

HOW ANIMALS GRIEVE

BARBARA J. KING

How Animals Grieve By King Barbara J 2013 Paperback

Craig Banks Merow

How Animals Grieve By King Barbara J 2013 Paperback:

How Animals Grieve Barbara J. King, 2013-03-28 A touching and provocative exploration of the latest research on animal minds and animal emotions from the renowned anthropologist and author The Washington Post Scientists have long cautioned against anthropomorphizing animals arguing that it limits our ability to truly comprehend the lives of other creatures Recently however things have begun to shift in the other direction and anthropologist Barbara J King is at the forefront of that movement arguing strenuously that we can and should attend to animal emotions With *How Animals Grieve* she draws our attention to the specific case of grief and relates story after story from fieldsites farms homes and more of animals mourning lost companions mates or friends King tells of elephants surrounding their matriarch as she weakens and dies and in the following days attending to her corpse as if holding a vigil A housecat loses her sister from whom she's never before been parted and spends weeks pacing the apartment wailing plaintively A baboon loses her daughter to a predator and sinks into grief In each case King uses her anthropological training to interpret and try to explain what we see to help us understand this animal grief properly as something neither the same as nor wholly different from the human experience of loss The resulting book is both daring and down to earth strikingly ambitious even as it's careful to acknowledge the limits of our understanding Through the moving stories she chronicles and analyzes so beautifully King brings us closer to the animals with whom we share a planet and helps us see our own experiences attachments and emotions as part of a larger web of life death love and loss

Enter the Animal Teya Brooks Pribac, 2021-02-01 Historically grief and spirituality have been jealously guarded as uniquely human experiences Although non human animal grief has been acknowledged in recent times its potency has not been recognised as equal to human grief Anthropocentric philosophical questions still underpin both academic and popular discussions In *Enter the Animal* Teya Brooks Pribac examines what we do and don't know about grief and spirituality She explores the growing body of knowledge about attachment and loss and how they shape the lives of both human and non human animals A valuable addition to the vibrant interdisciplinary conversation about animal subjectivity *Enter the Animal* identifies conceptual and methodological approaches that have contributed to the prejudice against nonhuman animals It offers a compelling theoretical base for the consideration of grief and spirituality across species and highlights important ethical implications for how humans treat other animals

Man Writes Dog William Farina, 2014-04-02 Over the millennia many great writers from Pliny and Plutarch to C S Lewis and John Steinbeck have addressed diverse canine themes in their work usually in a broader human context Late in the 20th century it was conclusively established by modern science that all dogs without exception are descended from wolves Viewed through the dynamic lens of this new model the constantly evolving relationship between humankind and canines both wild and domesticated appears more complex and intertwined than ever before This survey reviews what 20 selected authors from the Western tradition have had to say on the same subject matter leading up to our present times

The Animal Mind Kristin Andrews, 2020-05-17 The

philosophy of animal minds addresses profound questions about the nature of mind and the relationships between humans and other animals In this fully revised and updated introductory text Kristin Andrews introduces and assesses the essential topics problems and debates as they cut across animal cognition and philosophy of mind citing historical and cutting edge empirical data and case studies throughout The second edition includes a new chapter on animal culture There are also new sections on the evolution of consciousness and tool use in animals as well as substantially revised sections on mental representation belief communication theory of mind animal ethics and moral psychology Further features such as chapter summaries annotated further reading and a glossary make The Animal Mind an indispensable introduction to those teaching philosophy of mind philosophy of animal minds or animal cognition It will also be an excellent resource for those in fields such as ethology biology and psychology

Ecofeminism: Feminist Intersections with Other Animals and the Earth Carol J. Adams, Lori Gruen, 2014-07-31 Leading feminist scholars and activists as well as new voices introduce and explore themes central to contemporary ecofeminism Ecofeminism Feminist Intersections with Other Animals and the Earth first offers an historical grounding overview that situates ecofeminist theory and activism and provides a timeline for important publications and events This is followed by contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more than human world In the final section the contributors explore the complexities of appreciating difference and the possibilities of living less violently Throughout the book the authors engage with intersections of gender and gender non conformity race sexuality disability and species The result is a new up to date resource for students and teachers of animal studies environmental studies feminist gender studies and practical ethics

