Grounding Globalization Labour In The Age Of Insecurity:

Grounding Globalization Edward Webster, Rob Lambert, Andries Beziudenhout, 2011-08-02 Winner of the 2009 Distinguished Scholarly Monograph Prize awarded by the American Sociological Association Labor and Labor Movements section Claims have been made on the emergence of a new labour internationalism in response to the growing insecurity created by globalization However when persons face conditions of insecurity they often turn inwards The book contains a warning and a sign of hope Some workers become fatalistic even xenophobic Others are attempting to globalize their own struggles Examines the claim that a new labour internationalism is emerging by grounding the book in evidence rather than assertion Analyzes three distinct places Orange Australia Changwon South Korea and Ezakheni South Africa and how they dealt with manufacturing plants undergoing restructuring Explores worker responses to rising levels of insecurity and examines preconditions for the emergence of counter movements to such insecurities Highlights the significance of place and scale and demonstrates how the restructuring of multi national corporations and worker responses to this connect the two concepts

Chinese Labour in the Global Economy Andreas Bieler, Chun-Yi Lee, 2018-12-07 Chinese development is widely considered to be an example of successful developmental catch up with double digit growth rates year on year Some even talk of an emerging power which may in time replace the US as the global economy's hegemon And yet there is a dark underside to this miracle in the form of workers long hours low pay and lack of welfare benefits Increasing levels of inequality have gone hand in hand with super exploitative working conditions Nevertheless Chinese workers have not simply accepted these conditions of super exploitation they have started to fight back Set against the background of China's integration into the global economy along uneven and combined development lines this volume explores new forms of resistance by Chinese workers be it through the state trade union All China Federation of Trade Unions ACFTU or through informal labour NGOs It also analyses the links between Chinese formal and informal labour organisations with labour organisations outside China This book was originally published as a special issue of the journal *Globalizations*

Trade Unions in the Green Economy Nora Räthzel, David L. Uzzell, 2013 Combating climate change will increasingly impact on production industries and the workers they employ as production changes and consumption is targeted Yet research has largely ignored labour and its responses This book brings together sociologists psychologists political scientists historians economists and representatives from international and local unions based in Australia Brazil South Africa Taiwan Spain Sweden the UK and the USA Together they open up a new area of research Environmental Labour Studies The authors ask what kind of environmental policies are unions in different countries and sectors developing How do they aim to reconcile the protection of jobs with the protection of the environment What are the forms of cooperation developing between trade unions and environmental movements especially the so called Red Green alliances Under what conditions are unions striving to create climate change policies that transcend the economic system Where are they trying to find solutions that they see as

possible within the present socio economic conditions What are the theoretical and practical implications of trade unions Just Transition and the problems and perspectives of Green Jobs The authors also explore how food workers rights would contribute to low carbon agriculture the role workers identities play in union climate change policies and the difficulties of creating solidarity between unions across the global North and South Trade Unions in the Green Economy opens the climate change debate to academics and trade unionists from a range of disciplines in the fields of labour studies environmental politics environmental management and climate change policy It will also be useful for environmental organisations trade unions business and politicians

Global Displacements Marion Werner,2015-10-15 Challenging the main ways we debate globalization Global Displacements reveals how uneven geographies of capitalist development shape and are shaped by the aspirations and everyday struggles of people in the global South Makes an original contribution to the study of globalization by bringing together critical development and feminist theoretical approaches Opens up new avenues for the analysis of global production as a long term development strategy Contributes novel theoretical insights drawn from the everyday experiences of disinvestment and precarious work on people s lives and their communities Represents the first analysis of increasing uneven development among countries in the Caribbean Calls for more rigorous studies of long accepted notions of the geographies of inequality and poverty in the global South

Marxism, Social Movements and Collective Action Adrián Piva,Agustín Santella,2022-12-13 This book makes a relevant contribution to a Marxist critical explanation of social conflicts social movements and protests There is abundant literature on social conflict and social movements from Marxist perspectives However rigorous criticism both theoretical and methodological is scarce The objective of this volume is the collection of works developing a critical reflection on the categories of theories about contentious collective action and social movements from a Marxist perspective In order to better understand these phenomena and go beyond their mere case description the theory needs to be improved To that end the book also promotes the debate between Marxisms and the collective action and new social movements in a renewed way Here different Marxist arguments consider not only their methodological and ideological bias but also the specific conceptual contributions of those theories

