Landscape Architecture Theory An Evolving Body Of Thought:

Landscape Architecture Theory Michael D. Murphy, 2005 Landscape Architecture Theory provides an insightful introduction to the evolving body of knowledge that underpins the discipline and practice of landscape architecture The author's treatment emphasizes the interrelationships between the biophysical and human dimensions of the environment and the theories and decision making processes that issue from these relationships Students and practitioners alike will appreciate how this comprehensive text integrates knowledge from a wide variety of disciplines including earth science ecological science behavioral science design process and aesthetics with the theories that have been formulated to apply that knowledge to understanding and shaping the landscape This understanding it is hoped will result in designs that improve both quality of life and quality of the environment **BOOK JACKET** Landscape Architecture Theory Michael

Murphy, 2016-12-13 For decades landscape architecture was driven solely by artistic sensibilities But in these times of global change the opportunity to reshape the world comes with a responsibility to consider how it can be resilient fostering health and vitality for humans and nature Landscape Architecture Theory re examines the fundamentals of the field offering a new approach to landscape design Drawing on his extensive career in teaching and practice Michael Murphy begins with an examination of influences on landscape architecture social context contemporary values and the practicalities of working as a professional landscape architect He then delves into systems and procedural theory while making connections to ecosystem factors human factors utility aesthetics and the design process He concludes by showing how a strong theoretical understanding can be applied to practical every day decision making and design work to create more holistic sustainable and creative landscapes Students will take away a foundational understanding of the underpinnings of landscape architecture theory as well as how it can be applied to real world designs working professionals will find stimulating insights to infuse their projects with a greater sense of purpose **Research in Landscape Architecture** Adri van den Brink, Diedrich

Bruns, Hilde Tobi, Simon Bell, 2016-11-10 This book looks at research methods that are specific to and for landscape architecture and contributes to the further development of landscape architecture as an academic discipline in its own right

Landscape Architecture Criticism Jacky Bowring, 2020-04-29 Landscape Architecture Criticism offers techniques perspectives and theories which relate to landscape architecture a field very different from the more well known domains of art and architectural criticism Throughout the book Bowring delves into questions such as how do we know if built or unbuilt works of landscape architecture are successful What strategies are used to measure the success or failure and by whom Does design criticism only come in written form It brings together diverse perspectives on criticism in landscape architecture establishing a substantial point of reference for approaching design critique exploring how criticism developed within the discipline Beginning with an introductory overview to set the framework the book then moves on to historical perspectives the purpose of critique theoretical positions ranging from aesthetics to politics and experience unbuilt projects techniques

and communication Written for professionals and academics as well as for students and instructors in landscape architecture it includes strategies diagrams matrices and full colour illustrations to prompt discussion and provide a basis for exploring design critique

Landscape Architecture: A Very Short Introduction Ian Thompson, 2014-05-29 Landscape architecture plays an important role in shaping the places in which we live and work But what is it Landscape architects are involved amongst other things in the layout of business parks the reclamation of derelict industrial sites the restoration of historic city parks and the siting and design of major pieces of infrastructure such as motorways dams power stations and flood defences as well as the planning of parks and gardens Taking a historical perspective Ian Thompson looks at both the roots of landscape architecture and the people that established it This Very Short Introduction explores some of the misconceptions about landscape architecture and considers the discipline's origins in landscape gardening Thompson takes a look at a number of areas including the influence of Modernism the difference between landscape design and landscape planning and the way that planning legislation has driven the growth of the discipline He also explores contemporary environmentalism the debate as to whether landscape architecture is an art or a science landscape architecture in the community post industrial projects and its relationship with ecological urbanism

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang, 2020-11-09 The Routledge Companion to Twentieth and Early Twenty

First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city, its built environment, evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

Landscape Performance Bo Yang, 2018-10-26. Ian McHarg's ecological planning approach has been influential since the 20th century. However, few empirical studies have been conducted to evaluate the performance of his projects. Using the framework of landscape performance assessment, this book demonstrates the long-term benefits of a renowned McHargian project: The Woodlands town development, through quantitative and qualitative methods. Including 44 black and white illustrations, *Landscape Performance* systematically documents the performance benefits of the environmental, social, and economic aspects of The Woodlands project. It delves into McHarg's planning success in The Woodlands in comparison with adjacent Houston developments, which demonstrated urban resilience after Hurricane Harvey in 2017. Lastly, it identifies the ingredients of McHarg's ability to do real and permanent good. Yang also includes a number of appendices which provide valuable information on the methods of assessing performance in landscape development. This book would be beneficial to academics and students of landscape architecture and planning with a particular interest in Ian McHarg.