Crooked Cats Nayanika Mathur, 2021-07-12 The last decade has seen the increasing entry of big cats lions tigers and leopards into human settlements in India Most big cats co reside with humans But some have become crooked killing people often serially and frightening residents in villages and cities This new book by big cat connoisseur and anthropologist Nayanika Mathur lays bare the peculiar atmosphere of terror these encounters create reinforced by stories conspiracy theories rumors anger and news reports about charismatic celebrity cats There are various theories of why and how a big cat turns to eating people and Mathur lays out the dominant ideas offered by the residents with whom she works These vary from the effects of climate change and habitat loss to history and politics The latter for example include the idea of big cats turning on humans for retribution for past injustices poaching or hunting Still no one including the scientists who study animal behavior has been able to explain the highly individualized reasons why some cats turn against humans and others do not Beautifully detailed in its portrayal of India s places people and animals Crooked Cats sheds light on how we understand nonhuman animals and the growing intensity of human nonhuman conflict in the Anthropocene

Humbling Faith Peter Admirand, 2019-03-22 This is a book hoping to embolden doubt and sharpen unanswerable questions all in the context of loving the self and one another Ridiculously it believes the world can be healed through such a hope It is especially

addressed to those allergic to the word faith and others who feel confident and proud in the faith they profess or system of thought they live by Humbling Faith helps us see how our beliefs or non beliefs our belongings and identities often remain flawed myopic self absorbed unredeemed The hope is that such awareness of our brokenness can fuel greater ethical partnerships and dialogue promoting peace from our recognized need for one another Humbling Faith is not only a resource towards humbling other faiths but most importantly your own *The Ethics of Canine Care* Craig Banks Merow,2023-06-21 The social status of dogs has changed dramatically in the past 75 years Today most dog owners and small animal veterinarians consider companion canines to be members of their families and communities However the attitudes of some dog owners concerning their responsibilities to their dogs and many of the laws that regulate dog ownership and veterinary medical practice largely reflect the human canine relationship and ethical norms of an earlier era This incongruity leads to unmet needs for companion canines and high levels of stress for many veterinary clinicians This book presents arguments for human responsibilities to companion canines a detailed analysis of what those responsibilities entail and the professional ethical standards and laws needed to ensure that responsibilities are met A new moral framework the Custodial Property Framework is created for the care and medical treatment of companion canines and is grounded in a detailed analysis of the responsibilities of care generated by the relationship we have with our best friends **Journal of Folklore Research** ,2018

Conversations on Human Nature Agustín Fuentes,Aku Visala,2015-11-30 Recent empirical and philosophical research into the evolutionary history of Homo sapiens the origins of the mind brain and the development of human culture has sparked heated debates about what it means to be human and how knowledge about humans from the sciences and humanities should be understood *Conversations on Human Nature* featuring 20 interviews with leading scholars in biology psychology anthropology philosophy and theology brings these debates to life for teachers students and general readers The book outlines the basic scientific philosophical and theological issues involved in understanding human nature organizes material from the various disciplines under four broad headings 1 evolution brains and human nature 2 biocultural human nature 3 persons minds and human nature 4 religion theology and human nature concludes with Fuentes and Visala s discussion of what researchers into human nature agree on what they disagree on and what we need to learn to resolve those differences **Ignoring Nature No More** Marc Bekoff,2013-06-01 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In *Ignoring Nature No More* Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species

populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike *The Politics of Species* Raymond Corbey,Annette Lanjouw,2013-09-05 Experts from a range of disciplines identify the key barriers to a definition of moral respect that includes nonhuman animals Critical Terms for Animal Studies Lori Gruen,2018-10-23 Alexandra Horowitz Peter Singer Barbara King Christine Korsgaard and others explore the core concepts of this interdisciplinary field Recommended Choice Animal Studies is a rapidly growing interdisciplinary field devoted to examining understanding and critically evaluating the complex relationships between humans and other animals Scholarship in Animal Studies draws on a variety of methodologies to explore these multi faceted relationships in order to help us understand the ways in which other animals figure in our lives and we in theirs Bringing together the work of a group of internationally distinguished scholars Critical Terms for Animal Studies offers distinct voices and diverse perspectives exploring significant concepts and asking important questions What do we mean by anthropocentrism captivity empathy sanctuary and vulnerability and what work do these and other critical terms do in Animal Studies How do we take non human animals seriously not simply as metaphors for human endeavors but as subjects themselves Sure to become an indispensable reference for the field Critical Terms for Animal Studies not only provides a framework for thinking about animals as subjects of their own experiences but also serves as a touchstone to help us think differently about our conceptions of what it means to be human and the impact human activities have on the more than human world The subject of animal studies is at a crucial stage still being mapped out and defining itself and this volume is very useful given its conciseness its all star cast of contributors and its breadth in providing a guide to some of the key ideas Colin Jerolmack New York University Mourning Nature Ashlee Cunsolo,Karen Landman,2017-05-17 We are facing unprecedented environmental challenges including global climate change large scale industrial development rapidly increasing species extinction ocean acidification and deforestation challenges that require new vocabularies and new ways to express grief and sorrow over the disappearance degradation and loss of nature Seeking to redress the silence around ecologically based anxiety in academic and public domains and to extend the concepts of sadness anger and loss Mourning Nature creates a lexicon for the recognition and expression of emotions related to environmental degradation Exploring the ways in which grief is experienced in numerous contexts this groundbreaking collection draws on classical philosophical

