Harrell Engines and Racing Equipment Roger H. Harrell, Alec. R. Harrell Carlson, Richard C. Harrell, 2009 A history of Jim Nick Harrell's racing activities Jim's Speed Shop opened in Los Angeles in 1933 and continued as Harrell Engines building racing record breaking roadsters into the late 60s

The American Speed Shop Bob McClurg, 2021-02-15 The history of hot rodding and performance cars has been well chronicled through the years Books and magazines have covered the cars builders pioneers engineers early racers muscle cars street racers etc Most take a nostalgic and fun look at the cars that many have loved their entire lives Some even cover the lifestyle the hobby as it involves people and the effort time and commitment people put into it It is more than just a hobby to most and to many a certain wave of nostalgia comes over them when remembering what the car scene was like back in the day The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth Speed shops were not just parts stores they were a communal gathering place for car guys wanting to talk smart bench race and catch up on the local scene as well as to solicit the expert advice from the owner or staff behind the counter Here longtime hot rodder and industry veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography He covers the birth of the industry racing versus hot rodding mail order and advertising wars You learn about the performance boom of the 1960s and 1970s lost speed shops as well as survivors and a overview of the giant mail order speed shops of today

Vintage Speed Parts Tony Thacker, 2022-10-10 Follow the history of hot rodding through this nostalgic look at vintage speed equipment When most people think of speed parts they rewind a few decades and think back to the Ford flatheads that were so prevalent in the 1940s and 1950s However did you know that the speed parts industry began way back in the Model T era It's true As soon as vehicles were mass produced manufacturers were looking for ways to make them faster Manufacturers such as Roof Rajo Winfield Miller Frontenac and Holley made speed parts for 4 cylinder Model T engines and accomplished speeds of up to 100 mph In Vintage Speed Parts The Equipment That Fueled the Industry veteran hot rod historian Tony Thacker looks at the history of hot rodding through the eyes of speed equipment manufacturers Covered chronologically the book begins with the early 4 cylinder engines In 1932 Henry Ford introduced the flathead V 8 which was slow to be adopted as the engine of choice in racing until the parts industry caught up Once it did the flathead although interrupted by the war was the engine to run until the automobile manufacturers introduced overhead valve V 8 engines in the late 1940s Chrysler's early 1950s Hemi and Chevrolet's small block V 8 in 1955 spelled the end for the flattie Both mills dominated well into the 1970s and the speed industry was there to support all platforms in spades During that period every auto manufacturer made a V 8 worthy of modification and the speed industry boomed Eventually the speed equipment manufacturers grew to the point of becoming corporate entities as mergers and acquisitions became the much less interesting story Parts covered include special cylinder heads magnetos camshaft and
