provides a solid foundational understanding of creativity that enables readers to elicit creative performance from their students. The first book of its kind in the school library field, *The Creative Imperative: School Librarians and Teachers Cultivating Curiosity Together* assists educators, school librarians, school counselors, and parents in learning about creativity and inquiry, as well as how to foster these desired processes in school settings and beyond. The work begins by addressing the foundational aspects of creativity and then discusses creativity within the educational setting, exploring how educators can be more creative themselves and coax creative performance from their students. The final part of the text focuses specifically on school libraries and the role of librarians in developing environments and opportunities for inquiry that nurture creativity.