artistic and poetic elements to explain environmental melancholia Understanding that it is not just how we mourn but what we mourn that defines us the authors introduce new perspectives on conservation sustainability and our relationships with nature An ecological elegy for a time of climatic and environmental upheaval Mourning Nature challenges readers to turn devastating events into an opportunity for positive change Contributors include Glenn Albrecht Murdoch University retired Jessica Marion Barr Trent University Sebastian Braun University of North Dakota Ashlee Cunsolo Labrador Institute of Memorial University Amanda Di Battista York University Franklin Ginn University of Edinburgh Bernie Krause soundscape ecologist author and independent scholar Lisa Kretz University of Evansville Karen Landman University of Guelph Patrick Lane Poet Andrew Mark independent scholar Nancy Menning Ithaca College John Charles Ryan University of New England Catriona Sandilands York University and Helen Whale independent scholar

Evolving God Barbara J. King, 2017-04-21 The author of *How Animals Grieve* contends that religion is a consequence of primate evolution in this brilliant book Booklist starred review Religion has been a central part of human experience since at least the dawn of recorded history The gods change as do the rituals but the underlying desire remains a desire to belong to something larger greater most lasting than our mortal finite selves But where did that desire come from Can we explain its emergence through evolution Yes says biological anthropologist Barbara J King and doing so not only helps us to understand the religious imagination but also reveals fascinating links to the lives and minds of our primate cousins *Evolving God* draws on King's own fieldwork among primates in Africa and paleoanthropology of our extinct ancestors to offer a new way of thinking about the origins of religion one that situates it in a deep need for emotional connection with others a need we share with apes and monkeys Though her thesis is provocative and she's not above thoughtful speculation King's argument is strongly rooted in close observation and analysis She traces an evolutionary path that connects us to other primates who like us display empathy make meanings through interaction create social rules and display imagination the basic building blocks of the religious imagination With fresh insights she responds to recent suggestions that chimpanzees are spiritual or even religious beings and that our ancient humanlike cousins carefully disposed of their dead well before the time of Neandertals Her interpretations result in a provocative hypothesis about the evolution of spirituality The Dallas Morning News

Mourning Animals Margo DeMello, 2016-08-01 We live more intimately with nonhuman animals than ever before in history The change in the way we cohabitate with animals can be seen in the way we treat them when they die There is an almost infinite variety of ways to help us cope with the loss of our nonhuman friends from burial cremation and taxidermy to wearing or displaying the remains ashes fur or other parts of our deceased animals in jewelry tattoos or other artwork to counselors who specialize in helping people mourn pets to classes for veterinarians to tips to help the surviving animals who are grieving their animal friends to pet psychics and memorial websites But the reality is that these practices and related beliefs about animal souls or animal afterlife generally only extend with very few exceptions to certain kinds of animals pets Most animals in most cultures

