

STAIRCASE

You Need

- Thirty [30] cubes

Your Task

1. Staircases are made from cubes like this:

The picture shows Sizes 2, 3 & 4.

2. Copy this table into your journal and enter the data for Sizes 2, 3, 4 & 5.

Number of Steps	1	2	3	4	5	10	100
Number of Cubes	1						

Challenge

Work out the number of cubes in a 10 step and a 100 step staircase.
Can you check it another way?

(Hint: Build two Size 5 staircases and make a rectangle.)

Write a short report with drawings.

with your own students Practical ready to use tools you can take back to your classroom including unit plans and classroom handouts **Classroom-Ready Rich Algebra Tasks, Grades 6-12** Barbara J. Dougherty,Linda C. Venenciano,2023-02-25

This book provides educators with 50 mathematical tasks that are rich research based standards aligned and classroom tested The tasks are organized into learning progressions that help all students make the leap from arithmetic to algebra offer students interesting mathematics problems to think about and solve so math is investigative interactive and engaging and present opportunities for educators to connect new content to prior knowledge or an undeveloped concept Reading and Writing Strategies for the Secondary Mathematics Classroom in a PLC at Work® Daniel M. Argentar,Katherine A. N.

Gillies,Rubenstein Maureen M.,Brian R. Wise,2024-09-10 Students need literacy support to think read and write in every subject including math Part of the Every Teacher Is a Literacy Teacher series this book emphasizes the importance that the PLC at Work process has in supporting learners who struggle with literacy Grades 6 12 teachers will strengthen reading capabilities with practical reading and writing strategies specifically designed for mathematics instruction This book will help secondary math teachers Learn how to incorporate writing instruction into mathematics curriculum and why it s important Collaborate with their colleagues using end of chapter prompts that encourage PLC cooperation Implement immediate intervention strategies for struggling students to shorten learning gaps Strategize their mathematics instruction to effectively address both struggling students and those at proficient levels Implement formative and summative assessments and look at feedback Contents Studying Virtual Math Teams Gerry Stahl,2010-05-03 Studying Virtual Math Teams centers on detailed empirical studies of how students in small online groups make sense of math issues and how they solve problems by making meaning together These studies are woven together with materials that describe the online environment and pedagogical orientation as well as reflections on the theoretical implications of the findings in the studies The nature of group cognition and shared meaning making in collaborative learning is a foundational research issue in CSCL More generally the theme of sense making is a central topic in information science While many authors allude to these topics few have provided this kind of detailed analysis of the mechanisms of intersubjective meaning making This book presents a coherent research agenda that has been pursued by the author and his research group The book opens with descriptions of the project and its methodology as well as situating this research in the past and present context of the CSCL research field The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project These chapters are followed by several studies by international collaborators discussing the group discourse the software affordances and alternative representations of the interaction all using data from the VMT project The concluding chapters address implications for the theory of group cognition and for the methodology of the learning sciences In addition to substantial introductory and concluding chapters this important new book includes analyses based upon the author s previous research thereby providing smooth continuity and an engaging flow that follows the progression of the

research The VMT project has dual goals a to provide a source of experience and data for practical and theoretical explorations of group knowledge building and b to develop an effective online environment and educational service for collaborative learning of mathematics Studying Virtual Math Teams reflects these twin orientations reviewing the intertwined aims and development of a rigorous science of small group cognition and a Web 2 0 educational math service It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse

Investigations in Number, Data, and Space
,2008 Part of a K 5 mathematics curriculum with curriculum units for classroom use and resources for teachers the Investigations curriculum was developed at TERC formerly Technical Education Research Centers

Theoretical Investigations Gerry Stahl,2021-04-23 Computers have transformed how we think discuss and learn as individuals in groups within cultures and globally However social media are problematic fostering flaming culture wars and fake news This volume presents an alternative paradigm for computer support of group thinking collaborative learning and joint knowledge construction This requires expanding concepts of cognition to collectivities like collaborative groups of networked students Theoretical Investigations explores the conditions for group cognition supplying a philosophical foundation for new models of pedagogy and methods to analyze group interaction Twenty five self contained investigations document progress in research on computer supported collaborative learning CSCL both in Stahl s own research and during the first decade of the CSCL journal The volume begins with two new reflections on the vision and theory that result from this research Representing both ethnomethodological and social constructivist research paradigms the investigations within this volume comprise a selection of seminal and influential articles and critical commentaries that contribute to an understanding of concepts and themes central to the CSCL field The book elaborates an innovative theory of group cognition and substantiates the pedagogical potential of CSCL Theoretical Investigations Philosophical Foundations of Group Cognition is essential as a graduate text for courses in educational theory instructional design learning and networked technologies The investigations will also appeal to researchers and practitioners in those areas

Making a Difference: Volume I and II Sasha A. Barab,Kenneth E. Hay,Nancy Butler Songer,Daniel T. Hickey,2017-09-05 William Wordsworth 1770 1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally This broad ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period It discusses many of Wordsworth s later poems comparing his work with that of his regional contemporaries as well as major writers such as Scott The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth s construction of community and his use of power relationships A serious discussion of the place of sexual feeling in his writing is also included
