Landscape Ecology For Sustainable Environment And Culture:

Landscape Ecology for Sustainable Environment and Culture Bojie Fu, Bruce Jones K, 2013-03-26 Climate change and the pressures of escalating human demands on the environment have had increasing impacts on landscapes across the world. In this book, world-class scholars discuss current and pressing issues regarding the landscape, landscape ecology, social and economic development, and adaptive management. Topics include the interaction between landscapes and ecological processes, landscape modeling, the application of landscape ecology in understanding cultural landscapes, biodiversity, climate change, landscape services, landscape planning, and adaptive management to provide a comprehensive view that allows readers to form their own opinions. Professor Bojie Fu is an Academician of the Chinese Academy of Sciences and Chair of the Scientific Committee at the Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, Beijing, China. Professor K. Bruce Jones is the Executive Director for Earth and Ecosystem Sciences Division at the Desert Research Institute, University of Nevada, Las Vegas, USA.

Landscape Ecology in Asian Cultures Sun-Kee Hong, Jianguo Wu, Jae-Eun Kim, Nobukazu Nakagoshi, 2010-12-25 Cultural landscapes are a product of the interactions between humans and natural settings. They are landscapes and seascapes that are shaped by human history and land use. Socioeconomic processes, especially but also environmental changes and natural disturbances, are some of the forces that make up landscape dynamics. To understand and manage such complex landscapes, interdisciplinary and transdisciplinary approaches are necessary, emphasizing the integration of natural and social sciences and considering multiple landscape functions. The spatial patterns of Asian landscapes are strongly related to human activities and their impacts. Anthropogenic patterns and processes have created numerous traditional cultural landscapes throughout the region, and understanding them requires indigenous knowledge. Cultural landscape ecology from a uniquely Asian perspective is explored in this book, as are the management of landscapes and land use policies. Human-dominated landscapes with long traditions, such as those described herein, provide useful information for all ecologists, not only in Asia, to better understand the human environmental relationship and landscape sustainability.

Principles of Soundscape Ecology Bryan C. Pijanowski, 2024-06-06 From a founding figure in the field, the definitive introduction to an exciting new science. What do the sounds of a chorus of tropical birds and frogs, a clap of thunder, and a cacophony of urban traffic have in common? They are all components of a soundscape, acoustic environments that have been identified by scientists as a combination of the biophony, geophony, and anthrophony, respectively, of all of Earth's sound sources. As sound is a ubiquitous occurrence in nature, it is actively sensed by most animals and is an important way for them to understand how their environment is changing. For humans, environmental sound is a major factor in creating a psychological sense of place, and many forms of sonic expression by people embed knowledge and culture. In this book, soundscape ecology pioneer Bryan C. Pijanowski presents the definitive text for both students and practitioners who are seeking to engage with this thrilling new field. *Principles of Soundscape Ecology* clearly outlines soundscape ecology's critical

foundations key concepts methods and applications Fundamentals include concise and valuable descriptions of the physics of sound as well as a thorough elucidation of all sounds that occur on Earth Pijanowski also presents a rich overview of the ecological sociocultural and technical theories that support this new science illustrating the breadth of this amazingly transdisciplinary field In methods he describes the principles of data mining signal processing and mixed methods approaches used to study soundscapes in ecological social or socio ecological contexts The final section focuses on terrestrial aquatic urban and music applications demonstrating soundscape ecology s utility in nearly all spaces

The Science and Practice of Landscape Stewardship Claudia Bieling,Tobias Plieninger,2017-06-29 This book introduces the principles of landscape stewardship in relation to sustainability governance applying them to a broad range of land use systems

