is one of the most popular of temperate fruit crops with consumers and is grown commercially in more than 40 countries of  
the world in temperate Mediterranean subtropical and arid regions of all continents The sour cherry is cultivated in fewer  
countries mainly in Europe and the USA and is used mainly in processed cherry products Until recently horticultural  
improvement of cherries as a commercial crop has been slow and major production problems such as bird damage rain  
induced cracking and bacterial diseases have remained However in the last 25 years major developments have occurred New  
improved varieties of sweet cherry have been bred which have larger fruit are more disease resistant and set fruit more  
reliably Improved sour cherry varieties have also been bred and mechanised systems of harvesting introduced New dwarfing
