Love Letter to the Milky Way Drew Dellinger, 2002 *World as Lover, World as Self* Joanna Macy, 2007-10-28 A new beginning for the environment must start with a new spiritual outlook In this book author Joanna Macy offers concrete suggestions for just that showing how each of us can change the attitudes that continue to threaten our environment Using the Buddha s teachings on Paticca Samuppada which stresses the interconnectedness of all things in the world and suggests that any one action affects all things Macy describes how decades of ignoring this principle has resulted in a self centeredness that has devastated the environment Humans Macy implores must acknowledge and understand their connectedness to their world and begin to move toward a more focused effort to save it **MY FIRST LOVE LETTER**

become a geologic force a force that must be re educated and re formed in order to guarantee safe passage into a sustainable future Hopefully Jesuits and their lay partners can continue to provide leadership in regard to this issue correctly identified by Fr Adolfo Nicol s SJ as a top priority In this particular context the role of religions and their valuable contributions must be evaluated Religion s role is not simply one of morality rather it seeks especially in Christianity to show the face of God It is out of this relation that believers then seek to live towards the good especially in relation to their neighbours creation and God Religious believers may have failed severely in communicating this relationship in the twenty first century This publication gathers together a roster of Western and Asian experts contributions from various fields of knowledge related to ecology anthropology religions and ethics economics technology and to environmental and health protection studies This collection of essays embracing a wide scope of current topics theme and questions will renew awareness of the ecological dilemma and stimulate reflection on its spiritual and social dimensions **Ecopiety** Sarah McFarland Taylor,2019-11-12

Tackles a human problem we all share the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth The stories we encounter about the environment in popular culture too often promote an imagined moral economy assuring us that tiny acts of voluntary personal piety such as recycling a coffee cup or purchasing green consumer items can offset our destructive habits No need to make any fundamental structural changes The trick is simply for the consumer to buy the right things and shop our way to a greener future It s time for a reality check Ecopiety offers an absorbing examination of the intersections of environmental sensibilities contemporary expressions of piety and devotion and American popular culture Ranging from portrayals of environmental sin and virtue such as the eco pious depiction of Christian Grey in Fifty Shades of Grey to the green capitalism found in the world of mobile device carbon sin tracking software applications to the socially conscious vegetarian vampires in True Blood the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments Taylor makes the case that it is not through a framework of grim duty or obligation but through one of play and delight that we may move environmental ideals into substantive action *Thomas Berry, Dreamer of the Earth* Ervin Laszlo,Allan Combs,2011-01-27 A tribute to the visionary contributions and prophetic writings of Thomas Berry spiritual ecologist and father of environmentalism Contains 10 essays by eminent philosophers thinkers and scientists in the field of ecology and sustainability including Matthew Fox Joanna Macy Duane Elgin Sean Esbj rn Hargens Ervin Laszlo and Allan Combs Calls for a transformation of consciousness to resolve today s global ecological and human challenges Includes a little known but essential essay by Thomas Berry When cultural historian and spiritual ecologist Thomas Berry described by Newsweek magazine as the most provocative figure among the new breed of eco theologians passed away in 2009 at age 94 he left behind a dream of healing the Earth community In his numerous lectures books and essays Berry proclaimed himself a scholar of the earth a geologist and diligently advocated for a return to Earth based spirituality This anthology presents 10

essays from leading philosophers scientists and spiritual visionaries including Matthew Fox Joanna Macy Duane Elgin Sean Esbjorn Hargens Ervin Laszlo and Allan Combs on the genius of Berry's work and his quest to resolve our global ecological and spiritual challenges as well as a little known but essential essay by Berry himself Revealing Berry's insights as far ahead of their time these essays reiterate the radical nature of his ideas and the urgency of his most important conclusion that money and technology cannot solve our problems rather we must reestablish the indigenous connection with universal consciousness and return to our fundamental spontaneous nature still evident in our dreams in order to navigate our ecological challenges successfully
