Language And Conceptualization Language Culture And Cognition:

Language and Conceptualization Jan Nuyts, Eric Pederson, 1999 To what extent is conceptualisation based on linguistic representation And to what extent is it variable across cultures communities or even individuals Of crucial importance in the attempt to develop a comprehensive theory of human cognition these remain amongst the most difficult of questions in the cognitive sciences This volume brings together ten new contributions from leading scholars working in a wide cross section of disciplines including linguistics anthropology psychology and philosophy

Approaches to Language, Culture, and Cognition M. Yamaguchi, D. Tay, B. Blount, 2014-08-28 Approaches to Language Culture and Cognition aims to bring cognitive linguistics and linguistic anthropology closer together calling for further investigations of language and culture from cognitively informed perspectives against the backdrop of the current trend of linguistic anthropology

Event Representation in Language and Cognition Jürgen Bohnemeyer, Eric Pederson, 2010-12-23 Event Representation in Language and Cognition examines new research into how the mind deals with the experience of events Empirical research into the cognitive processes involved when people view events and talk about them is still a young field The chapters by leading experts draw on data from the description of events in spoken and signed languages first and second language acquisition co speech gesture and eye movements during language production and from non linguistic categorization and other tasks The book highlights newly found evidence for how perception thought and language constrain each other in the experience of events It will be of particular interest to linguists psychologists and philosophers as well as to anyone interested in the representation and processing of events

Inner Worlds Albert Kamp, 2021-11-22 In the dynamic interchange between authors texts and readers that occurs during the reading process readers are stimulated by the author to create complex inner representations of the reality presented in a text The cognitive linguistic approach outlined in the first part of Inner Worlds offers a set of analytical tools that can be instructively applied to the book of Jonah to examine how the text presents its own reality to the reader Retranslated with an eye to the distinct nuances in the Hebrew the text of Jonah reveals a range of suggestive dynamic patterns that show the irony of Jonah s limited perspectives on his misfortunes compared with the transcendent perspective of a gracious God

Constructions in Cognitive Contexts Franziska Günther, 2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language

perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities

Culture, Body, and Language Farzad Sharifian, René Dirven, Ning Yu, Susanne Niemeier, 2008-11-03 One of the central themes in cognitive linguistics is the uniquely human development of some higher potential called the mind and more particularly the intertwining of body and mind which has come to be known as embodiment Several books and volumes have explored this theme in length However the interaction between culture body and language has not received the due attention that it deserves Naturally any serious exploration of the interface between body language and culture would require an analytical tool that would capture the ways in which different cultural groups conceptualize their feelings thinking and other experiences in relation to body and language A well established notion that appears to be promising in this direction is that of cultural models constituting the building blocks of a group's cultural cognition The volume results from an attempt to bring together a group of scholars from various language backgrounds to make a collective attempt to explore the relationship between body language and culture by focusing on conceptualizations of the heart and other internal body organs across a number of languages The general aim of this venture is to explore the ways in which internal body organs have been employed in different languages to conceptualize human experiences such as emotions and or workings of the mind and b the cultural models that appear to account for the observed similarities as well as differences of the various conceptualizations of internal body organs The volume as a whole engages not only with linguistic analyses of terms that refer to internal body organs across different languages but also with the origin of the cultural models that are associated with internal body organs in different cultural systems such as ethnomedical and religious traditions Some contributions also discuss their findings in relations to some philosophical doctrines that have addressed the relationship between mind body and language such as that of Descartes

The Routledge Handbook of Language and Culture Farzad Sharifian, 2014-12-17 The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks This Handbook features thirty three newly commissioned chapters which cover key areas such as cognitive psychology cognitive linguistics cognitive anthropology linguistic anthropology cultural anthropology and sociolinguistics offer insights into the historical development contemporary theory research and practice of each topic and explore the potential future directions of the field show readers how language and culture research can be of practical benefit to applied areas of research and practice such as intercultural communication and second language teaching and learning Written by a group of prominent scholars from around the globe The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area

Cognitive Approaches to Tense, Aspect, and Epistemic Modality Adeline Patard, Frank

