Language and Reality Sydney Lamb, 2004-06-15 Language and Reality presents selected writings of Professor Sydney M Lamb including six new works and several which have been re worked for publication here Although he is a leading figure in linguistic science many of the papers are far from well known some of them having appeared in more obscure venues of publication and for the most part unavailable to the wider linguistic community The book is divided into four parts the first of which includes papers offering insight into the man behind this pioneering approach to doing linguistics that might best be summed up as linguistics to the beat of a different drummer The papers in Part II explore the theoretical origins of Lamb's ideas about language that have often been described as ahead of their time Part III includes more recent writings outlining work done in Neurocognitive Linguistics Studies of the interconnectedness of language with other kinds of human experience and with history are presented in Part IV

A Discourse Analysis of Habakkuk David J. Fuller, 2019-10-21 Habakkuk is unique amongst the prophetic corpus for its interchange between YHWH and the prophet Many open research questions exist regarding the identities of the antagonists throughout and the relationships amongst the different sections of the book In *A Discourse Analysis of Habakkuk* David J Fuller develops a model for discourse analysis of Biblical Hebrew within the framework of Systemic Functional Linguistics The analytical procedure is carried out on each pericope of the book separately and then the respective results are compared in order to determine how the successive speeches function as responses to each other and to better understand changes in the perspectives of the various speakers throughout

World Englishes: A Critical Analysis Mario Saraceni, 2015-02-26

Winner of the BAAL Book Prize 2016 The field of World Englishes takes on ever more importance in the modern era Mario

Saraceni's *World Englishes: A Critical Analysis* looks at the developments in the field from a critical perspective. It examines the historical, linguistic, ideological and pedagogical aspects in the study of the ever-evolving forms, roles and statuses of English around the world. The principal aim is to offer a critical overview of the field in order both to inform readers about the main issues at stake and to challenge established positions and descriptive analytical paradigms. The book has four sections, each of which reviews established accounts and offers alternative perspectives on those. History considers representations of the evolution of old English and new Englishes and begins to unveil the strong link between conventional accounts and ideological motivations. Language critically examines the traditional notion of difference in the description of varieties of English and discusses more recent orientations which aim to describe English as a lingua franca and the phenomenon of language hybridity. Ideology examines ideological debates around the presence and status of English in the world, such as linguistic imperialism, language ownership and language ecology. The final section, Pedagogy, discusses pedagogical implications such as the choice of appropriate models of English and considers the possibility of teaching English as a fully de-anglicised language.

Languaging Diversity Giuseppe Balirano, 2015-04-01

Languaging Diversity: Identities, Genres, Discourses is a suggestive title for another book in the field of linguistics, but what does it actually mean? By choosing to speak of Languaging Diversity and not just of difference, otherness, varieties, multiplicity, hybridity or alterity, the editors cover the whole range of meanings in the entire field of diversity. They do not wish to limit themselves by using such specific words with increasingly specialised connotations as Alterity or Other, but rather to allow an eclectic range of perspectives and issues to come to the fore. This volume brings together some of the manifold discourses emerging as bearers of the values of alterity by exploring the thorny relationship between Language and Diversity. Drawing on the crucial assumption that speakers' identities are dynamically negotiated as discourse unfolds, *Languaging Diversity* explores the wide theme of identity in discourse, an area of investigation which has become increasingly popular in recent years. A key theme in assembling this volume was that the relationship between diversity and identity cannot be alienated from the factual distribution of material resources in society. All contributions in the volume are carefully selected and peer-reviewed; at least partially react to such critical scenery in order to explore the topics surrounding the modes in which diversity is linguistically articulated by and in discourse. The various studies deal with how individuals draw on linguistic resources to achieve, maintain or challenge representations pertaining to their cultural, social, ethnic, sexual, gender, professional or institutional identities. The volume comprises six sections: In the News, In Politics, Constructing Identities Across Generations and Generations, Ethnicities and Popularising Ideas. Each section reflects the choice of the various topics through the employment of a variety of methodologies and a variety of theoretical frameworks. As such, this volume is an innovative attempt to challenge the present-day underpinnings of diversity studies.
