Handbook On Policing In Central And Eastern Europe:

Handbook on Policing in Central and Eastern Europe Gorazd Meško, Charles B. Fields, Branko Lobnikar, Andrej Sotlar, 2013-04-16 Policing in Central and Eastern Europe has changed greatly since the fall of the Berlin Wall. Some Central and Eastern European countries are constituent members of the European Union while others have been trying to harmonize with the EU and international requirements for a more democratic policing and developments in accordance with Western European and international policing standards especially in regard to issues of legality and legitimacy. Changes in the police training system, basic and advanced internationalization of policing due to transnationalization of crime and deviance, new police organizational structures and agencies have impacted new cultures of policing from exclusively state to plural policing. This timely volume examines developments in the last two decades to learn the nature of these changes within Central and Eastern Europe and their impact on police culture as well as on society as a whole. The development of police research has varied widely throughout Central and Eastern Europe; in some countries it has developed significantly while in others it is still in its infancy. This work will allow for a transfer of ideas and models of police organization and policing is also needed to be studied closely with an aim to provide consistent and comparable data across all of the countries discussed. For the twenty countries covered, this systematic work provides short country-based information on police organization and social control, crime and disorder trends in the last 20 years with an emphasis on policing, police training and police educational systems, changes in policing in the last 20 years, police and the media, present trends in policing, public and private, multilateral, plural policing, policing urban and rural communities, recent research trends in research on policing, specificities of research on police and policing, researchers and the police, inclusion of police researchers in policy making and police practice and future developments in policing.

The Oxford Handbook of Police and Policing Michael Dean Reisig, Robert J. Kane, 2014 The police are perhaps the most visible representation of government. They are charged with what has been characterized as an impossible mandate: control and prevent crime, keep the peace, provide public services and do so within the constraints of democratic principles. The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency. In fact, police departments are one of the few government agencies that can be mobilized by a simple phone call 24 hours a day, 7 days a week. They are ubiquitous within our society but their actions are often not well understood.

Policing European Metropolises Elke Devroe, Adam Edwards, Paul Ponsaers, 2017-02-03 Understanding the politics of security in city regions is increasingly important for the study of contemporary policing. This book argues that national and international governing arrangements are being outflanked by various transnational threats including the cross-border terrorism of the attacks on Paris in 2015 and Brussels in 2016, trafficking in people, narcotics and armaments, cybercrime, the deregulation of global financial services and environmental crime. Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders as they provide

much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges and considers problems of and for policing in city regions in the European Union and its single market Bringing together experts from across the continent Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country This book will be of value to police researchers in Europe and abroad as well as postgraduate students with an interest in policing and urban policy **Handbook of Policing** Tim Newburn,2012-08-21
