Language Of The Earth A Literary Anthology:

Language of the Earth Frank H. T. Rhodes, Richard O. Stone, Bruce D. Malamud, 2011-08-26 Man's complex relationship to planet Earth is explored in this second edition of the landmark anthology edited by Frank Rhodes and Bruce Malamud. This volume provides a portrait of the planet as experienced not just by scientists but by artists, aviators, poets, philosophers, novelists, historians, and sociologists as well. A unique collection that bridges the gap between science and humanities. Contains writings by scientists, artists, aviators, poets, philosophers, novelists, historians, and sociologists including Charles Darwin, Dane Picard, Rachel Carson, John Muir, Mark Twain, and Archibald Geikie. Represents the human experience over the centuries covering a span of 2,500 years. Reflects the planet's extraordinary physical diversity. The previous edition was voted one of the 25 Great Books of Geology by readers of the *Journal of Geological Education*; this is a very worthwhile read with something for everyone interested in geography, earth systems, and geology, natural history, or the general environment.

Robert A. Francis, King's College London, *Progress in Physical Geography*. *The Sixth Extinction* Elizabeth Kolbert, 2014-02-11. ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR. A major book about the future of the world blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes. Over the last half a billion years, there have been five mass extinctions when the diversity of life on Earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In *The Sixth Extinction*, two-time winner of the National Magazine Award and *New Yorker* writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamanian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as a concept from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy, as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.

Ecological Literature and the Critique of Anthropocentrism Bryan L. Moore, 2017-10-14. This book is an analysis of literary texts that question, critique, or subvert anthropocentrism, the notion that the universe and everything in it exists for humans. Bryan Moore examines ancient Greek and Roman texts, medieval to twentieth-century European texts, eighteenth-century French philosophy, early to contemporary American texts, and poetry and science fiction to demonstrate a historical basis for the questioning of anthropocentrism and contemplation of responsible environmental stewardship in the twenty-first century and beyond. *Ecological Literature and the Critique of Anthropocentrism* is essential

Speaking the Earth's Languages brings together for the first time critical discussions of postcolonial poetics from Australia and Chile The book crosses multiple Languages landscapes and disciplines and draws on a wide range of both oral and written poetries in order to make strong claims about the importance of a nomad poetics not

only for understanding Aboriginal or Mapuche writing practices but more widely for the problems confronting contemporary literature and politics in colonized landscapes The book begins by critiquing canonical examples of non indigenous postcolonial poetics Incisive re readings of two icons of Australian and Chilean poetry Judith Wright 1915 2000 and Pablo Neruda 1904 1973 provide rich insights into non indigenous responses to colonization in the wake of modernity The second half of the book establishes compositional links between Aboriginal and Mapuche poetics and between such oral and written poetics more generally The book s final part develops an emerging synthesis of contemporary Aboriginal and Mapuche poetics with reference to the work of two of the most important avant garde Aboriginal and Mapuche poets of recent times Lionel Fogarty 1958 and Paulo Huirimilla 1973 Speaking the Earth s Languages uses these fascinating links between Aboriginal and Mapuche poetics as the basis of a deliberately nomadic open ended theory for an Australian Chilean postcolonial poetics The central argument of this book the author writes is that a nomadic poetics is essential for a genuinely postcolonial form of habitation or a habitation of colonized landscapes that doesn t continue to replicate colonialist ideologies involving indigenous dispossession and environmental exploitation American Paleontologist, 2008 National Defense Language Development Research and Studies United States. Division of Higher Education, 1960 *This Earth, That Sky* Manuel Bandeira, 2024-06-28 This is a generous long overdue presentation of the major Brazilian poet Manuel Bandeira 1886 1968 to the English speaking reader Well over a hundred poems appear here in both Portuguese and English together with a critical overview that introduces the poet and Brazilian poetry to the nonspecialist and contributes significantly to the existing body of Bandeira scholarship Bandeira's poetry not only stands among the most important in twentieth century Brazil but also embodies the experience of transition from one literary movement to another The poems span a half century of writing from the publication of Bandeira's first book in 1917 to the definitive edition of his collected work in 1966 Because critics agree that the poet's most influential creative efforts began in 1930 with the

publication of *Libertinagem* *Libertinism* the collection concentrates on the later period A smaller number of poems drawn from the three books published before this date provide a useful basis for comparison Candace Slater's fine versions of the poems are augmented by a translator's note that considers Bandeira's poetic language in terms of the particular challenges it offers the translator into English Her introduction offers a fresh and comprehensive look at the poet whose artistic transformation from nineteenth century modes of expression to experimental twentieth century Modernism paralleled the transformation of his country It focuses on the poet's continuing alternation between an acceptance of if not allegiance to the material world and a desire for something more This fundamental though often subtle opposition is reflected in the title *This Earth That Sky* This title is part of UC Press's *Voices Revived* program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 *The Oxford Handbook of Classical Chinese Literature* Wiebke Denecke, Wai-Yee Li, Xiaofei Tian, 2017-03-21 This volume introduces readers to classical Chinese literature from its beginnings ca 10th century BCE to the tenth century CE It asks basic questions such as How did reading and writing practices change over these two millennia How did concepts of literature evolve What were the factors that shaped literary production and textual transmission How do traditional bibliographic categories modern conceptions of genre and literary theories shape our understanding of classical Chinese literature What are the recurrent and evolving concerns of writings within the period under purview What are the dimensions of human experience they address Why is classical Chinese literature important for our understanding of pre modern East Asia How does the transmission of this literature in Japan Korea and Vietnam define cultural boundaries And what in turn can we learn from the Chinese style literatures of Japan Korea and Vietnam about Chinese literature In addressing these questions the *Oxford Handbook of Classical Chinese Literature* departs from standard literary histories and sourcebooks It does not simply categorize literary works according to periods authors or texts Its goal is to offer a new conceptual framework for thinking about classical Chinese literature by defining a four part structure The first section discusses the basics of literacy and includes topics such as writing systems manuscript culture education and loss and preservation in textual transmission It is followed by a second section devoted to conceptions of genre textual organization and literary signification throughout Chinese history A third section surveys literary tropes and themes The final section takes us beyond China to the surrounding cultures that adopted Chinese culture and produced Chinese style writing adapted to their own historical circumstances The volume is sustained by a dual foci the recuperation of historical perspectives for the period it surveys and the attempt to draw connections between past and present demonstrating how the viewpoints and information in this volume yield insights into modern China and east Asia **The Penguin Book of Poems on the Indian City** Bilal Moin, 2025-05-30 From Ghalib's Delhi and Nissim Ezekiel's Bombay to Agha Shahid Ali's Srinagar
