Encyclopedia of Diversity in Education James A. Banks, 2012-05-17

The diversity education literature both nationally and internationally is broad and diffuse. Consequently, there needs to be a systematic and logical way to organize and present the state of research for students and professionals. American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live, work, and lead. With continually evolving information on diversity policies, practices, and programs, it is important to have one place where students, scholars, teachers, and policymakers can examine and explore research, policy, and practice issues and find answers to important questions about how diversity in U.S. education is enriched with theories, research, and practices in other nations, are explained and communicated, and how they affect institutional change at both the K-12 and postsecondary levels. With about 700 signed entries with cross references and recommended readings, the *Encyclopedia of Diversity in Education* 4 volumes in both print and electronic formats will present research and statistics, case studies, and best practices, policies, and programs at pre and postsecondary levels. Diversity is a worldwide phenomenon, and while most of the entries in the *Encyclopedia* will focus on the United States, diversity issues and developments in nations around the world, including the United States, are intricately connected. Consequently, to illuminate the many aspects of diversity, this volume will contain entries from different nations in the world in order to illuminate the myriad aspects of diversity. From A to Z, this *Encyclopedia* will cover the full spectrum of diversity issues, including race, class, gender, religion, language, exceptionality, and the global dimensions of diversity as they relate to education. This four-volume reference work will be the definitive reference for diversity issues in education in the United States and the world.

GENDER ISSUES

AMITA SAXENA, 2019-08-21

Gender inequality and discrimination, not only in India, all over the world, is a multifaceted issue that has been related to both men and women. Some people think gender equality indices place men at a disadvantage when India's population is surveyed; women are found to be at a disadvantage in several ways. These trends are disturbing as a natural prediction would be that with growth comes education and prosperity; the dowry system involving a cash or in-kind payment from the bride's family to the grooms at the time of marriage is another institution that disempowers women. It reinforces the inferior status of Indian women and puts them at risk of violence in their marital households. The normalization of intra-household violence is a huge detriment to the welfare of women. Crimes against women have doubled. Gender inequality extends across various facets of society. Political participation is a key factor to rectify this situation. Gender bias extends to electoral politics and their representative also. The book deals with Population Stabilizing Measure, Juvenile Delinquency, Gender-Based Violence, Women Fish Retailers, Gender Inequality, Geriatric Issues in Women, and their Management in India, Women's Attitude And The Environment, The Journey of Indian Women across ages, Gender Discrimination in the Workplace.