Landscape Ecology: A Widening Foundation Vittorio Ingegnoli,2013-04-17 Exactly 25 years ago on a warm autumn afternoon a young ecologist walked slowly through a tiny oak wood and perched on a log to reflect He had measured and seemingly knew all the species present trees mosses mushrooms birds and more The research based on this and other woods in the landscape was the first rigorous test to see if island biogeographic theory was of use in heterogeneous land Unexpectedly an interior to edge model was found to be more useful But on this beautiful sunny day he gazed out through the trees at the surrounding bean and maize fields Suddenly a terrible thought hit him The land surrounding the other woods differed slightly from this scene Here there were two bean fields plus a maize field meadow hedgerow and farm road but the other comparably sized woods studied had different mixes of these land uses Wouldn t the surroundings seriously affect the species in the woods Had he done bad science an awful feeling for a scientist Immediately he went to all his ecology books searching for discussions of patchiness mosaic pattern interactions between ecosystems and the like Nothing Surprise was a new ingredient to ponder Then for 3 months every spare moment found him in the university library digging deeper collecting tidbits and clues A new feeling took over challenge and excitement The spatial arrangement of ecosystems and land uses is important ecologically A giant but approachable scholarly frontier

Social Transformations in India, Myanmar, and Thailand: Volume I Chosein Yamahata,Donald M. Seekins,Makiko Takeda,2021-01-02 This book focuses on the different challenges and opportunities for social transformation in India Myanmar and Thailand by centering communities and individuals as the main drivers of change In doing so it includes discussions on a wide array of issues including women s empowerment and political participation ethno religious tensions plurilingualism education reform community based healthcare climate change disaster management ecological systems and vulnerability reduction Two core foundations are introduced for ensuring broader transformations The first is the academic diplomacy project a framework for an engaged academic enquiry focusing on causative curative transformative and promotive factors The second is a community driven collective struggle that serves as a grassroots possibility to facilitate positive social transformation by using locally available resources and enabling the participation of the resident population As a whole the book conveys the importance of a

diversification of engagement at the grassroots level to strengthen the capacity of individuals as decisive stakeholders where the process of social transformation makes communities more interconnected interdependent multicultural and vital in building an inclusive society Geographies of the Indian Subcontinent Sukla Hazra, Anwesha Haldar, Rajarshi Dasgupta, Pinaki Sarkar, Subhasree Singha Ray, Panchali Majumdar, 2025-01-13 This contributed volume presents the latest in research on geographies of the Indian Subcontinent with a focus on innovative technologies and methodologies such as machine learning remote sensing geographic information systems and more The cases presented in this volume offer novel research that advances our understanding of the Indian Subcontinent in integrated and interdisciplinary manner The book is split into three distinct sections The first covers field observations and experiment design The second examines applications of geospatial technologies and modelling techniques The last section highlights cases of translating this research into concrete policy The techniques described here and the lessons learned from the cases presented are transferrable to problems in geography across the globe and the book is targeted towards young professors scholars and researchers interested in the emerging techniques being applied to research in the field of geography and allied disciplines Island Landscapes Gloria Pungetti, 2016-11-10 Island Landscapes takes a critical look at the evolution of European islandscapes and seascapes to examine the conditions facing them in the twenty first century Considering island landscapes as an expression of European culture this book envisages future trends and presents clearly the need to find a balance between preservation and development to ensure sustainability Both large and small islands are illustrated in the book including the British Isles Malta and Cyprus as well as archipelagos in Norway Italy and Greece Their unique identities and values reveal the remarkable breadth of cultural heritage possessed by these diverse European islands An interdisciplinary approach is applied to the history perception characterisation and planning of islandscapes and seascape in Europe to support culturally oriented strategies for these fragile landscapes **Mountains: Physical, Human-Environmental, and Sociocultural Dynamics** Mark A. Fonstad, 2018-12-07 Mountains have captured the interests and passions of people for thousands of years Today millions of people live within mountain regions and mountain regions are often areas of accelerated environmental change This edited volume highlights new understanding of mountain environments and mountain peoples around the world The understanding of mountain environments and peoples has been a focus of individual researchers for centuries more recently the interest in mountain regions among researchers has been growing rapidly The articles contained within are from a wide spectrum of researchers from different parts of the world who address physical political theoretical social empirical environmental methodological and economic issues focused on the geography of mountains and their inhabitants The articles in this special issue are organized into three themed sections with very loose boundaries between themes 1 physical dynamics of mountain environments 2 coupled human physical dynamics and 3 sociocultural dynamics in mountain regions This book was first published as a special issue of the Annals of the American Association of Geographers **Proceedings**

