Landscapes And Landforms Of France World Geomorphological Landscapes:

Landscapes and Landforms of France Monique Fort, Marie-Françoise André, 2013-08-23 The Landforms and Landscapes of France provides an informative and attractive overview of the most scenic landscapes of France The geodiversity of France is emphasized for example the glacial landscapes of the Mont Blanc Massif the volcanoes of the French Massif Central the chalk cliffs and sand dunes of the Atlantic coast the granitic landscapes of Corsica or the lagoons and coral reefs of French Polynesia The objectives are to provide the reader with an enjoyable and informative description of the selected sites within their regional geographical and geological settings to offer an up to date survey of the evolution of France s landscape and to give additional information on the cultural value of the selected sites wherever appropriate prehistoric paintings legends related to sites famous vineyards etc The book is a richly illustrated reference work that makes accessible for the first time a wealth of information currently scattered among many national and regional journals It will be of benefit to earth scientists environmental scientists tourism geographers and conservationists

Landscapes and Landforms of Switzerland Emmanuel Reynard, 2020-07-09 This book provides a comprehensive overview of the Landscapes and Landforms of Switzerland It covers the country s geological and tectonic context together with its climatic context geomorphological history structural and karstic landscapes glacial and periglacial landscapes landscapes with natural hazards geomorphology and society and the preservation of its geomorphological heritage Richly illustrated it presents case studies on some of the country s most famous natural sites including the Matterhorn Aletsch Glacier Sardona Tectonic Arena and Engadine among others

Landscapes and Landforms of Nigeria Adetoye Faniran, Lawrence Kosoko Jeje, Olutoyin A. Fashae, Adeyemi O. Olusola, 2023-02-28 The book deals with the most striking landscapes and landforms of Nigeria Attention is paid to the diversity of geomorphic features found in the country from the coast to the extreme north approached geographically at the national regional and local scales with a view to highlight the combined influence of geological climatic biotic and anthropogenic influences as well as geoheritage potentials The topics and sites described range from the mainly depositional coastal lagoons and inlets the most prominent of which is the oil rich Niger Delta characterized by the mangrove and rain forest both of which have been seriously modified by human impact through the coastal lowlands and associated hill country with derived deciduous and dry forest vegetation the very prominent Niger Benue Trough and associated features the savanna semi desert covered high plains of the north and the Chad Basin each of which features spectacular landscapes and landforms including human made forms such as cities and cityscapes The book provides the readers with the opportunity to explore the variety of Nigerian landscapes and landforms through informative texts illustrated with color maps and photos it will be relevant to scientists scholars as well as others interested in the geology physical geography geomorphology landscape tourism and other geoheritage related information about the country

Landscapes and Landforms of Norway Achim A. Beylich, 2020-10-04 This book discusses the striking geomorphological landscapes of mainland Norway As part of the Springer book series on

World Geomorphological Landscapes it outlines the nature and diversity of Norway's geomorphological landscapes and examines the geological background and the drivers of landscape evolution. It also features numerous case studies describing the most striking sites and offers insights into the status and value of geoheritage and geoconservation in the country. Providing readers with an opportunity to explore the variety of Norwegian landscapes and landforms through informative texts richly illustrated with color maps and photos, the book will appeal to scientists, scholars, and any readers interested in geology, physical geography, geomorphology, landscape tourism, geoheritage, and environmental protection. Landscapes and Landforms of Israel Amos Frumkin, Nurit Shtober-Zisu, 2024-03-19 This edited book will bring together a collection of works that comprehensively address the various landforms of Israel and how their evolution has been shaped over time by multiple geomorphic agents. Israel is a small country with highly diverse landscapes and climates; this overview of the most prominent landscapes will describe the processes, origins, and the environmental significance of those landscapes. The sites described in this book include lowlands to mountains, the rift valley, and desert to Mediterranean zones, along with long-term interactions between their geomorphology and people, which largely contributed to modern landscapes. The book will be relevant to those interested in the geology, physical geography, and history of Israel and the processes that shaped its unique landscapes. Landscapes and Landforms of Austria Christine Embleton-Hamann, 2022-05-20 This book intends to identify and publicize the unique features of Austrian geomorphology. In a country which stretches from the core of the European Alps to the Hungarian plain, there is huge variety of landforms and landscapes. This book reveals that variety. Part 1 sets the context of the Austrian landscape as a whole. Part 2 is the core of the volume and comprises a careful selection of the most outstanding landscapes in Austria. Each of the chapters results from detailed research conducted by an author over many years. Austria's landscapes are especially attractive because of the great variety of topographic slopes, geologic foundations, and the special landscape legacy from the Quaternary period. Glacial and Karst landscapes dominate, but there are superb examples of granite weathering landscapes and geologically recent volcanism. The book is lavishly illustrated with about 350 color images and is securely based on scientific scholarship. **Landscapes and Landforms of Scotland** Colin K. Ballantyne, John E. Gordon, 2021-08-24 This book provides an appealing and informative overview of the outstanding landforms and landscapes of Scotland. Scotland is internationally renowned for the diversity of its geology, landforms, and landscapes. The rock record spans most of geological time from the Archaean to the Palaeogene and represents the outcome of tectonic plate movements, associated geological processes, and sea level and climate changes. Scotland incorporates primeval gneiss landscapes, the deeply eroded roots of the Caledonian mountain chain, landscapes of extensional tectonics and rifting, and eroded remnants of volcanic complexes that were active when the North Atlantic Ocean opened during the Palaeogene. The present relief reflects uplift and deep weathering during the Cenozoic, strongly modified during successive episodes of Pleistocene glaciation. This striking geodiversity is captured in this book through 29 chapters devoted to the

