Urban Wildlife Conservation Robert A. McCleery, Christopher E. Moorman, M. Nils Peterson, 2014-11-11 In the past wildlife living in urban areas were ignored by wildlife professionals and urban planners because cities were perceived as places for people and not for wild animals Paradoxically though many species of wildlife thrive in these built environments Interactions between humans and wildlife are more frequent in urban areas than any other place on earth and these interactions impact human health safety and welfare in both positive and negative ways Although urban wildlife control pest species pollinate plants and are fun to watch they also damage property spread disease and even attack people and pets In urban areas the combination of dense human populations buildings impermeable surfaces introduced vegetation and high concentrations of food water and pollution alter wildlife populations and communities in ways unseen in more natural environments For these ecological and practical reasons researchers and managers have shown a growing interest in urban wildlife ecology and management This growing interest in urban wildlife has inspired many studies on the subject that have yet to be synthesized in a cohesive narrative Urban Wildlife Theory and Practice fills this void by synthesizing the latest ecological and social knowledge in the subject area into an interdisciplinary and practical text This volume provides a foundation for the future growth and understanding

of urban wildlife ecology and management by Clearly defining the concepts used to study and describe urban wildlife
Offering a cohesive understanding of the coupled natural and social drivers that shape urban wildlife ecology
Presenting the patterns and processes of wildlife response to an urbanizing world and explaining the mechanisms behind them and
Proposing means to create physical and social environments that are mutually beneficial for both humans and wildlife

Guerrilla Gardening David Tracey, 2007-04-01 The term guerrilla may bring to mind a small band of armed soldiers moving in the dead of night on a stealth mission In the case of guerrilla gardening the soldiers are planters the weapons are shovels and the mission is to transform an abandoned lot into a thing of beauty Once an environmentalist's nonviolent direct action for inner city renewal this movement is spreading to all types of people in cities around the world These modern day Johnny Appleseeds perform random acts of gardening often without permission Typical targets are vacant lots railway land underused public squares and back alleys The concept is simple whimsical and has the cheeky appeal of being a not quite legal call to action Dig in some soil plant a few seeds or mend a sagging fence one good deed inspiring another with win win benefits all around Guerrilla Gardening outlines the power to the people campaign for greening our cities Tips for effective involvement include Finding plants and seeds cheap or free Handling city officials Getting the dirt on soil Planting to bring back the birds Knowing when to ask first Social activists city dwellers and longtime gardeners will delight in this fast paced and funny call to arms David Tracey is a journalist and environmental designer who operates EcoUrbanist in Vancouver He is executive director of Tree City Canada a nonprofit ecological engagement group
