Beyond Green Lesley Head, 2025-05-14 How are we to think about nature and the environment The idea of nature as it relates to culture society and humans has always been in constant flux and highly contested Lesley Head interrogates the ways the cultures of nature have operated in Australia across time and how these ways of thinking and being limit our capacity to deal with the challenges of the climate change and biodiversity crises Drawing on her life's work and lessons she has picked up along the way Head suggests that it is up to us to attentively listen the better to destabilise and subvert dominant narratives and to imagine new possibilities She believes we have the nous resources and lessons from Indigenous settler descendant and immigrant cultures to reduce risk in the face of the unexpected and the unimaginable In Beyond Green the story of nature and people weaves research and personal experience through many different times and spaces offering new ways of understanding It is a richly creative engagement with the abundant possibilities and pleasure of nature as a place of regeneration that is as warned by the raven of the crow as it is accompanied by the carolling of magpies

Australian Contributions to Strategic and Military Geography

Stuart Pearson, Jane L. Holloway, Richard Thackway, 2018-03-08

Drawing from military geography's spatial roots, its embrace of dynamic systems and integration of human and biophysical environments, this book helps in understanding the value of analyzing patterns, processes, and systems, and cross-scale and multi-disciplinary ways of acting in a complex world while making the case for a resurgence of strategic and military geography in Australia. Here, leading experts demonstrate that geography retains its relevance in clarifying the scale and dynamics of defense activities in assessments of the international, regional, national, and site impacts of changes in physical, cyber, and human geographies. The cases presented show Australia contributing to a growing strategic and military geography.

The European Antarctic

P. Roberts, 2011-12-19

This is the first transnational study of British, Norwegian, and Swedish engagement with the Antarctic. The Empire of Climate David N. Livingstone, 2024-04-16 How the specter of climate has been used to explain history since antiquity Scientists journalists and politicians increasingly tell us that human impacts on climate constitute the single greatest threat facing our planet and may even bring about the extinction of our species Yet behind these anxieties lies an older much deeper fear about the power that climate exerts over us The Empire of Climate traces the history of this idea and its pervasive influence over how we interpret world events and make sense of the human condition from the rise and fall of ancient civilizations to the afflictions of the modern psyche Taking readers from the time of Hippocrates to the unfolding crisis of global warming today David Livingstone reveals how climate has been critically implicated in the politics of imperial control and race relations been used to explain industrial development market performance and economic breakdown and served as a bellwether for national character and cultural collapse He examines how climate has been put forward as an explanation for warfare and civil conflict and how it has been identified as a critical factor in bodily disorders and acute psychosis A panoramic work of scholarship The Empire of Climate maps the tangled histories of an idea that has haunted our collective imagination for centuries shedding critical light on the notion that everything from the wealth of nations to the human mind itself is subject to climate's imperial rule

Forging a British World of Trade David Thackeray, 2019-01-31 Brexit is likely to lead to the largest shift in Britain's economic orientation in living memory Some have argued that leaving

the EU will enable Britain to revive markets in Commonwealth countries with which it has long standing historical ties Their opponents maintain that such claims are based on forms of imperial nostalgia which ignore the often uncomfortable historical trade relations between Britain and these countries as well as the UK's historical role as a global rather than chiefly imperial economy Forging a British World of Trade explores how efforts to promote a British World system centred on promoting trade between Britain and the Dominions grew and declined in influence between the 1880s and 1970s At the beginning of the twentieth century many people from London to Sydney Auckland and Toronto considered themselves to belong to culturally British nations British politicians and business leaders invested significant resources in promoting trade with Australia Canada New Zealand and South Africa out of a perception that these were great markets of the future However ideas about promoting trade between British peoples were racially exclusive From the 1920s onwards colonized and decolonizing populations questioned and challenged the basis of British World networks making use of alternative forms of international collaboration promoted firstly by the League of Nations and then by the United Nations Schemes for imperial collaboration amongst ethnically British peoples were hollowed out by the actions of a variety of political and business leaders across Asia and Africa who reshaped the functions and identity of the Commonwealth The Southern Frontier

Rohan Howitt,2025-05-14 Antarctica looms large in the Australian psyche as a place of science adventure and peril Our romantic entanglement with this unique environment is deep and enduring The Southern Frontier traces Australia's Antarctic obsession from its origins in the nineteenth century to the creation of the Australian Antarctic Territory and a permanent national Antarctic program in the 1930s and 1940s It reconstructs Australian ideas beliefs and anxieties about the Antarctic and shows how Australians came to imagine their nation as having a natural right perhaps even a destiny to explore exploit and control the world to their south By examining how and why Australia relentlessly pursued the acquisition of its Antarctic Territory Rohan Howitt recovers a forgotten way of thinking about this region as one frontier of an Australian empire stretching from the equator to the South Pole At a time when the Australian Government is ramping up its investment in Antarctica and geopolitical tensions are on the rise The Southern Frontier provides the historical explanation for how Australians came to see the world to their south as a natural extension of the nation's territory **A ^ATemperate Empire**

Anya Zilberstein,2016-09-29 A Temperate Empire explores how early North American settlers understood the widespread process of climate warming and tried to remake local climates through colonial settlement and economic development

Taking Our Place John Cleverley,Janet Mooney,2010 The story of the Koori Centre celebrates the achievements of Indigenous people in the creation of an enlightened university learning community Australians are more likely to hold higher educational qualifications today than previously and Indigenous people have matched this trend with an increase in post school awards

Geography and Geographers Ron Johnston,James D. Sidaway,2015-12-22 Geography and Geographers continues to be the most comprehensive and up to date overview of human geography available It provides a survey of the

major debates key thinkers and schools of thought in the English speaking world setting them within the context of economic social cultural political and intellectual changes It is essential reading for all undergraduate geography students It draws on a wide reading of the geographical literature and addresses the ways geography and its history are understood and the debates among geographers regarding what the discipline should study and how This extensively updated seventh edition offers a thoroughly contemporary perspective on human geography for new and more experienced students alike **A**