Homeworking Women Annie Delaney,Rosaria Burchielli,Shelley Marshall,Jane

Tate, 2018-11-13 Homework work that is categorised as informal employment performed in the home mainly for subcontractors and mostly undertaken by women. The inequities and injustices inherent in homework conditions maintain women's weak bargaining position, preventing them from making any improvements to their lives via their work. The best way to tackle these issues is not to abolish but to bring equality and justice to homework. This book contributes a gender justice framework to analyse and confront the issues and problems of homework. The authors propose four justice dimensions: recognition, representation, rights, and redistribution, to examine and analyse homework. This framework also takes into account the structures and processes of capitalism and the patriarchy and the relations of domination that are widely held to be the major factors that determine homework injustice. The authors discuss strategies and approaches that have worked for homeworkers, highlighting why they worked and the features that were beneficial for them. **Dying for an iPhone** Jenny Chan, Mark Selden, Ngai Pun, 2020-06-02 Suicides, excessive overtime and hostility and violence on the factory floor in China. Drawing on vivid testimonies from rural migrant workers, student interns, managers and trade union staff, **Dying for an iPhone** is a devastating expose of two of the world's most powerful companies, Foxconn and Apple. As the leading manufacturer of iPhones, iPads and Kindles and employing one million workers in China alone, Taiwanese-invested Foxconn's drive to dominate global electronics manufacturing has aligned perfectly with China's goal of becoming the world leader in technology. This book reveals the human cost of that ambition and what our demands for the newest and best technology means for workers. Foxconn workers have repeatedly demonstrated their power to strike at key nodes of transnational production, challenge management and the Chinese state and confront global tech behemoths. **Dying for an iPhone** allows us to assess the impact of global capitalism's deepening crisis on workers.

Retail Worker Politics, Race and Consumption in South Africa Bridget Kenny, 2018-05-23 This book argues that we need to focus attention on the ways that workers themselves have invested subjectively in what it means to be a worker. By doing so, we gain an explanation that moves us beyond the economic decisions made by actors, the institutional constraints faced by trade unions or the power of the state to interpellate subjects. These more common explanations make workers and their politics visible only as a symptom of external conditions: a response to deregulated markets or a product of state recognition. Instead, through a history of retailing as a site of nation and belonging, changing legal regimes and articulations of race, class and gender in the constitution of political subjects from the 1930s to present day Wal-Mart, this book presents the experiences and subjectivities of workers themselves to show that the collective political subject, workers, is both a durable and malleable political category. From white to black women's labour, the forms of precariousness have changed within retailing in South Africa. Workers' struggles in different times have in turn resolved some dilemmas and by other turn generated new

categories and conditions of precariousness all the while explaining enduring attachments to labour politics Social Protection in Developing Countries Katja Bender, Markus Kaltenborn, Christian Pfleiderer, 2013-09-02 Providing universal access to social protection and health systems for all members of society including the poor and vulnerable is increasingly considered crucial to international development debates This is the first book to explore from an interdisciplinary and global perspective the reforms of social protection systems introduced in recent years by many governments of low and middle income countries Although a growing body of literature has been concerned with the design and impact of social protection less attention has been directed towards analyzing and explaining these reform processes themselves Through case studies of African Asian and Latin American countries this book examines the global phenomenon of recent social protection reforms in low and middle income areas and how it differs across countries both in terms of scope and speed of institutional change Exploring the major domestic and international factors affecting the political feasibility of social protection reform the book outlines the successes and failures of recent reform initiatives This invaluable book combines contributions from both academics and practitioner experts to give students researchers and practitioners in the fields of social security economics law and political science an in depth understanding of political reform processes in developing countries *Southern Resistance in Critical Perspective* Marcel Paret, Carin Runciman, Luke Sinwell, 2017-03-27 From the Arab Uprising to anti austerity protests in Europe and the US Occupy Movement to uprisings in Brazil and Turkey resistance from below is flourishing Whereas analysts have tended to look North in their analysis of the recent global protest wave this volume develops a Southern perspective through a deep engagement with the case of South Africa which has experienced widespread popular resistance for more than a decade Combining critical theoretical perspectives with extensive qualitative fieldwork and rich case studies *Southern Resistance in Critical Perspective* situates South Africa's contentious democracy in relation to both the economic insecurity of contemporary global capitalism and the constantly shifting political terrain of post apartheid nationalism The analysis integrates worker community and political party organizing into a broader narrative of resistance bridging historical divisions between social movement studies labor studies and political sociology *The Digital Continent* Mohammad Amir Anwar, Mark Graham, 2022 The Digital Continent investigates what the impact of the growth of digital work in Africa means for workers The volume draws on a year long field study conducted in South Africa Kenya Nigeria Ghana and Uganda to provide one of the first empirical studies on the topic Transnational Trade Unionism Peter Fairbrother, Christian Lévesque, Marc-Antonin Hennebert, 2013-08-22 Transnational trade union action has expanded significantly over the last few decades and has taken a variety of shapes and trajectories This book is concerned with understanding the spatial extension of trade union action and in particular the development of new forms of collective mobilization network building and forms of regulation that bridge local and transnational issues Through the work of leading international specialists this collection of essays examines the process and dynamic of transnational trade union action and

provides analytical and conceptual tools to understand these developments The research presented here emphasizes that the direction of transnational solidarity remains contested subject to experimentation and negotiation and includes studies of often overlooked developments in transition and developing countries with original analyses from the European Union and NAFTA areas Providing a fresh examination of transnational solidarity this volume offers neither a romantic or overly optimistic narrative of a borderless unionism nor does it fall into a fatalistic or pessimistic account of international union solidarity Through original research conducted at different levels this book disentangles the processes and dynamics of institution building and challenges the conventional national based forms of unionism that prevailed in the latter half of the twentieth century