are not mourned and the question of an animal afterlife is not contemplated at all Mourning Animals investigates how we mourn animal deaths which animals are grievable and what the implications are for all animals *If Nietzsche Were a Narwhal* Justin Gregg, 2022-08-09 This funny extraordinary and thought provoking The Wall Street Journal book asks whether we are in fact the superior species As it turns out the truth is stranger and far more interesting than we have been led to believe If Nietzsche Were a Narwhal overturns everything we thought we knew about human intelligence and asks the question would humans be better off as narwhals Or some other less brainy species There s a good argument to be made that humans might be a less successful animal species precisely because of our amazing complex intelligence All our unique gifts like language math and science do not make us happier or more successful evolutionarily speaking than other species Our intelligence allowed us to split the atom but we ve harnessed that knowledge to make machines of war We are uniquely susceptible to bullshit though cuttlefish may be the best liars in the animal kingdom our bizarre obsession with lawns has contributed to the growing threat of climate change we are sexually diverse like many species yet stand apart as homophobic and discriminate among our own as if its natural which it certainly is not Is our intelligence more of a curse than a gift As scientist Justin Gregg persuasively argues there s an evolutionary reason why human intelligence isn t more prevalent in the animal kingdom Simply put non human animals don t need it to be successful And miraculously their success arrives without the added baggage of destroying themselves and the planet in the process In seven mind bending and hilarious chapters Gregg highlights one feature seemingly unique to humans our use of language our rationality our moral systems our so called sophisticated consciousness and compares it to our animal brethren Along the way remarkable tales of animal smarts emerge as you ll discover A dazzling delightful read on what animal cognition can teach us about our own mental shortcomings Adam Grant The house cat who s better at picking winning stocks than actual fund managers Elephants who love to drink Pigeons who are better than radiologists at spotting cancerous tissue Bumblebees who are geniuses at teaching each other soccer What emerges is both demystifying and remarkable and will change how you look at animals humans and the meaning of life itself San Francisco Chronicle bestseller BOOKRIOT Best Books of the Year Next Big Idea Book Club Best Science Books of the Year I love the book and everyone should read it Ryan Holiday Undeniably entertaining The New York Times

Horse Cure Michelle Holling-Brooks, 2019-09-01 ASHLEY was locked in closets as punishment and physically and sexually abused resulting in an angry and violent child who threatened her adoptive family until she met Cocoa and Radar the horses that helped her learn to trust again BRENDA was diagnosed bipolar and lived through humiliating domestic abuse but three horses Delilah Wiscy and Diesel helped her establish a sense of self worth hope for the future and ultimately the will to go on NICK was angry suicidal and a veteran with combat PTSD who now says Horses literally saved my life Inspired by her own childhood trauma when she spent seven days in a coma awakened to a severely compromised body and brain and rebuilt her life with the help of a horse Michelle Holling Brooks founded Unbridled Change a non profit Equine Partnered Therapy

organization that helps match horses to individuals in need Here she shares amazing stories of the people she's worked with and the horse cure that changed their lives Survivors of trauma loss illness abuse stress and depression can face seemingly insurmountable obstacles But today a growing body of scientific evidence suggests that horses play a crucial role in therapy for those struggling with significant psychological and emotional challenges Horses respond to angry inhibited heartbroken defiant terrified clients in many different ways often breaking through defensive barriers via their physical presence or by pointing to areas of psychological distress not immediately apparent The horse's response guides the treatment team as well as the client in the healing process

Ecofeminism, Second Edition Carol J. Adams, Lori Gruen, 2021-12-16 This new edition of *Ecofeminism Feminist Intersections with Other Animals and the Earth* begins with an historical grounding overview that situates ecofeminist theory and activism within the larger field of ecocriticism and provides a timeline for important publications and events Throughout the book authors engage with intersections of gender sexuality gender expression race disability and species to address the various ways that sexism heteronormativity racism colonialism and ableism are informed by and support animal oppression This collection is broken down into three separate sections Affect includes contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more than human world Context explores the complexities of appreciating difference and the possibilities of living less violently Climate new to the second edition provides an overview of our climate crisis as well as the climate for critical discussion and debate about ecofeminist ideas and actions Drawing on animal studies environmental studies feminist gender studies and practical ethics the ecofeminist contributors to this volume stress the need to move beyond binaries and attend to context over universal judgments spotlight the importance of care as well as justice emotion as well as reason and work to undo the logic of domination and its material implications

How Do You Explain That? Danny Fourie, 2017-09-01 We know that the moon influences the tides but did you know that with the full moon you always see the same side of the moon Or that a yawn is contagious for humans and some animals And what precisely causes birds not to bump into one another when they fly in a swarm and they swerve These facts are part of a massive amount of knowledge about nature physics and space that the RSG programme Hoe verklaar jy dit has been sharing for 37 years This book translated from the original bestselling Afrikaans version contains a selection from the hundreds of questions curious listeners have been asking the experts to answer in order to make the world a little less strange because not all knowledge is obvious There are so many wonderful enigmas in nature and space that beg to be explained and we won't even mention man made inventions *How Do You Explain That* will pique your interest in the world around you It is a book that can be enjoyed on its own or can lie on the coffee table or can go camping with the family to elicit wonderful conversations around the campfire
