Hartmut Elsenhans and a Critique of Capitalism Neil Wilcock, Corina Scholz, 2015-11-23 This book presents a series of interviews with Hartmut Elsenhans on his wide ranging theories and their policy implications Serving as a compilation of his distilled thoughts we discuss with him his unique world economic theory his theorisation of social movements his work on overcoming underdevelopment and much more

Development, Capitalism, and Rent Hannes Warnecke-Berger, 2021-01-02 This book combines Hartmut Elsenhans ideas on the laws of motion of capitalism and his approach to world system analysis and rent theory his thoughts on development theory and finally international relations and the past present and future dynamics of the international system Hartmut Elsenhans shows that capitalist growth depends on rising mass incomes and on the strength of labor unions and their bargaining power This alternative approach challenges mainstream assumptions on capitalism growth and development by both leading leftist authors such as David Harvey Immanuel Wallerstein Andre Gunder Frank or Samir Amin as well as by neoclassical economists and western institutionalist political and social scientists Hartmut Elsenhans offers a unique approach to understand the dynamics of capitalism as well as the prospects for development This Festschrift brings together his major contributions on these topics that were initially never or only published in German or French

Not Paying the Rent Neil Wilcock, Edgar Federzoni dos Santos, 2021-09-20 This is a conversational book with chapters directly followed by responses from experts The main authors propose that the failure in development is not due to capitalism but rather rentism which is earnings based on political rather market returns Rent prevents development and ingrains social and economic inequalities Using the case study of Brazil s economic development it is shown how development fails because policies Brazil and other low to middle income countries promote do not overcome the main obstacle to development rent The overcoming of rent would occur within a model of globalisation whereby the advanced economics still prosper concurrently as the poorest countries grow all underpinned by international organisations defending a rule based globalisation Not Paying the Rent Imagining a Fairer Capitalism presents a new application of the theory of rent both historically in the case of Brazil and in practical terms in tackling it through modern international organisations It will be relevant to students researchers and general readers interested in inequality and development economics

The Future of the Gulf Region Arno Tausch, 2021-08-09 This book studies values and attitudes in the Gulf region In light of global power shifts the threatening collapse of internal security in the West and uncertainty about the current leadership vacuum in world society this book explores a future leading role of the Gulf countries in such institutions as the G 20 and the OECD Based on rigorous analysis

of macro level data and opinion surveys with relevance for the Gulf region it analyzes the global macro factors shaping the Gulf's future at a time of the global COVID 19 crisis and depression and rising global tensions Starting with an empirical time series analysis of the long cycles of global politics and economics it highlights the implications for the Gulf region Offering a multivariate analysis of civil society values in the Gulf the author analyzes value changes and attitudes on antisemitism political Islam internal security democracy and other issues of Arab politics The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf's civil society and strongly suggest that the Gulf's future is rather with the free societies of the West and not with a Neo Ottoman Empire in whatever form Exceptional in scope and right up to the minute in coverage Brian M Pollins Associate Professor Emeritus The Ohio State University An outstanding and topical book by an astute scholar of the MENA region Professor Hussein Solomon Academic Head of Department Political Studies and Governance University of the Free State South Africa The most comprehensive and insightful study on the subject to date Manfred B Steger Professor of Sociology University of Hawai'i at Manoa and Global Professorial Fellow Western Sydney University **Public Policy in Transition Economies** Maciej J. Grodzicki, Anna

Zachorowska-Mazurkiewicz, 2024-06-21 Public policies are usually carefully designed to address a particular problem but they are also shaped and influenced by the sociocultural heritage of a particular country This volume explores the origins of economic and other public policies in Central and Eastern Europe This region makes for a particularly interesting case because after going through a major system change transitioning from a command economy into a market economy many of the key policies were written anew The contributors to this book look at key policy areas at the intersection of state and private sectors including industrial pension energy and competition policies The chapters examine key questions such as how did these policies evolve from the time of transition to their final form What were the main drivers of policy conduct and factors influencing major policy choices How does the historical context impact contemporary policy space Throughout the volume an institutional approach is adopted according to which policies are perceived as the outcome of top down design filtered through social institutions inherited from the past With this approach this book presents a long running assessment over 30 years of policymaking in transition economies which were subject to profound changes throughout the period This book will be of interest to readers in institutional economics policy studies transition economies and the recent history of Eastern Europe **Encyclopedia of New Populism and Responses in the 21st Century** Joseph Chacko

