Borougerdi,2018-11-19 Cannabis is a genetically diverse plant that has been commodified for a variety of different purposes by many cultures throughout world history For thousands of years people have used its fiber seed and flowers to make rope and cloth rig ships feed people and livestock concoct medicines and alter states of consciousness Until the nineteenth century though most Europeans and Americans were unaware of drug varieties of cannabis The British encountered them in India and created western style medicines that sold throughout the Atlantic world by the 1840s but negative associations with Oriental intoxication and degeneracy sullied the plant's reputation as a viable commodity Now after decades of transatlantic criminalization policies against cannabis in the twentieth century it is making a comeback In Commodifying Cannabis Bradley J Borougerdi traces the tangled histories of its use for fiber medicine and altered states of consciousness across the Atlantic world focusing on the dynamic interplay between these three different cultural applications to explain why the plant has transformed so many times throughout

history The historical journey spans a vast geographical landscape and includes over three centuries of source material to illuminate the cultural foundations behind the myriad transformations cannabis has endured as a commodity in the Atlantic world *Catalogue Michigan State Library,1877 Catalogue of the Michigan State Library Michigan State Library,1877*

Catalogue of the Michigan State Library, for the Years 1879-80 Michigan State Library,1879 Faith in Markets Joseph P. Slaughter,2023-11-14 In the first half of the nineteenth century the United States saw both a series of Protestant religious revivals and the dramatic expansion of the marketplace Although today conservative Protestantism is associated with laissez faire capitalism many of the nineteenth century believers who experienced these transformations offered different competing visions of the link between commerce and Christianity Joseph P Slaughter offers a new account of the interplay between religion and capitalism in American history by telling the stories of the Protestant entrepreneurs who established businesses to serve as agents of cultural and economic reform Faith in Markets examines three Christian business enterprises and the visions of a Christian marketplace they represented Shaped by Pietist Calvinist and Arminian theologies each offered different answers to the question of what a moral Christian market should look like George Rapp Associates operated sophisticated textile factories as the business side of the model community the Harmony Society which practiced communal living in pursuit of a harmonious workforce The Pioneer Stage Coach Line provided transportation services only six days a week to keep Sunday sacred attempting to reform society by outcompeting less pious businesses The publisher Harper Brothers sought to elevate American culture through commerce by producing virtuous products like lavishly illustrated Bibles Drawing on a wide range of sources Faith in Markets explores how the founders and owners of these enterprises infused their faith into their businesses and in turn how distinctly religious businesses shaped American capitalism and society Western Art, Western History Ron Tyler,2019-03-07 For nearly half a century celebrated historian Ron Tyler has researched interpreted and exhibited western American art This splendid volume gleaned from Tyler s extensive career of connoisseurship brings together eight of the author s most notable essays reworked especially for this volume Beautifully illustrated with more than 150 images Western Art Western History tells the stories of key artists both famous and obscure whose provocative pictures document the people and places of the nineteenth century American West The artists depicted in these pages represent a variety of personalities and artistic styles According to Tyler each of them responded in unique ways to the compelling and exotic drama that unfolded in the West during the nineteenth century an age of exploration surveying pleasure travel and scientific discovery In eloquent and engaging prose Tyler unveils a fascinating cast of characters including the little known German Russian artist Louis Choris who served as a draftsman on the second Russian circumnavigation of the globe the exacting and precise Swiss artist Karl Bodmer who accompanied Prince Maximilian of Wied on his sojourn up the Missouri River and the young American Alfred Jacob Miller whose seemingly frivolous and romantic depictions of western mountain men and American Indians remained largely unknown until the mid

twentieth century Other artists showcased in this volume are John James Audubon George Caleb Bingham Alfred E Mathews and finally Frederic Remington who famously sought to capture the last glimmers of the old frontier A common thread throughout Western Art Western History is the important role that technology especially the development of lithography played in the dissemination of images As the author emphasizes many works by western artists are valuable not only as illustrations but as scientific documents imbued with cultural meaning By placing works of western art within these broader contexts Tyler enhances our understanding of their history and significance **Pacific Bindery Talk** W.
