The Cambridge Handbook of Successful Aging Rocío Fernández-Ballesteros, Athanasios Benetos, Jean-Marie Robine, 2019-01-24 Recent studies show that more people than ever before are reaching old age in better health and enjoying that health for a longer time This Handbook outlines the latest discoveries in the study of aging from bio medicine psychology and socio demography It treats the study of aging as a multidisciplinary scientific subject since it requires the interplay of broad disciplines while offering high motivation positive attitudes and behaviors for aging well and lifestyle changes that will help people to stay healthier across life span and in old age Written by leading scholars from various academic disciplines the chapters delve into the most

topical aspects of aging today including biological mechanisms of aging aging with health active and productive aging aging with satisfaction aging with respect and aging with dignity Aimed at health professionals as well as general readers this Cambridge Handbook offers a new positive approach to later life *Handbook of Mental Health and Aging* James E. Birren, Gene D. Cohen, R. Bruce Sloane, Barry D. Lebowitz, Donna E. Deutchman, May Wykle, Nancy R. Hooyman, 2013-10-22 This book is a thorough revision of one of the most comprehensive reference volumes for persons working in the area of aging and mental health The thrust of the work is interdisciplinary and discusses research on both clinical and practical issues in aging and mental health The multidisciplinary nature of this book and the inclusion of subject matter from the professional as well as research realm result in a level of comprehensiveness which is distinct in the field of mental health and aging Each chapter contains a comprehensive bibliography the compilation of which represents a definitive reference source in the field The chapters review state of the art research in the biological behavioral and social sciences and represent the cutting edge of current practice in psychiatry neurology social work nursing psychology and pharmacology among other professions The compilation of prevalence data is a much needed addition to the current literature The multidisciplinary nature of this book and the inclusion of both clinical and practical issues makes the book distinctively comprehensive The Cambridge Handbook of Cognitive Aging Ayanna K. Thomas, Angela Gutchess, 2020-05-28 Decades of research have demonstrated that normal aging is accompanied by cognitive change Much of this change has been conceptualized as a decline in function However age related changes are not universal and decrements in older adult performance may be moderated by experience genetics and environmental factors Cognitive aging research to date has also largely emphasized biological changes in the brain with less evaluation of the range of external contributors to behavioral manifestations of age related decrements in performance This handbook provides a comprehensive overview of cutting edge cognitive aging research through the lens of a life course perspective that takes into account both behavioral and neural changes Focusing on the fundamental principles that characterize a life course approach genetics early life experiences motivation emotion social contexts and lifestyle interventions this handbook is an essential resource for researchers in cognition aging and gerontology **Annual Review of Gerontology and Geriatrics, Volume 3, 1982**, 1982-01-15 The second volume in this long running series presents the usual critical and intensive review chapters divided into five sections but also addresses particular topics of special interest including drugs and their use and misuse among the aged the nonmedication orientation to treatment of various disorders the immune system and clinical procedures in the management of urinary incontinence As with all the volumes the contributors represent an international array of leading experts *Aging and Human Longevity* M.-F. Schulz-Aellen, 2012-12-06 The proportion of elderly people continues to increase in the western world nearly a quarter of the population will be over 65 years by the year 2050 Since aging is accompanied by an increase in diseases and by a deterioration in well being finding solutions to these social medical and psychological problems is necessarily a major goal

for society Scientists and medical practitioners are therefore faced with the urgent task of increasing basic knowledge of the biological processes that cause aging More resources must be put into this research in order to achieve better understanding of the cellular mechanisms that underlie the differences in life span between species and to answer the difficult questions of why some individuals age more quickly than others and why some develop liver problems some have heart problems and others brain problems The results of such a wide program of research will provide important information about the causes of many life threatening and or debilitating diseases of old age it will help find ways to prevent some of the ailments that result from aging and it may well lead to discoveries enabling the prolongation of human life *Gerontology and Geriatrics*
