Jonathan Sawday leads the reader through the entire landscape of early modern print culture discussing topics such as space and silence the exploration of the vacuum the ways in which race and racial identity in early modern England were constructed by the language and technology of print blackness and whiteness together with lightness darkness and sightlessness cartography and emptiness the effect of typography on reading practices the social spaces of the page gendered surfaces hierarchies of information books of memory pages constructed as waste or vacant the genesis of blank forms and early modern bureaucracy the political and devotional spaces of printed books the impact of censorship and the problem posed by texts which lack endings or conclusions The book itself ends by dwelling on blank or empty pages as a sign of human mortality Sawday pays close attention to the writings of many of the familiar figures in English Renaissance literary culture Sidney Shakespeare Donne Jonson and Milton for example as well as introducing readers to a host of lesser known figures The book also discusses the work of numerous women writers from the period including Aphra Behn Ann Bradstreet Margaret Cavendish Lady Jane Gray Lucy Hutchinson melia Lanyer Isabella Whitney and Lady Mary Wroth Complete Works, Reprinted Entire from the Last English Edition Mrs. Hemans, 1852 **The Preacher in Print. Bender, William Edwin Rudge, 1921 *The Castle, Second Edition* Richard Stamm, 2012-05-15 When visitors to the nation's capital embark on a day of museum visits at the National Mall the most striking building in their midst is undoubtedly the Smithsonian Castle Its iconic architecture has come to symbolize the Smithsonian Today the Castle is both central administration building for the entire Smithsonian Institution and the public doorway to all of its museums and galleries But in years past it housed the families of the head of the Smithsonian at the same time that it served as research offices for far flung explorations and as space for collections exhibition and restoration The newly designed second edition of *The Castle* explores the architectural details of turrets and tower and layers that with the stories of the people who have served inside this beloved nineteenth century medieval revival landmark *Crane Valve World*, 1929 **A History of the World in 12 Maps** Jerry Brotton, 2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a

highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph     *Dinosaurs in Fantastic Fiction* Allen A. Debus,2013-03-11 From the first illustrated edition of Jules Verne s Journey to the Center of the Earth in 1867 dinosaurs and prehistory have fascinated readers Writers would time and again come back to dinosaurs as an element of fantastic fiction often using these creatures through the venue of the written word to reflect the world of the writers own time This literary survey examines how paleoliterature originated developed and matured to the present day Also discussed are the ways in which dinosaur fiction mirrors contemporary ideas about subjects such as geology the Cold War environmentalism time travel evolution and bioengineering Featured authors include Ray Bradbury H G Wells and Poul Anderson among others In select cases the novelizations of movie scripts are also examined An appendix provides brief summaries of deserving dinosaur texts     **The Bookman's Journal and Print Collector** Wilfred Partington,1919
