Handbook of Textile Design J Wilson, 2001-09-21 Designers in the textile industry have a wide range of roles and responsibilities and are frequently required to make design decisions throughout the manufacturing process. This very practical handbook provides a comprehensive overview of the role of the textile designer within the textile industry. It deals with all aspects of the design process from the beginning from how to go about attracting clients through range planning and development to presentation. It firmly locates the work of the textile designer within the wider context of the global textile and clothing industries and considers the process of design for both freelance and in-house designers. Commercial considerations are also covered together with trend forecasting and the factors influencing purchasing decisions. Based on the author's experience as a textile designer in industry and as a lecturer at UMIST Manchester UK, this book covers the entire textile design process from briefing through initial ideas, research and design development to finished fabrics being sold to garment manufacturers and to retail. The Handbook of textile design is an invaluable reference for students of textile design as well as buyers and merchandisers of textile products and anyone requiring an understanding of the textile design process. The range and diversity of textile design techniques available to the designer. The professional practice of running a textile design studio. How design work is carried out from the initial brief all the way through to invoicing the client.

Industrial Cutting of Textile Materials Ineta Vilumsone-Nemes, 2012-04-19 A cutting room is a separate area in a clothing manufacturer where garment components are cut out. The accuracy and efficiency of cutting room operations is critical to all subsequent operations and to final garment quality. Drawing on the author's extensive experience, Industrial cutting of textile materials summarises good practice in cutting room operations. After an introduction, the author reviews initial steps such as unloading, sorting and quality control of materials. She then discusses subsequent operations from lay planning and marker making through manual and automated spreading and cutting to fusing of cut components and final work operations such as sorting cut components for sewing. Dr Vilumsone-Nemes also discusses marker making, spreading and cutting of more intricate fabrics such as striped fabrics and fabrics with check motif and border patterns, narrow lace and pile fabrics. Industrial cutting of textile materials provides essential knowledge about cutting processes to designers, technologists and managers to help in improving product quality and in controlling production processes effectively.