evolution of Scotland's scenery and locations of outstanding geomorphological significance including ancient palaeosurfaces landscapes of glacial erosion and deposition evidence of postglacial landscape modification by landslides rivers and wind and coastal geomorphology Dedicated chapters focus on Ice Age Scotland and the associated landscapes which range from alpine type mountains and areas of selective glacial erosion to ice moulded and drift covered lowlands and incorporate accounts of internationally renowned sites such as the Parallel Roads of Glen Roy the Cairngorm Mountains and the inselbergs of Assynt Other chapters consider the record of postglacial rock slope failures such as the famous landslides of Trotternish on Skye and the record of fluvial changes since deglaciation The sea level history of Scotland is addressed in terms of its raised and submerged shorelines while several chapters discuss the contrasting coastal landscapes which range from the spectacular sea cliffs of Shetland and Orkney to the beaches and dunes of eastern Scotland The role of geoconservation in preserving Scotland's outstanding geomorphological heritage is outlined in the final chapter The book offers an up to date and richly illustrated reference guide for geomorphologists other Earth scientists geographers conservationists and all those interested in geology physical geography geomorphology geotourism geoheritage and environmental protection

Landscapes and Landforms of the Czech Republic Tomáš Pánek, Jan Hradecký, 2016-03-08 The book aims to present the unique geomorphological landscapes of the Czech Republic The geomorphic uniqueness of this country benefits from the proximity to two distinct European geological domains the old cratonized Bohemian Massif and the relatively young Tertiary fold and thrust belt of the Western Carpathians *Landscapes and Landforms of the Czech Republic* introduces general physiographical characteristics of the landscape and presents the main driving factors leading to the evolution of the present landscape The book contains twenty two chapters describing the most interesting geomorphic landscapes of the Czech Republic The selection of individual landscapes was based on visual exceptionality e.g. sandstone landscapes of the Northern Bohemia scientific importance e.g. patterned grounds in the Sudetic Mountains and historical relevance e.g. mining of the Nízký and Hrubý Jeseník Mountains The final chapters of the book discuss the protection of geomorphic heritage in the Czech Republic

Landscapes and Landforms of Botswana Frank D. Eckardt, 2022-05-17 This volume contains 22 chapters introducing a wide range of semi arid and geologic landscapes Botswana a thinly populated nation the size of France is a Southern African keystone country at the heart of the Kalahari sharing some of the major sub continental drainage basins such as the Limpopo Zambezi Orange and Okavango with its neighbouring countries The extensive Kalahari Sand surface has been sculptured by numerous past processes which have produced subtle but regional landforms consisting of extensive dunes and shorelines Incipient rifting has created the dynamic Okavango and Makgadikgadi fan basin systems which produces iconic wetlands with a world heritage status Geological outcrops in particular to the east expose highly denuded basement lithologies which produces numerous inselbergs that are home to a rich archaeological heritage The book also examines the geomorphology of mineral and water resources which sustain the economy and population and also features dedicated chapters that cover

