Meyer,1996-12-31 The authors writing with the experience and technological background of Electricite de France an
organisation at the forefront of simulation methods provide a comprehensive and comprehensible treatment of the modelling
and simulation techniques currently in use The text emphasises model design applied to power plants producing energy
generators and motors carrying out energy transformations and networks transmitting energy The systems are analysed
considering each process from steady state to fast transients with detailed explanation of the problem to be solved the choice
of models and methods for optimising efficiency Many examples and references are provided The book is essential reading
for anyone involved in power system engineering from practising design and development engineers to researchers and
postgraduate and advanced graduate students *Manual on Artemia production and use* Van Stappen, G.,Sorgeloos,
P.,Rombaut, G.,2024-05-31 This FAO publication on brine shrimp is a manual for all those who are using Artemia or have an
interest in this organism whether as a source of live food in the hatchery as a model organism in research or for other
purpose Author It is intended for those who wish to update their knowledge on its biology production or its use but also for
those who want to learn about Artemia for the first time Author A team of leading Artemia experts from around the globe
with diverse backgrounds expertise and working in research education and or the industry have jointly contributed to its
writing Author This manual presents in a concise form essential information on Artemia biology and the most important
natural cyst resources that find their way to the aquaculture market Author It also provides detailed information on general
principles and practical procedures to produce Artemia in ponds and in tank systems Author Finally the manual offers a
compilation of state of the art guidelines and methodologies related to the use of this crucial live food organism in