Landscape, Well-Being and Environment Richard Coles, Zoe Millman, 2013-11-07. Well-being is now firmly established as an overarching theme of key concern to all professionals that work, manage, or design the environment. However, well-being is a complex, multi-dimensional issue rooted in the ways that we encounter, perceive, and interpret the environment. No single discipline can claim to have sufficient knowledge to fully explain the types of interactions that occur; therefore, there is a need to draw together a wide range of professions who are exploring the consequences of their actions upon the well-being of individuals and communities. This edited work addresses the above, consisting of a collection of studies which embrace different aspects of environment, landscape, and well-being, to consider current approaches to well-being research and practice that fall outside the traditional concepts of well-being as part of medical research, making links with architecture, landscape design, environmental perception,

social interaction and environmental sustainability The contributors originally presented at the international conference Well Being 2011 jointly hosted by Birmingham City University and the Royal Institute of British Architects RIBA the chapters have been developed to present a coherent series of themes reviewing a wide range of literature presenting case studies appropriate to diverse audiences

Green Oslo Per Gunnar Røe, 2016-04-22 As urban regions face the demand to decrease fossil fuel dependency many cities in the developing world are undertaking initiatives designed to create a greener city by aiming for a more sustainable form of urban development and to do so they need to evaluate existing modes of transportation and patterns of land use Focusing on Oslo an early leader in urban environmental policy making and a European green city award winner it argues that this evaluation must adopt and integrate two approaches firstly as a process of ecological modernization based on a combination of transit densification and mixed use development and secondly as an opportunity to reconsider the character and substance of the built environment as a reflection of natural values landscapes and natural resources of the wider region Environmental debate and concern is widespread in Oslo and this is reflected in its earlier planning decisions to leave intact large forest reserves its successful ecological restoration of the Oslo fjord the importance of outdoor culture among its residents the relatively progressive political agenda of Norway This book provides an opportunity for a critical assessment of the limitations and opportunities inherent in green Oslo and suggests the need for much broader integrative approaches It concludes by highlighting lessons which other cities might learn from Oslo

Landscape Appreciation David Jacques, 2019-12-02 This book examines the many theories of preferred landscape over the last half century and informs those readers teaching or in landscape practice of the main lines of argument so that they can make up their own minds

Landscape Planning with Ecosystem Services Christina von Haaren, Andrew A. Lovett, Christian Albert, 2019-06-25 Human well being depends in many ways on maintaining the stock of natural resources which deliver the services from which human s benefit However these resources and flows of services are increasingly threatened by unsustainable and competing land uses Particular threats exist to those public goods whose values are not well represented in markets or whose deterioration will only affect future generations As market forces alone are not sufficient effective means for local and regional planning are needed in order to safeguard scarce natural resources coordinate land uses and create sustainable landscape structures This book argues that a solution to such challenges in Europe can be found by merging the landscape planning tradition with ecosystem services concepts Landscape planning has strengths in recognition of public benefits and implementation mechanisms while the ecosystem services approach makes the connection between the status of natural assets and human well being more explicit It can also provide an economic perspective focused on individual preferences and benefits which helps validate the acceptability of environmental planning goals Thus linking landscape planning and ecosystem services provides a two way benefit creating a usable science to meet the needs of local and regional decision making The book is structured around the Driving forces Pressures States Impacts Responses framework providing

an introduction to relevant concepts methodologies and techniques It presents a new ecosystem services informed approach to landscape planning that constitutes both a framework and toolbox for students and practitioners to address the environmental and landscape challenges of 21st century Europe

American Colonisation and the City Beautiful Ian Morley, 2019-10-30 Winner of the 2020 IPHS Koos Bosma Prize American Colonisation and the City Beautiful explores the history of city planning and the evolution of the built environment in the Philippines between 1916 and 1935 In so doing it highlights the activities of the Bureau of Public Works Division of Architecture as part of Philippine national development and decolonisation Morley provides new archival materials which deliver significant insight into the dynamics associated with both governance and city planning during the American colonial era in the Philippines with links between prominent American university educators and Filipino architecture students The book discusses the two cities of Tayabas and Iloilo which highlight the significant role in the urban design of places beyond the typical historiographical focus of Manila and Baguio These examples will aid in further understanding the appearance and meaning of Philippine cities during an important era in the nation's history Including numerous black and white images this book is essential for academics researchers and students of city and urban planning the history and development of Southeast Asia and those interested in colonial relations

Remodelling to Prepare for Independence Ian Morley, 2023-12-01 Remodelling to Prepare for Independence The Philippine Commonwealth Decolonisation Cities and Public Works c 1935 46 illuminates the implications of the USA's final phase of colonial rule in the Philippine Islands It explores the Filipino side of decolonisation and the management of the built environment in the years immediately prior to self rule This book shakes off the collaboration vs resistance paradigm that empire histories generally follow and consequently yields an original vantage point to comprehend transition within an Asian society in the years immediately prior to during and after World War Two This will not only deepen insight of the American Empire but also grants the opportunity to tie Philippine political cultural change to the global history of urban planning's advancement Accordingly it opens a new window to rethink Filipino ethno history and societal evolution alongside the opportunity to compare the Philippines with other nations that undertook planning projects as part of their decolonisation process and early postcolonial advancement The book utilises theoretical frames in order to help creatively excavate the era 1935 46 for the purpose of not just revealing what public works occurred but to also uncover what those projects meant to the Commonwealth Government the BPW's staff and the public who benefitted from public works projects The book will be relevant to students and researchers of Urban History Asian and American Empire History and Imperial and Colonial Studies Architects planners and members of the public who are interested in the form and meaning of urban environments designed constructed in the past will also find the publication to be of great interest
