Between Silence and Light John Lobell, Louis I. Kahn, 1979 In the development of contemporary architecture few have had greater influence than Louis I Kahn whose many buildings included the Salk Institute the Yale Study Center and the Exeter Library For Kahn the study of architecture was the study of human beings their highest aspirations and most profound truths John Lobell who studied under Kahn while in architecture school sensitively edits Kahn s own words and provides commentary on Kahn s ideas and his major buildings In his work as an architect Kahn searched for beginnings the origin of joy and wonder of intelligence and intuition He sought the basic principles of being which he called Silence and Light Kahn spoke of these qualities with tremendous power and grace *Between Silence and Light* one of the few books on Kahn written for a general audience introduces us to Louis Kahn the architect and the visionary Copyright Libri GmbH All rights reserved

book that touches on topics that addresses the universal human interests of consciousness and creativity Louis Kahn Architecture as Philosophy helps us understand our place and the nature of well being in the built environment Louis Kahn Carter Wiseman,2020-11-10 The man who envisioned and realized such landmark buildings as the Salk Institute the Kimbell Art Museum and the National Assembly complex in Bangladesh Louis Kahn was born in what is now Estonia immigrated to America and became one of the towering figures in his adopted country s built world His works are unmistakable in their elegance monolithic power and architectural honesty Written by Carter Wiseman one of Kahn s most respected commentators this book offers a succinct accessible examination of the life and work of one of America s greatest architects It traces the influence of his immigrant origins his upbringing in poverty his education the impact of the Great Depression and the arrival of Modernism on his life and work Finally it provides insight into why as the legacy of many of his contemporaries has receded in importance Kahn s has remained so durably influential Louis Kahn A Life in Architecture provides the best concise introduction available to this singular life and achievement *Louis I. Kahn--Architect* Charles E. Dagit, Jr.,2013-08-22 Few people in the history of art and architecture have planted a seed of inspiration that grew to become a towering oak of lasting influence There are those particularly colleagues and students of Louis I Kahn who would say that he was one of these people Certainly Kahn was one of the foremost architects of the twentieth century designing such famous landmarks as the National Assembly Building in Dhaka Bangladesh the Salk Institute in La Jolla California and the Kimbell Museum in Fort Worth Texas In this commemorative volume Charles E Dagit Jr shows the power and influence that Kahn displayed at the University of Pennsylvania department of architecture in the 1960s Since Dagit knew Kahn personally this is a factual history as well as a glimpse into Kahn s personal wisdom and humanity Beginning with a prelude that starts with the author s undergraduate years at the University of Pennsylvania Dagit launches readers on an intellectual journey of how he first met Kahn From there he details his experiences with Kahn and explores Kahn s interactions with Penn faculty members including Mario Romanach Robert Le Ricolet and Aldo Giurgola This first hand account sheds fascinating new light on one of the most prominent architects of the twentieth century **An Architecture of Place** Randall S. Lindstrom,2024-06-25 Challenging mainstream architecture s understandings of place this book offers an illuminating clarification that allows the idea s centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little

more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines

The Architecture of Ruins Jonathan

Hill,2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a

reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

The Embodied Image Juhani Pallasmaa, 2011-05-16 The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of

experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind

Shadow-Makers Stephen Kite, 2017-10-19 The making of shadows is an act as old as architecture itself From the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history Shadow Makers tells for the first time the history of shadows in architecture It weaves together a rich narrative combining close readings of significant buildings both ancient and modern with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways It shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious Within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from Hawksmoor's London churches Japanese temple complexes and the shade patterns of Islamic cities to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century This beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built
