Ecology Edward F. Tverdek, 2015-12-24 If the natural environment is in the precarious state to which many attest what would this demand of us What duties are suggested by the observation that our collective behavior threatens the planet even if no particular individual intends harm Can we legitimately ask those who sincerely hold little or no interest in the long term viability of the earth s ecosphere to value it in the same way as committed environmentalists do and to act accordingly In The Moral Weight of Ecology Public Goods Cooperative Duties and Environmental Politics Edward Tverdek engages these questions and ultimately argues that the demands of ecology upon all of us are in fact quite substantial The book is not however another study in environmental ethics examining what it if anything we owe the natural world Rather The Moral

Weight of Ecology addresses the matter from the perspective of political economy and social choice theory Tverdek seeks to disarm both the intuitive libertarian notion that no one should be compelled to value and contribute toward something for which she has little regard as well as the romantic environmentalist assertion that one cannot assign an economic value to nature We must in some way price the natural world Tverdek argues but how we do so necessarily depends on what we believe would be a fair way to distribute the costs and burdens of maintaining it and these moral beliefs must be antecedent to the consumer preferences economists consider the raw data for determining the value of the environment The End of Night Paul Bogard,2025-05-01 A deeply panoramic tour of the night from its brightest spots to the darkest skies we have left A starry night is one of nature s most magical wonders Yet in our artificially lit world three quarters of Americans eyes never switch to night vision and most of us no longer experience true darkness In *The End of Night* Paul Bogard restores our awareness of the spectacularly primal wildly dark night sky and how it has influenced the human experience across everything from science to art From Las Vegas Luxor Beam the brightest single spot on this planet to nights so starlit the sky looks like snow Bogard blends personal narrative natural history science and history to shed light on the importance of darkness what we ve lost what we still have and what we might regain and the simple ways we can reduce the brightness of our nights tonight *Make the World a Better Place* Robert Kozma,2023-04-18 This book is a must read for all with an interest in the future of design Jim Spohrer PhD Retired Industry executive International Society of Service Innovation Professionals The world is in need of better design and Kozma s book shows us how to get there Mark Guzdial Director Program in Computing for the Arts and Sciences College of Literature Science and the Arts Professor of Electrical Engineering and Computer Science College of Engineering University of Michigan Design services products experiences and places that transform the world for the better *Make the World a Better Place* Design with Passion Purpose and Values presents an insightful and hands on discussion of design as a profoundly human activity and challenges us all to use design to transform the world for the better The book explains how and why the design industry lost its way and how to re ignite the idealism that once made it a force for good *Make the World a Better Place* describes a set of moral principles based on our shared humanity that can be used to create good designs designs that reduce harm increase well being advance knowledge promote equality address injustice and build supportive compassionate relationships and communities Dr Kozma applies philosophy psychology sociology and history to the world of design including Examples and case studies of designs both good and bad Seven principles of good design based on the impact designs have on people An approach to design as a moral dialog among co creators in which the seven principles can be applied to intentionally improve the world Comprehensive explorations of a person resource activity model that explains how technology shapes designs Detailed analyses of the strengths and pitfalls of five design traditions which include the scientific technical analytic human centered aesthetic and social movement traditions **The Intelligent Eye** David N.
