 Karen Bennett, Dean W. Zimmerman, 2018-10-04 Much of the most interesting work in philosophy today is metaphysical in character Oxford Studies in Metaphysics is a forum for the best new work in this flourishing field OSM offers a broad view of the subject featuring not only the traditionally central topics such as existence identity modality time and causation but also the rich clusters of metaphysical questions in neighbouring fields such as philosophy of mind and philosophy of science Besides independent essays volumes will often contain a critical essay on a recent book or a symposium that allows participants to respond to one another's criticisms and questions Anyone who wants to know what's happening in metaphysics can start here The Future of Motherhood in Western Societies Gijs Beets, Joop Schippers, Egbert R. te Velde, 2010-12-06 Most people value to have children still highly But what is the optimal moment to have the first The decision on having children or not and if yes on the timing of the first is one of the most difficult ones to make also because it more or less coincides with various other heavy decisions on shaping the life course like on union formation labour market career housing accommodation etc People realise that having children will fundamentally change their life and in order to fit this unknown and irreversible adventure perfectly into their life course postponement of the first birth is an easy way out as long as doubts continue and partners try to make up their mind Modern methods of birth control are of course a very effective help in that period What is the best moment to have the first child And to what moment is postponement justified There are no easy answers to these questions Best solutions vary per person as they depend on personal circumstances and considerations the partner may have conflicting ideas housing accommodation job income free time activities Existing parental leave and child care arrangements are weighted as well Unfortunately the biological clock ticks further And also unfortunately assisted reproductive technology IVF etc is unable to guarantee a successful outcome Several couples end up without children involuntarily and that may lead to sorrow and grief This interdisciplinary book overviews the process of postponement and its backgrounds in modern Western societies holistically both at the personal and the societal level Contributions come from reproductive evolutionary biological and neurological sciences as well as from demography economy sociology and psychology It holds not only at women but also at men becoming first time fathers The discussion boils down to a new policy approach for motherhood and emancipation on how to shape work and family life It is argued that a public window where one can compose a cafeteria like set of supportive arrangements according to personal preferences could lead to a break in the rising age at first motherhood Personal Development With Success Ingredients Mo Abraham, 2016-10-21 The team of successful people is a network of readers whose feedback have remained frankly remarkable They have transformed themselves into an epitome of success by studying and practicing the principles outlined in the book The book titled Personal Development with Success Ingredients written by Mo Abraham is a step by step guide for success wealth and happiness and the formula are by far tried and proven The 12 In 1 book covering over fifty topics on
