Handbook On Critical Life Issues:

Handbook of Critical Life Issues, 4th Edition Leies Sm John a, Alrand K Nichols, 2023-04-28 Handbook on Critical Life Issues is a comprehensive textbook evaluating major life issues and health care ethics from the standpoint of the teaching of the Catholic Church. It is meant in a special way for use in university courses and adult religious education. This classic work on Catholic bioethics began with texts compiled by Rev Donald McCarthy and Rev Edward Bayer in 1982 and was revised twice by the Marianist Rev John Leies most recently in 2010. This fourth edition by Arland Nichols substantially reorganizes and greatly expands upon the previous editions. The Handbook is divided into three parts. The first part discusses fundamental principles and foundations including reliance upon faith, reason, and Scripture; freedom, conscience, and the human act; and the human person, suffering, and compassion. The second part looks at issues around the beginning of human life, including contraception, artificial reproductive practices, and natural fertility treatments; the moment when human life begins; abortion; and experimentation on human embryos. The third part completes the presentation by looking at moral issues in the midst of life and at its end, such as preventative and risk-reducing medicine, organ donation, advanced directives, decisions about preserving life, and the determination of death. Three appendices cover abortion procedures, a legal history of the withdrawal of treatment, and capital punishment. *Handbook on Critical Life Issues* John A. Leies, Donald G. McCarthy, Edward J. Bayer, 2004 *Handbook on Critical Life Issues* Donald G. McCarthy, Edward J. Bayer, 1988 Current Catalog National Library of Medicine (U.S.), First multi-year cumulation covers six years 1965-70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Catholic Bioethics for a New Millennium** Anthony Fisher, 2011-11-17 Can the Hippocratic and Judeo-Christian traditions be synthesized with contemporary thought about practical reason, virtue, and community to provide real-life answers to the dilemmas of healthcare today? Bishop Anthony Fisher discusses conscience, relationships, and law in relation to the modern-day controversies surrounding stem cell research, abortion, transplants, artificial feeding, and euthanasia, using case studies to offer insight and illumination. What emerges is a reason-based bioethics for the twenty-first century: a bioethics that treats faith and reason with equal seriousness that shows the relevance of ancient wisdom to the complexities of modern healthcare scenarios and that offers new suggestions for social policy and regulation. Philosophical argument is complemented by Catholic theology and analysis of social and biomedical trends to make this an auspicious example of a new generation of Catholic bioethical writing which has relevance for people of all faiths and none. A Catechism for Health Care Stephen Napier, John M. Travaline, 2024-06 The Catholic Church's teachings on ethical issues arising in healthcare delivery and biomedical science are distributed across a plethora of different places, ranging from papal allocutions, encyclicals, instructions by the Congregation for the Doctrine of the Faith, and guidance documents authored by various congregations of bishops. Furthermore, they are distributed throughout time, ranging from, for example, the Didache or teaching of the 12 apostles circa 1st Century to Pope Pius XII's address in 1954.

addressing ethical issues in transplantation and onto the 2009 instruction entitled *Dignitas personae*. It is difficult for a wider audience to make sense of these sources on the various issues arising in healthcare delivery and scientific research but the editors of *A Catechism for Health Care* have collated them in a way that makes them easier to understand. The purpose of this book is to present the teachings of the Catholic Church as they pertain to ethical issues arising in the healthcare and biomedical sciences. The premise of the project is that the Catholic Church's teaching speaks in an accessible way to a wide range of people concerned about healthcare ethics. It is important to present these teachings concisely. The book is ordered around numerous questions concerning the most common practices in health care that have ethical dimensions. It then provides concise answers to these questions as are found in various magisterial Church documents. These answers are refreshingly clear and to the point.

Christian Ethics, Volume 2 Karl-Heinz Peschke, 2012-08-21. This edition is once again a new thoroughly revised version of *Christian Ethics II*. In some portions the subject matter has been reorganized more organically and recent theological developments and documents of the magisterium have been integrated. New themes have been added, others further developed such as deepening the concept and content of mission as well as ecumenical participation. Also questions in bioethics have been supplemented such as the duty to preserve life, topics of prenatal medicine, reproductive and therapeutic cloning, genetic alteration and euthanasia. Other issues raised concern the discrimination against women, civil marriage of homosexuals, compassion in prison care, the right of asylum, humanitarian interventions, the fostering of peace after conflicts, empowerment of the poor in development projects and the treatment of animals. The author hopes that this new edition will be a contribution to the ongoing aggiornamento of moral theology and that it will continue to meet the expectations of its readers.

Abortion and Morality Debate in the African Context George Kegode, 2010. George Kegode in this book has presented a wide range of critical reflections on one of the most controversial moral issues of our times: the intentional and deliberate termination of the life of the unborn human being. Presented from the point of view of an African scholar, George Kegode's work marshals undisputable evidence of the humanity of the unborn right from the moment of conception. He argues in favour for the fundamentally inviolable right to life for this unique, unrepeatable being. With vast light of philosophical reason, this book tackles the often asked questions on the subject of abortion from a moral perspective. The author's arguments cover social ethical, eugenic as well as therapeutic issues. Occasionally these have been the basis of moral relativism and subjectivism in the abortion debate. Contemporarily, Kegode's argument represents an attempt to navigate this debate from a wide spectrum of ethical theories while at the same time remaining faithful to moral objectivity.