diamondiferous kimberlites caves pans dams duricrusts and wildlife Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) *Landscapes and Landforms of Slovakia* Milan Lehotský, Martin Boltižiar, 2022-04-11 *Landscapes and Landforms of the Slovakia* provides an attractive physiographical overview of the most prominent landscapes of Slovakia and the distinctive landforms associated with them. It describes the main driving factors leading to their evolution and importance for geoconservation and geotourism. The richly illustrated book provides the reader with enjoyable and informative descriptions of the selected sites within their regional geographical and geological settings. Range from the Tatras Mts with glacially shaped relief as the highest region in the Carpathians to caves and lowlands taking into account fluvial gravity induced karst and structural landscapes of the Slovakia. The book is organized in 3 parts: a Introduction which presents a general framework of the physical geography of Slovakia; b Geomorphological landscapes presenting papers dealing with key geomorphological areas resp. landforms; c Geoheritage and landscape protection providing an updated vision on the geomorphological geological heritage sites and landscape protection policy in Slovakia. The book will be relevant to scientists, scholars and any readers interested in geomorphology, geology, physical geography, geoheritage, landscape tourism and environmental protection. It can be also used for undergraduate and graduate courses in Earth and environmental sciences. **Landscapes and Landforms of Costa Rica** Adolfo

Quesada-Román, 2024-10-03 The book presents a general to detailed perspective of the most updated geomorphological works in Costa Rica. The book will be very interesting for professionals, researchers, general public and students.

Landscapes and Landforms of the Central Sahara Jasper Knight, Stefania Merlo, Andrea Zerboni, 2024-01-02 This book describes the Central Sahara region bringing together an unprecedented combination of diverse and often historic research published in different languages in order to describe its varied landscapes and landforms. The Central Sahara region consists of Libya, Algeria, Mali, Niger and Chad countries that share similar landscape histories and common landscape traits including massifs, sand seas, paleowater features and large depressions. Furthermore, human settlement of this region goes hand in hand with climate and environmental changes and landscape evolution during the Holocene and earlier. Hence, Central Saharan landscapes and landforms provide valuable insights into landscape-human relationships over long timescales. The book offers a comprehensive yet accessible reference source drawing on both past and present interdisciplinary research and gathering the insights of authors from many different countries to explore a region that has largely been overlooked in available literature. *Landscapes and Landforms of the Horn of Africa* Paolo Billi, 2022-09-30 This book focuses on regions for which until now the geomorphology was very poorly studied and relatively unknown. Nevertheless, the landforms and landscapes of the Horn of Africa are highly attractive, diverse and in a few cases unique since they span very different environments from highland plateaus and mountains to lowlands even below sea level and coastlines with a high degree of diversity and from monsoon to arid climate conditions. The main topics addressed in the book include the links between the

geological evolution and the current large scale geomorphology of the Horn of Africa the large differences between the highlands and lowlands climate river hydrology and their variation through time within a climate change perspective This part of the world was home of the very first hominids The landscape in which they lived and evolved throughout the Pleistocene is described in comparison with the arid and inhospitable though immensely scenic environment of today Perennial and ephemeral rivers with very different morphology processes and hydrology drain the area and in combination with the past and recent uplift substantially contributed to provide the region with peculiar landscapes and landforms Long lasting weathering and erosion processes result in a typical inselberg landscape such as the Bur region or the currently exposed flatland of old peneplain surfaces Their changes through time induced by both natural and anthropogenic factors are addressed by a couple of case studies Though the region has few inhabitants they had to struggle to find their livelihood in a land that offers poor resources This resulted in landscape change and land degradation Examples of human impact on the landscape are presented at different scales This book provides readers interested in geography and geomorphology with essential scientific and educational information on the Landscapes and Landforms of Eritrea Djibouti and Somalia through simple though scientifically rigorous texts illustrated with several color maps and photos One main prerogative of this book is therefore to give an insight into a region of the world where for geographical and historical constraints geomorphological investigation was very limited thus enriching its intrinsic informative value

