Bilingual Language Development: The Role of Dominance Cornelia Hamann, Esther Rinke, Dobrinka Genevska-Hanke, 2019-09-20 It has long been established that bilingual speakers are rarely balanced in their languages so that one language is dominant The contributions to the Research Topic Bilingual Language Development The Role of Dominance focus on the potential effects of language dominance on the competence and processing of bilinguals covering a large variety of language combinations and domains Important aspects of such work are the interplay of L1 maintenance attrition and possible L2 dominance the direction of cross linguistic influence CLI or code mixing as well as the effects of bilingualism on cognitive development each addressed in several contributions However such research presupposes a definition of dominance which is far from being settled This gives rise to considerable differences in the operationalization of the concept across studies The studies in this Research Topic present a multifaceted picture of the role of language dominance for L1 maintenance attrition L2 development and CLI Though a unified story cannot emerge for such a complex subject interesting new venues are explored including the impact of dominance shift during L1 re exposure comparisons of different types of bilingual groups or operationalization of dominance through experiential measures The variety of approaches and results is in part owed to the many language combinations studied and the fact that bilingual children adults and atypical speakers are investigated This diversity constitutes the interest of this Research Topic

Behavioral and Neurophysiological Approaches to Code-Switching and Language Switching Jeanine

Treffers-Daller, Esther Ruigendijk, Julia Elisabeth Hofweber, 2021-05-03 **Gender Acquisition in Spanish** Jessica Diebowski, 2021-04-06 The comparative investigation of the acquisition of gender in Spanish by early and late bilinguals of different language combinations is highly debated and crucial as the phenomenon of gender involves grammatical features that differ in all three languages under investigation Against this background both early and late bilinguals face an arduous learning task which differs in complexity Couched within a generative framework the empirical study focuses on 257 participants with different levels of proficiency in Spanish ranging from low to advanced and through a series of tests aims to discover which extra linguistic and intra linguistic factors act as triggers for non native outcomes in adult heritage speakers and L2 learners The observed morphological variability is argued not to stem from a representational i e syntactic deficit but rather from a mapping problem in L2 learners and heritage speakers Successful attainment in terms of gender is possible but dependent on the interplay between various extralinguistic and linguistic factors **The Gifted Language Learner** Alene Moyer, 2021-06-24 If language learning is self initiated and self regulated can anyone become native like in a new language or are special gifts necessary **Exploring Cross-linguistic Effects and Phonetic Interactions in the Context of Bilingualism** Mark Amengual, 2021-07-21 This Special Issue includes fifteen original state of the art research articles from leading scholars that examine cross linguistic influence in bilingual speech These experimental studies contribute to the growing number of studies on multilingual phonetics and phonology by introducing novel empirical data collection techniques sophisticated methodologies and acoustic analyses while also presenting findings that provide robust theoretical implications to a variety of subfields such as L2 acquisition L3 acquisition laboratory phonology acoustic phonetics psycholinguistics sociophonetics blingualism and language contact These studies in this book further elucidate the nature of phonetic interactions in the context of bilingualism and multilingualism and outline future directions in multilingual phonetics and phonology research *Heritage Languages at the Crossroads: Cultural Contexts, Individual Differences, and Methodologies* Brechje Antonet Van Osch, Alicia Luque, Jason Rothman, Selim Tiryakiol, Nadine Kolb, 2025-02-10 This Research Topic focuses on heritage languages at the crossroads by approaching heritage language bilingualism in an interdisciplinary way A language qualifies as a heritage language if it is a minority language spoken at home in a majority language context Any language can be the societal majority language in one context and the heritage language in another While the number of empirical studies on language acquisition and processing in heritage language bilingualism has increased in recent years heritage language bilinguals are an understudied subgroup of bilinguals When examined as adults heritage speaker bilinguals tend to show significant differences in their heritage language performance use and competence grammatical knowledge from one another This variation is particularly unusual because heritage speakers like monolinguals are native speakers of the heritage language **The Cambridge Handbook of Bilingualism** Annick De Houwer, Lourdes Ortega, 2018-11-15 The ability to speak two or more languages is a common human experience whether for children born into

bilingual families young people enrolled in foreign language classes or mature and older adults learning and using more than one language to meet life's needs and desires This Handbook offers a developmentally oriented and socially contextualized survey of research into individual bilingualism comprising the learning use and as the case may be unlearning of two or more spoken and signed languages and language varieties A wide range of topics is covered from ideologies policy the law and economics to exposure and input language education measurement of bilingual abilities attrition and forgetting and giftedness in bilinguals Also explored are cross and intra disciplinary connections with psychology clinical linguistics second language acquisition education cognitive science neurolinguistics contact linguistics and sign language research

The Oxford Handbook of Language Attrition Monika S. Schmid, Barbara Köpke, 2019-07-17 This volume is the first handbook dedicated to language attrition the study of how a speaker's language may be affected by crosslinguistic interference and non use The effects of language attrition can be felt in all aspects of language knowledge processing and production and can offer unique insights into the mind of bilingual language users In this book international experts in the field explore a comprehensive range of topics in language attrition examining its theoretical implications psycho and neurolinguistic approaches linguistic and extralinguistic factors L2 attrition and heritage languages The chapters summarize current research and draw on insights from related fields such as child language development language contact language change pathological developments and second language acquisition

Studies in Turkish as a Heritage Language Fatih Bayram, 2020-11-15 Heritage language bilingualism refers to contexts where a minority language spoken at home is one of the first native languages of an individual who grows up and typically becomes dominant in the societal majority language Heritage language bilinguals often wind up with grammatical systems that differ in interesting ways from dominant native speakers growing up where their heritage language is the majority one Understanding the trajectories and outcomes of heritage language bilingual grammatical competence performance language usage patterns identities and more related topics sits at the core of many research programs across a wide array of theoretical paradigms The study of heritage language bilingualism has grown exponentially over the past two decades This expansion in interest has seen in parallel extensions in methodologies applied bridges built between closely related fields such as the study of language contact and linguistic attrition As is typical in linguistics not all languages are studied to the same degree The present volume showcases what Turkish as a heritage language brings to bear for key questions in the study of heritage language bilingualism and beyond In many ways Turkish is an ideal language to be studied because of its large diaspora across the world in particular Europe The papers in this volume are diverse from psycholinguistic to ethnographic to classroom based studies featuring Turkish as a heritage language Together they equal more than their subparts leading to the conclusion that understudied

heritage languages like Turkish provide missing pieces to the puzzle of understanding the variables that give rise to the continuum of outcomes characteristic of heritage language speakers

Intonation in Language Contact Jonas Grünke, 2024-11-15 The intense language contact between Spanish and Catalan in Catalonia has led to cross linguistic influence at all linguistic levels but its effect on the prosody of these languages has received little attention to date Based on semi spontaneous and read speech data from 31 Catalan Spanish bilinguals this book provides a comprehensive analysis of the intonation of Spanish and Catalan as spoken in Girona with a focus on the speakers bilingualism These contact varieties share numerous intonational properties with differences mainly in the frequency of specific tunes in certain contexts However they also exhibit significant variation often linked to extralinguistic factors such as the bilinguals language dominance Overall the intonation of these contact varieties results from substratum transfer and wholesale convergence between the prosodic systems of Spanish and Catalan The book is particularly relevant to scholars researching prosody language contact variation and multilingualism
