Issues of Governance, Security, and Development in Contemporary Africa Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development

Radiology in Global Health
 Daniel J. Mollura, Melissa P. Culp, Matthew P. Lungren, 2018-12-31
 Exploring the question as to why more than half the world continues to have little or no access to medical imaging and radiology, this important second edition, fully revised and expanded, offers not only answers but practical solutions, providing new tools, ideas, and strategies for bringing vital radiology to low resource areas. Based on RAD AID's ten years of work, 2008-2018, serving indigent communities around the world, the book's interdisciplinary approach offers the synthesis of business management, government policy, formulation, clinical methods, and engineering in order to integrate economic development, technology innovation, clinical model planning, educational strategies, and public health measures. The gold standard title in the field, *Radiology in Global Health*, 2nd Edition, is intended for a broad audience, including physicians, especially radiologists and radiology residents, radiology technologists, radiology nurses, sonographers, hardware/software engineers, policy makers, business leaders, researchers, and public health specialists at all levels who use or implement health care services for underserved populations. In addition, as health care providers use radiology in the process of clinical decision making, this title is also designed for clinical physicians, nurses, nurse practitioners, physician assistants, and paramedical personnel. Administrators and public health personnel will also be interested, as the planning of radiology services for health care systems at both the facility level and at the population level requires a clear understanding of the technological challenges and management opportunities.
