**Language, Metaphysics, and Death** John Donnelly, 1986      Language, Metaphysics, and Death John Donnelly, 1978  
*Politics, Metaphysics, and Death* Andrew Norris, 2005-07-11 A collection of essays by political theorists on Agamben's Homo Sacer      **Language and Death** Giorgio Agamben, 2006 Explores the symbiosis of philosophy and literature in understanding negativity      **Death and Mortality in Contemporary Philosophy** Bernard N. Schumacher, 2010-09-30 This book contributes to current bioethical debates by providing a critical analysis of the philosophy of human death Bernard N Schumacher discusses contemporary philosophical perspectives on death creating a dialogue between phenomenology existentialism and analytic philosophy He also examines the ancient philosophies that have shaped our current ideas about death His analysis focuses on three fundamental problems 1 the definition of human death 2 the knowledge of mortality and of human death as such and 3 the question of whether death is nothing to us or on the contrary whether it can be regarded as an absolute or relative evil Drawing on scholarship published in four languages and from three distinct currents of thought this volume represents a comprehensive and systematic study of the philosophy of death one that provides a provocative basis for discussions of the bioethics of human mortality      **Can Death Be a Harm to the Person Who Dies?** J. Li, 2013-03-14 It is with great pleasure that I write this preface for Or Li's book which addresses the venerable and vexing issues surrounding the problem of whether death can be a harm to the person who dies This problem is an ancient one which was raised long ago by the early Greek philosopher Epicurus who notoriously argued that death is at no time a harm to its victim because before death there is no harm and after death there is no victim Epicurus's conclusion is conspicuously at odds with our prereflective and in most cases our post reflective intuitions and numerous strategies have therefore been proposed to refute or avoid the Epicurean conclusion that death cannot be an evil after all How then are we to account for our intuition that death is not just an evil but perhaps the worst evil that may befall us This is the key issue that Or Li addresses Or Li's book explores various alternative approaches to the complex and difficult issues surrounding Epicurus's notorious argument and provides a defence of the intuitively plausible conclusion that death can indeed be a harm to the person who dies This challenge to Epicurus's claim that death is never a harm to the person who dies is developed by way of a detailed exploration of the issues raised not only by Epicurus but also by his many successors who have responded variously to the challenging issues which Epicurus raised      Confrontations with the Reaper Fred Feldman, 1994-01-13 What is death Do people survive death What do we mean when we say that someone is dying Presenting a clear and engaging discussion of the classic philosophical questions surrounding death this book studies the great metaphysical and moral problems of death In the first part Feldman shows that a definition of life is necessary before death can be defined After exploring several of the most plausible accounts of the nature of life and demonstrating their failure he goes on to propose his own conceptual scheme for death and related concepts In the second part Feldman turns to ethical and value theoretical

questions about death Addressing the ancient Epicurean ethical problem about the evil of death he argues that death can be a great evil for those who die even if they do not exist after death because it may deprive them of the goods they would have enjoyed if they had continued to live Confrontations with the Reaper concludes with a novel consequentialist theory about the morality of killing applying it to such thorny practical issues as abortion suicide and euthanasia **Philosophers' Poets**

David Wood,2024-05-01 First published in 1990 Philosophers Poets is a collection of case studies of philosophers readings of poets and other distinctive writers There are those for example who find in literary examples ways of exploring the concrete significance of philosophical assertions or distinctions Others find in poetic discourse linguistic resources simply not available to philosophy yet of vital importance to it This is particularly true of philosophers of the limit such as Heidegger Derrida Levinas and Adorno for whom the very possibility of philosophy was in question Despite the diversity of subjects covered the collection maintains an integrity and identity Above all it shows how contemporary Continental philosophy raises the issue of philosophy and literature anew in a way that is appealing and challenging The Contribution of Natural Law

Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Euthanasia Craig Paterson,2010-05-13 **The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and**

**Voluntary Euthanasia** Craig Paterson,2001 *The Philosophy and Practice of Medicine and Bioethics* Barbara Maier,Warren A. Shibbes,2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one s thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc **Life, Death, & Meaning** David Benatar,2010 Do our lives have meaning Should we create more people Is death bad Should we commit suicide Would it be better to be immortal Should we be optimistic or pessimistic Since

Life Death and Meaning Key Philosophical Readings on the Big Questions first appeared David Benatar s distinctive

anthology designed to introduce students to the key existential questions of philosophy has won a devoted following among users in a variety of upper level and even introductory courses While many philosophers in the continental tradition \_those known as existentialists \_have engaged these issues at length and often with great popular appeal English speaking philosophers have had relatively little to say on these important questions Yet the methodology they bring to philosophical questions can and occasionally has been applied usefully to existential questions This volume draws together a representative sample of primarily English speaking philosophers reflections on life s big questions divided into six sections covering 1 the meaning of life 2 creating people 3 death 4 suicide 5 immortality and 6 optimism and pessimism These key readings are supplemented with helpful introductions study questions and suggestions for further reading making the material accessible and interesting for students In short the book provides a singular introduction to the way that philosophy has dealt with the big questions of life that we are all tempted to ask

**100 Years of ›Tractatus Logico-Philosophicus‹ - 70 Years after Wittgenstein's Death** Esther Heinrich-Ramharter, Alois Pichler, Friedrich Stadler, 2025-04-21 This volume covers the origin interpretations

and reception of Wittgenstein's *Tractatus Logico Philosophicus* and offers a critical assessment of the related research and contemporary historiography. The authors deal with an evaluation of research on Wittgenstein's philosophy, life and work as well as of the editions of his work published since his death. This includes upcoming editions with a special focus on the availability of Wittgenstein's digital Nachlass. Special attention is given to the reception of and references to the *Tractatus* in the middle and later Wittgenstein as well as the reception by other philosophers. Moreover, open philosophical, ethical and unresolved scientific questions are addressed with a critical investigation of current research. Furthermore, the complex, diverse and mutual relation of Wittgenstein and the Vienna Circle of Moritz Schlick, Otto Neurath, Friedrich Waismann and others are addressed.

*Death and Dying* Timothy D. Knepper, Lucy Bregman, Mary Gottschalk, 2019-09-02. The medicalization of death is a challenge for all the world's religious and cultural traditions. Death's meaning has been reduced to a diagnosis, a problem rather than a mystery for humans to ponder. How have religious traditions responded? What resources do they bring to a discussion of death's contemporary dilemmas? This book offers a range of creative and contextual responses from a variety of religious and cultural traditions. It features 14 essays from scholars of different religious and philosophical traditions who spoke as part of a recent lecture and dialogue series of Drake University's The Comparison Project. The scholars represent ethnologists, medical ethicists, historians, philosophers and theologians, all facing up to questions of truth and value in the light of the urgent need to move past a strictly medicalized vision. This volume serves as the second publication of The Comparison Project, an innovative new approach to the philosophy of religion housed at Drake University. The Comparison Project organizes a biennial series of scholar lectures, practitioner dialogues and comparative panels about core cross-cultural topics in the philosophy of religion. The Comparison Project stands apart from traditional theistic approaches to the philosophy of religion in its commitment to religious inclusivity. It is the future of the philosophy of religion in a diverse global world.
