The Socialist Feminist Project Nancy Holmstrom, 2002-08 Socialist feminist theorizing is flourishing today This collection is intended to show its strengths and resources and convey a sense of it as an ongoing project with a vital role to play in struggles for emancipation from all forms of oppression and exploitation today Not every contribution to that project bears the same theoretical label but the writings collected here share a broad aim of understanding women's subordination in a way which integrates class and sex as well as aspects of women's identity such as race ethnicity and sexual orientation with the aim of liberating women Socialist Feminism brings together the most important recent socialist feminist writings on a wide range of topics sex and reproduction the family wage labor social welfare and public policy the place of sex and gender in politics and the philosophical foundations of socialist feminism Although focusing on recent writings the collection shows how these build on a struggle for women's liberation with earlier beginnings These writings demonstrate the range depth and vitality of contemporary social feminist debates They also testify to the distinctive capacity of this project to address issues in a way that embraces collective experience and action while at the same time enabling each person to speak in their own personal voice

Youth Street Gangs David C. Brotherton, 2025-05-16 Gangs have been heavily pathologized in the last several decades In comparison to the pioneering Chicago School's work on gangs in the 1920s we have moved away from a humanistic appraisal of and sensitivity toward the phenomenon and have allowed the gang to become a highly plastic folk devil outside of history This pathologization of the gang has particularly negative consequences for democracy in an age of punishment cruelty and coercive social control This is the central thesis of David Brotherton's celebrated book on street gangs Drawing on a wealth of highly acclaimed original research Brotherton explores the socially layered practices of street gangs including community movements cultural projects and sites of social resistance The book also critically reviews gang theory and the geographical trajectories of streets gangs from New York and Puerto Rico to Europe the Caribbean and South America as well as state sponsored reactions and the enabling role of orthodox criminology In opposition to the dominant gang discourses Brotherton proposes the development of a critical studies approach to gangs and concludes by making a plea for researchers to engage the gang reflexively paying attention to the contradictory agency of the gang and what gang members actually tell us This new edition has been revised and fully updated containing three new chapters offering alternative approaches to interventions in gang violence and to gang desistance drawing on detailed interviews with Antonio Fernandez King Tone former head of the Latin Kings The book is essential reading for academics and students involved in the study of juvenile delinquency youth studies deviance gang studies and cultural criminology

Constructing Masculinity Maurice Berger, Brian Wallis, Simon Watson, 2012-09-10 This anthology takes us beyond the status of masculinity itself

America's Johannesburg Bobby M. Wilson, 2019-12-01 In some ways no American city symbolizes the black struggle for civil rights more than Birmingham Alabama During the 1950s and 1960s Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement Racially motivated bombings of the houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname Bombingham In this critical analysis of why Birmingham became such a national flashpoint Bobby M Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest True to its antebellum roots no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in which racial issues influenced the rise of industrial capitalism

[Dividing Lines](#) Deborah N. Archer, 2025-04-15 A USA TODAY BESTSELLER From an eminent legal scholar and the president of the ACLU an essential account of how transportation infrastructure from highways and roads to sidewalks and buses became a means of protecting segregation and inequality after the fall of Jim Crow Our nation's transportation system is crumbling highways are collapsing roads are pockmarked and commuter trains are unreliable But as acclaimed scholar and ACLU president Deborah Archer warns in *Dividing Lines* before we can think about rebuilding and repairing we must consider the role race has played in transportation infrastructure from the early twentieth century and into the present day As Archer demonstrates the success of the Civil Rights movement and the fall of Jim Crow in the 1960s did not mean the end of segregation The status quo would not be so easily dismantled With state sanctioned racism no longer legal officials across the country not just in the South turned to transportation infrastructure to

keep Americans divided A wealthy white neighborhood could no longer be protected by racial covenants and segregated shops but a multilane road with no pedestrian crossings could be built along its border to make it difficult for people from a lower income community to visit Highways could not be routed through Black neighborhoods based on the race of their residents but those neighborhoods lower property values a legacy of racial exclusion could justify their destruction A new suburb could not be for whites only but planners could refuse to extend sidewalks from Black communities into white ones Drawing on a wealth of sources including interviews with people who now live in the shadow of highways and other major infrastructure projects Archer presents a sweeping national account from Atlanta and Houston to Indianapolis and New York City of our persistent divisions With immense authority she examines the limits of current Civil Rights laws which can be used against overtly racist officials but are less effective in addressing deeper more enduring structural challenges But Archer remains hopeful and in the final count describes what a just system would look like and how we can achieve it

Reproducing the State Jacqueline Stevens, 2020-12-08 People are said to acquire their affiliations of ethnicity race and sex at birth Hence these affiliations have long been understood to be natural independent of the ability of political societies to define who we are Reproducing the State vigorously challenges the conventional view as well as post structuralist scholarship that minimizes state power Jacqueline Stevens examines birth based theories of membership and group affiliations in political societies ranging from the Athenian polis to tribes of Australia to the French republic to the contemporary United States The book details how political societies determine the kinship rules that are used to reproduce political societies Stevens analyzes the ways that ancestral and territorial birth rules for membership in political societies pattern other intergenerational affiliations She shows how the notion of ethnicity depends on the implicit or explicit invocation of a past present or future political society She also shows how geography is used to represent political regions including continents as the seemingly natural underpinning for racial taxonomies perpetuated through miscegenation laws and birth certificates And Stevens argues that sex differences are also constituted through membership practices of political societies In its chronological and disciplinary range Reproducing the State will reward the interest of scholars in many fields including anthropology history political science sociology women s studies race studies and ethnic studies **Frances Ellen**

Watkins Harper Michael Stancliff, 2010-09-13 This book traces long and prolific career of prominent early feminist abolitionist and civil rights advocate Frances Ellen Watkins Harper It explores her radical egalitarian vision in all its rich rhetorical and historic context and establishes the lasting relevance of that vision for civil rights and human rights workers today

Sisters in the Statehouse Nadia E. Brown, 2014 Theories of descriptive representation among female legislators consistently document the ways in which women are marginalized in office However they tend to treat identity as constant over time and context and so fail to account for the substantive work of legislators Sisters in the Statehouse looks at the situation from a different angle taking an in depth look at African American female state legislators to examine the impact of race and gender on Black women s political experiences policy preferences and legislative influence Brown links personal narratives to the political behavior of her interview subjects to understand how their experiences with racism and sexism have influenced their legislative decision making and policy preferences As such this is the first study that empirically examines how difference is recognized and put into practice among Black women legislators Brown demonstrates that identity influences political decision making in ways that distinguish the work of Black women from that of other state legislators Sisters in the Statehouse is a groundbreaking inquiry into how an intersectional approach can enhance our understanding of political representation
