Harmonic Experience Tonal Harmony From Its Natural Origins To Its Modern Expression:

Harmonic Experience W. A. Mathieu, 1997-08-01 An exploration of musical harmony from its ancient fundamentals to its most complex modern progressions addressing how and why it resonates emotionally and spiritually in the individual W A Mathieu an accomplished author and recording artist presents a way of learning music that reconnects modern day musicians with the source from which music was originally generated As the author states The rules of music including counterpoint and harmony were not formed in our brains but in the resonance chambers of our bodies His theory of music reconciles the ancient harmonic system of just intonation with the modern system of twelve tone temperament Saying that the way we think music is far from the way we do music Mathieu explains why certain combinations of sounds are experienced by the listener as harmonious His prose often resembles the rhythms and cadences of music itself and his many musical examples allow readers to discover their own musical responses **Heavenly Harmonies** Mary Devlin, 2011-09 A history of the development of harmony in the Middle Ages including the music composers theorists and music theory musicians and relevant historical figures as well as studies of folk music medieval chant and polyphony from the days of Gregorian chant to the florid polyphony of the early Renaissance **The Politics of Vibration** Marcus Boon, 2022-08-08 In *The Politics of Vibration* Marcus Boon explores music as a material practice of vibration Focusing on the work of three contemporary musicians Hindustani classical vocalist Pandit Pran Nath Swedish drone composer and philosopher Catherine Christer Hennix and Houston based hip hop musician DJ Screw Boon outlines how music constructs a vibrational space of individual and collective transformation Contributing to a new interdisciplinary field of vibration studies he understands vibration as a mathematical and a physical concept as a religious or ontological force and as a psychological determinant of subjectivity Boon contends that music as a shaping of vibration needs to be recognized as a cosmopolitical practice in the sense introduced by Isabelle Stengers in which what music is within a society depends on what kinds of access to vibration are permitted and to whom This politics of vibration constitutes the hidden ontology of contemporary music because the organization of vibration shapes individual music scenes as well as the ethical choices that participants in these scenes make about how they want to live in the world **A ^AGeometry of Music** Dmitri Tymoczko, 2011-03-21 In this groundbreaking book Tymoczko uses contemporary geometry to provide a new framework for thinking about music one that emphasizes the commonalities among styles from Medieval polyphony to contemporary jazz Pieces of Tradition Daniel Harrison, 2016-05-02 This book is about how music in a key is composed Further it is about how such music was composed when it was no longer compulsory to do so starting a few years before the First World War In an eclectic journey through the history of compositional technique Daniel Harrison contends that the tonal system did not simply die out with the dawn of twentieth century but continued to supplement newer techniques as a compelling means of musical organization even into current times Well known art music composers such as Bartok Hindemith Prokofiev and Messiaen are represented alongside

composers whose work moves outside the standard boundaries of art music Leonard Bernstein Maurice Duruflé Frank Martin Xiaoyong Chen Along the way the book attends to military bugle calls a trailer before a movie feature a recomposition of a famous piece by Arnold Schoenberg and the music of Neil Diamond David Shire and Brian Wilson A celebration of the awesome variety of musical expressions encompassed in what is called tonal music Pieces of Tradition is a book for composers seeking ideas and effects music theorists interested in its innovations and all those who practice the analysis of composition in all its modern and traditional variations
