7MM-08 Remington

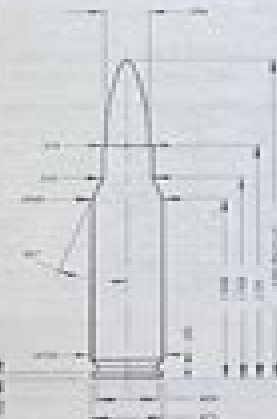

The 7mm-08 Remington burst on the shooting scene in mid 1980. Based on the popular .308 case and necked to accept 7 mm bullets, the 7mm-08 provides both the silhouette rifleman and big-game hunter with a highly accurate and adequately powerful cartridge.

The 7mm-08 due to its "short" overall length is chambered in many "short-action" rifles and the superior ballistic coefficient of 7 mm bullets makes this cartridge one of the most popular at Metallic Silhouette Rifle matches.

Generated recoil is moderate, especially for a high-power cartridge. Case capacity is equal to longer and thinner cases such as the 7x57 Mauser. Standard .308 brass can be simply necked down to accept 7mm bullets.

Handloading the 7 mm-08 is straightforward without unique idiosyncrasies. Typically, lighter 7mm bullets are the best bet for varmints, while 160 grainers and up are the smart choice for big game and metallic silhouette targets.

A wide range of powders, bullets and primers have proven to be successful for handloading the 7mm-08. It is a very versatile cartridge and serves the shooter in many ways.
