Eco-Homes Doctor Jenny Pickerill, 2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States *Eco Homes* examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us

Daniels, 2001-02-28. Public opinion polls consistently reveal the lack of confidence, disillusionment and mistrust that citizens feel toward government. Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government, particularly through local sustainable programs. As the case studies show, often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves, bringing them in contact with their local elected and appointed officials. Unlike traditional programs that are administered by local officials on behalf of their citizens, once sustainable community programs are created, citizens administer their own programs in collaboration with local officials. The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues such as recycling, transportation, microcredit, site redevelopment, pollution, health care and hunger. *Creating Sustainable Community Programs* is the first book on sustainable programs that is intended for an audience of public administration scholars, researchers and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments. **Green Careers in Building and Landscaping: Professional and Skilled Jobs** Peterson's, 2011-04-01.