Landscape Planning with Ecosystem Services Christina von Haaren,Andrew A. Lovett,Christian Albert,2019-06-25 Human well being depends in many ways on maintaining the stock of natural resources which deliver the services from which human s benefit However these resources and flows of services are increasingly threatened by unsustainable and competing land uses Particular threats exist to those public goods whose values are not well represented in markets or whose deterioration will only affect future generations As market forces alone are not sufficient effective means for local and regional planning are needed in order to safeguard scarce natural resources coordinate land uses and create sustainable landscape structures This book argues that a solution to such challenges in Europe can be found by merging the landscape planning tradition with ecosystem services concepts Landscape planning has strengths in recognition of public benefits and implementation mechanisms while the ecosystem services approach makes the connection between the status of natural assets and human well being more explicit It can also provide an economic perspective focused on individual preferences and benefits which helps validate the acceptability of environmental planning goals Thus linking landscape planning and ecosystem services provides a two way benefit creating a usable science to meet the needs of local and regional decision making The book is structured around the Driving forces Pressures States Impacts Responses framework providing an introduction to relevant concepts methodologies and techniques It presents a new ecosystem services informed approach to landscape planning that constitutes both a framework and toolbox for students and practitioners to address the environmental and landscape challenges of 21st century Europe

Urban Ecology Philip James,Ian Douglas,2014-10-30 Urban Ecology An Introduction seeks to open the reader s mind and eyes to the way in which nature permeates everyday urban living and how it has to be understood cared for and managed in order to make our towns and cities healthier places to visit and in which to live and work The authors examine how nature can improve our physical and mental health the air we breathe and the waters we use as well as boosting our enjoyment of parks and gardens Urban Ecology sets out the science that underlies the changing natural scene and the tools used to ensure that cities become both capable of adapting to climate change and more beautiful and resilient The book

begins with a discussion of the nature of urban places and the role of nature in towns and cities Part 1 looks at the context and content of urban ecology its relationship to other foci of interest within ecology and other environmental sciences and the character of city landscapes and ecosystems In Part 2 the authors set out the physical and chemical components of urban ecosystems and ecological processes including urban weather and climate urban geomorphology and soils urban hydrology and urban biogeochemical cycles In Part 3 urban habitats urban flora and fauna and the effects of deliberate and inadvertent human action on urban biota are examined Part 4 contains an exploration of the identification and assessment of ecosystem services in urban areas emphasising economic evaluation the importance of urban nature for human health and well being and restoration ecology and creative conservation Finally in Part 5 the tasks for urban ecologists in optimising and sustaining urban ecosystems providing for nature in cities adapting to climate change and in developing the urban future in a more sustainable manner are set out Within the 16 chapters of the book in which examples from around the world are drawn upon the authors explore current practice and future alternatives set out procedures for ecological assessment and evaluation suggest student activities and discussion topics provide recommended reading and an extensive bibliography The book contains more than 150 tables and over 150 photographs and diagrams

Urban Nature Michelle L. Cocks, Charlie M. Shackleton, 2020-11-15 This book showcases the diversity of ways in which urban residents from varying cultural contexts view interact engage with and give meaning to urban nature aiming to counterbalance the dominance of Western depictions and values of urban nature and design Urban nature has up to now largely been defined planned and managed in a way that is heavily dominated by Western understandings values and appreciations which has spread through colonialism and globalisation As cities increasingly represent a diversity of cultures and urban nature is being increasingly recognised as contributing to residents wellbeing belonging and overall quality of life it is important to consider the numerous ways in which urban nature is understood and appreciated This collection of case studies includes examples from Africa Asia Europe North and South America and reflects on the multi dimensional aspects of engagements with urban nature through a biocultural diversity lens The chapters cover several themes such as how engagements with nature contribute to a sense of wellbeing and belonging the implications that diversity has on the provision design and management of urban environments and the threats inhibiting residents abilities to engage meaningfully with nature The book challenges the dominant discourse Western ideological understandings and meta narratives of modernisation and unilineal urban transitions A timely addition to the literature Urban Nature Enriching Belonging Wellbeing and Bioculture offers an alternative to Western ideological understandings of nature and values and will be of great interest to those working in human and environmental urban ecology It will also be key reading for students in the relevant fields of anthropology development studies geography social ecology and urban studies
