An Education System Worthy of Malaysia M. Bakri Musa,2003-01-22 Malaysia's highly centralized and tightly controlled system of education fails in educating and integrating the young It is also ill suited for a plural society Instead of the present rigid and uniform system the writer calls for one that is flexible and diverse but with a core of commonality There should also be private sector participation to provide competition and spur innovation Achieving this requires radically changing the ministry of education from one obsessed with strict top down command to a more democratized model with power and responsibilities delegated to the periphery The minister is less a drill sergeant barking out orders to his raw recruits but more of a symphony conductor coaxing the best out of his skilled musicians The reforms suggested here will make Malaysians fluently bilingual in Malay and English science literate and mathematically competent as well as foster a common Malaysian identity

How Languages Work Carol Genetti,2014-01-23 A new and exciting introduction to

linguistics this textbook presents language in all its amazing complexity while guiding students gently through the basics. Students emerge with an appreciation of the diversity of the world's languages as well as a deeper understanding of the structure of human language, the ways it is used and its broader social and cultural context. Chapters introducing the nuts and bolts of language study (phonology, syntax, meaning) are combined with those on the functions of language (discourse, prosody, pragmatics) and language contact, helping students gain a better grasp of how language works in the real world. A rich set of language profiles help students explore the world's linguistic diversity, identify similarities and differences between languages and encourages them to apply concepts from earlier chapter material. A range of carefully designed pedagogical features encourage student engagement, adopting a step-by-step approach and using study questions and case studies.

Linguistic Landscapes in South-East Asia Seyed Hadi Mirvahedi, 2022-05-17. Anchored within current issues and debates in the field of Linguistic Landscape (LL) scholarship, this edited volume is concerned with politics of language and the semiotic construction of space in multilingual and multi-ethnic Asian countries. Spanning Malaysia, Singapore, Vietnam, Indonesia, the Philippines, Hong Kong, Taiwan and China, the chapters explore how different individuals and collectivities use semiotic resources in different spaces (schools, airports, streets and shops) as well as online platforms to reinforce or contest existing social structures, bearing strong implications for language maintenance and cultural revitalization, construction of ethnolinguistic and national identities and socioeconomic mobility. Part I looks into how globalization and its accompanying forces and influences such as the importance of English in socioeconomic mobility come into contact with local Asian cultures and languages. Part II examines minority languages demographically and socio-politically established in the countries, shedding light on the role of LL that plays in both their minorization and revitalization processes. Part III investigates how LL is utilized as a site for constructing identities to pursue socioeconomic, political and cultural goals. It is within this perspective that the presence and salience of English in the LL of the countries along with the use of the Asian languages is analyzed and understood, shedding light on how Asian heritage languages and cultures are preserved and/or certain identities in the times of political unrest or economic development are expressed. This fascinating insight into linguistic landscapes in Asia will be of interest to researchers, students and policy makers in sociolinguistics and applied linguistics anywhere in the world.

Nomads of the Borneo Rainforest Bernard Sellato, 1994-08-01. The Punan societies of Borneo traditionally nomadic rainforest hunters and gatherers have undergone a transformation over the past centuries. As downriver farming peoples expanded upstream and their cultures and technologies diffused, the Punan gradually abandoned their nomadic existence for a more sedentary life of trade-related activities and subsistence agriculture. But the culture that has emerged from these changes is still based on the enduring ideological premises of nomadism. This study, historical in perspective, examines the many factors (ecological,

economic commercial political social cultural and ideological that have played a part in this continuing transformation