Chennattuserry, Madhumati Deshpande, Paul Hong, 2024-12-02 This book mainly seeks to explain define and update the recurring forms of populism in the 21st century Examples used in this Introduction are limited to English speaking countries But populism's existent expressions are ecumenically global Like any long lasting perennial organism it is sturdy and comes in a variety of forms adaptable to environmental changes In political or cultural terms its expression has been neither exclusively left center nor right Populism contains multitudes dates back centuries before it was identified with its modern

name Populism has become a hot button issue in the recent times The UK's Sunday heavy The Guardian published about 300 articles in 1998 that used the term populism or populist and by 2016 its use had skyrocketed to over 2 000 And growing Probably the single greatest catalyst to date that injected populism into the world's Internet common discourse that infused it into journalism right left and center and awakened populist political activism was the Great Recession of 2007 08 and the subsequent global deprivations it engendered In today's world populism promises to remain and renew its intensity due to the covid 19 pandemic's deleterious effects on most nations middle and low income groups specially minorities These are some reasons among many why it is time for populism to be relocated identified and given refreshed 21st understandings It has a shifting nature among people events causes that constantly demands fresh studies It is a social and cultural phenomenon both universal and particular In our 21st century world it is a product of our shared cultures and each our own exceptional deep culture This Encyclopedia is unique in its composition as it includes all the major disciplines of Social Sciences and thus will be a one stop source of nine different disciplines looking at new populism *Capitalism, Development and Empowerment of Labour* Hartmut Elsenhans, 2021-09-08 The dominant neoliberal approach presents politics and political economy as nuisances which disturb the smooth operation of self regulating markets But political economy is not merely an academic issue it is a class issue and this book forcefully argues that political economy should return to a central position in the study of the social sciences Offering nothing less than a reconciliation of Marxian Keynesian and neoclassical economics the work opens with a discussion of the key interconnected economic concepts which help us to understand capitalism price income profit value growth and crisis Prices reflect income distribution and therefore class relations and the chapters show that the very emergence of capitalism resulted from mass empowerment of the so called lower orders Profit is always available if entrepreneurs spend on net investment and create incomes for additional labour this in turn requires expanding demand and so therefore profit depends on rising mass incomes Conversely underdevelopment is the result of the destitution and disempowerment of the masses In the Global South today it is clear that enormous riches go hand in hand with widespread misery and poverty because the market does not transform wealth into the kind of investment that might benefit all This book argues that the new wealth triggered by productivity increases has enabled the rich to liberate themselves from the capitalist constraints of competition and waste their new wealth in the form of rents The main threat today is in fact the globalisation of rent The text makes a point for a progressive counter strategy capitalist structures that empower labour need to be transferred to the Global South This requires political and economic efforts towards empowering labour in the Global South This book demonstrates the analytical power of political economy for all social scientists and will be invaluable reading for economists political scientists and sociologists in particular Capitalism, Dependency and Ultra-Imperialism Hartmut Elsenhans, 2023-10-13 This book assembles main contributions to an alternative explanation of globalisation and the political economic structures of the international system As the result of capitalism globalisation does

not transfer basic capitalist structures from the Centre to the Periphery Capitalism is based on rising mass incomes that create investment opportunities and thus the possibility of profit A structurally homogeneous and ultraimperialist Centre dominates a deeply fissured Periphery of structurally heterogeneous societies and economies Capitalism penetrates underdeveloped regions and deforms them through rent which obstructs expanding internal mass markets while labour goes unempowered Rent constitutes the basis for state operations and the role of emerging state classes While globalisation disempowers labour in both the West and in the South it has given new comparative advantage to the South The shift from rent appropriation in the South via raw material exports to export led manufacturing is based on devaluation below purchasing power parity and hence on a rent from agriculture that is based on the Green Revolution Its impact is however not always sufficient to compensate for the loss of influence experienced by social reformist forces A novel multipolar system based on the balance power has emerged Multiethnic empires are held together with large varieties of however always identitarian ideologies This global system is composed of powers that are internally and externally opposed to peaceful change Across the globe there is an impending danger of globalisation of rent Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan **Sociological Abstracts** ,1992 *Political Science Abstracts* IFI-Plenum Data Company Staff,1984-12-01 **Marginalité, sous-développement et secteur informel** Hartmut Elsenhans,1997

A Contribution to the Critique of Contemporary Capitalism Raju J. Das,2014 The book is a critique of the capitalist world including both the injustices it inflicts and the acts of resistance it provokes which end up reproducing it The book is also a critique of the ideas about this world especially some of the ideas which are considered to be progressive The book talks about why so called critical thought as it exists is inadequate why genuine critique is possible and necessary what its different forms and attributes are and who it is aimed toward the masses or academia This book presents what it considers to be the most adequate form of critique the Marxist critique This is a critique which explains humanity s problems mainly in terms of the conflict ridden social relations that determine how society s resources are used which seeks to democratically transcend the current arrangements to establish popular democracy in all spheres of life economic political and cultural The book then employs the principles of the Marxist critique to shed light on specific issues in the world as they exist or on the so called progressive ideas about these issues such as poverty and inequality in India industrial disasters in the US labour unfreedom in the capitalist North and South the relation between economic and political power in modern society social democracy development of capitalism in rural areas and imperialism pharmaceutical fraud and the consequent threat to human health in the US and the Maoist movement and protest politics of the anarchist type left against dispossession and other forms of injustice