Landscapes and Landforms of Ethiopia Paolo Billi, 2015-03-23 This book provides a succinct but comprehensive presentation of key geomorphological locations and topics including information about geomorphological heritage and maps to visit the most important sites Apart from often being remarkably scenic landscapes reveal stories that often can be traced back in time tens of million years and include unique events This is particularly true for Ethiopia where spectacular examples of different landforms are present Its geomorphology varies from highlands marked by high volcanoes and incised by deep river gorges to the rift valley lakes endorheic systems and the below sea level lowlands with characteristic landscapes which are unique in the world Landscapes and Landforms of Ethiopia highlights all these topics including essential information about geology and tectonic framework past and present climate hydrology geographical regions and long term geomorphological history It is a highly informative book providing insight for readers with an interest in geography and geomorphology

Landscapes and Landforms of India Vishwas S. Kale, 2014-05-23 The proposed monograph on Geomorphological Landscapes of India will aim to describe and explain in simple words the geomorphological characteristics and the origin of the above mentioned landforms and landscapes The proposed monograph will provide the background information about the geology climate and tectonic framework of the Indian region as well as cover Indian climates of the present and the past It will mainly cover the four main morphotectonic regions of India and about 15 20 distinct landforms of the Indian region as well as the major geomorphosites in India

Geoheritage Emmanuel Reynard, José Brilha, 2025-08-29 Geoheritage Assessment Protection and Management Second

Edition provides a comprehensive exploration of geoheritage beginning with an introduction to geodiversity and progressing to the characterisation of in situ and ex situ geoheritage its protection and sustainable use It also offers advanced concepts and methodologies for site assessment mapping conservation visualisation and management and features 12 case studies spanning five continents Authored by 75 experts from 22 countries this edition includes nearly 200 figures and maps New chapters expand the scope of the first edition to address geoheritage s links to biodiversity climate change natural hazards ecosystem services education and cities This essential resource is perfect for geoscientists and students in the fields of geodiversity geoheritage geoconservation and geotourism as well as professionals involved in nature conservation protected areas and geoparks 24 thematic chapters based on conceptual methodological and applied research carried out by academics and practitioners 12 case studies from Africa Asia the Middle East South and North America Europe Australia and Antarctica Over 200 colour images and maps of geoheritage sites

Landscapes and Landforms of Eastern Canada Olav Slaymaker, Norm Catto, 2020-02-13 This critical book focuses on the geomorphological landscapes of eastern Canada and provides a companion volume to *Landscapes and Landforms of Western Canada* 2017 There are a number of unique characteristics of eastern Canada s landscapes notably its magnificent coastlines the extraordinary variety and extent of wetlands the huge Great Lakes St Lawrence basin the high incidence of meteorite craters the spectacular Niagara Falls urban karst in Montreal and Ottawa youthful glaciated karst in Ontario Newfoundland Quebec and Nova Scotia the ubiquitous permafrost terrain of Nunavut Labrador and northern Quebec and the magnificent arctic fjords and glaciers Looking at coastlines the tidal extremes of the Bay of Fundy are world renowned the structural complexity of the island of Newfoundland is less well known but produces an astounding variety of coastlines in close succession the arctic fjordlands of Baffin and Ellesmere islands and the extravagant raised beaches of Hudson Bay bear comparison with the classic fjords of Norway and the Baltic Sea raised beaches As for wetlands there are distinctive Arctic Subarctic Boreal Eastern Temperate and Atlantic wetlands and their extent is second only to those of Russia In the Hudson and James Bay regions between 75 100% of the terrestrial surface is comprised of wetlands One of North America s largest river basins the Great Lakes St Lawrence basin has its source in Minnesota straddles the USA Canada border and debouches into Quebec as the St Lawrence River and evolves through its estuary into the Gulf of St Lawrence a journey of almost 5 000 km As far as meteorite craters are concerned 10% of the world s total are located in eastern Canada including some of the largest and most complex landforms They are preserved preferentially in the ancient Shield terrain of Quebec Finally the three million km² of permafrost controlled relief in eastern Canada serves as a reminder of the vulnerability of eastern Canada s landscapes to climate change Effects of warming are expressed through thawing of the permafrost disruption of transportation corridors and urban construction problems ever present geomorphic hazards

Landscapes and Landforms of Turkey Catherine Kuzucuoğlu, Attila Çiner, Nizamettin Kazancı, 2019-01-08 This book on Turkish geomorphology offers location descriptions