Brisard,2011 This volume addresses problems of semantics regarding the analysis of tense and aspect TA markers in a variety of languages including Arabic Croatian English French German Russian Thai and Turkish Its main interest goes out to epistemic uses of such markers whereby epistemic modality is understood as indicating a degree of compatibility between the modal world and the factual world Declerck All contributions moreover tackle these problems from a more or less cognitive point of view with some of them insisting on the need to provide a unifying explanation for all usage types temporal and non temporal and all of them accepting the premise that the semantics of TA categories essentially refers to subjective rather than objective concerns The volume also represents one of the first attempts to gather accounts of TA marking in various languages that are explicitly set within the framework of Cognitive Grammar Ultimately this volume aims to contribute to establishing an awareness that modal meaning elements are directly relevant to the analysis of the grammar of time

Cognitive Grammar Ronald W. Langacker,2008-02-04 This lucid and authoritative introduction to Cognitive Grammar presents the theory and its rationale in careful systematic detail Its application to central domains of language structure makes a compelling case that grammar is inherently meaningful The book holds great interest for linguists linguistics students and professionals in related disciplines

Ten Lectures on the Elaboration of Cognitive Grammar Ronald Langacker,2017-07-31 This book reviews the basic claims and descriptive constructs of Cognitive Grammar outlines major themes in its ongoing development and applies these notions to central problems in grammatical analysis The initial review covers conceptual semantics the conceptual characterization of grammatical categories grammatical constructions and the architecture of a unified theory of language structure Main themes in the framework s development include the dynamicity of language structure grammar as the implementation of semantic functions systems of opposing elements to serve those functions and organization in strata representing successive elaborations of a baseline structure The descriptive application of these notions centers on nominal and clausal structure with special emphasis on nominal grounding

Cognitive Approaches to English Mario Brdar,Marija Omazić,Višnja Pavičić Takač,2009-12-14 The present volume contains a selection of papers presented at the conference Cognitive Approaches to English an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy Josip Juraj Strossmayer University Osijek which was held in Osijek on October 18 19 2007 The participants were invited to discuss issues in cognitive accounts of English ranging from fundamental to methodological to interdisciplinary and applied The volume is accordingly divided into four parts Part I Motivation in grammar deals with various phenomena in the grammar of English in the broadest sense of the term all of which are shown to be motivated by metaphorical and or metonymic operations Part II Constructing meaning between grammar and lexicon contains five chapters dealing with phenomena ranging from various peculiarities of form meaning pairings such as synonymy polysemy and figurative meanings to concept formation The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural variation in the use of metaphorical and

metonymic processes The volume is concluded by Part IV the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view **Language in Development** Gita Martohardjono, Suzanne Flynn, 2021-08-17

Explorations of language development in different types of learner populations and across various languages This volume examines language development in different types of learner populations and across various languages The contributors analyze experimental studies of child and adult language acquisition heritage language development bilingualism and language disorders They consider theoretical and methodological issues language development in children discussing topics that range from gestures to errors in person and number agreement and development and attrition of morpho syntactic constructions in second language learners bilinguals and Alzheimer s patients The approach is crosslinguistic in three senses of the word the contributors offer analyses of acquisition phenomena in different languages they consider crosslinguistic influence or the potential effects of multiple languages on one another in the mind of the same speaker and in a novel use of the term proposed by the editors the chapters bring together theoretical and methodological approaches pertinent to the linguistics of language development in children adults and heritage speakers *The Handbook of Cultural Linguistics*

Alireza Korangy, 2024-05-31 Bringing together a wide selection of work on cultural linguistics and pragmatics this comprehensive handbook offers global comparative insights into the field Diversity does not always imply differences but it also offers insights into surprising similarities and parallels when it comes to expressions By the same token this collection shows that when we see that linguistic differences when they exist stem from not merely language but from the cultural and historical context that cultivates and nurtures them Within that paradigm then this handbook locates the importance of philosophy religion or even the lack thereof political affiliations and so on in forming expressions In addition comparisons with other models of cultural linguistics are undertaken These trends provide readers with a comprehensive introduction to issues in cultural linguistics addressing the peculiarities of the field under the rubric of localized studies and speaking to the possibilities that exist in interpretation of what metaphors are The book highlights the complexities that are so tightly interwoven into the fabric of every word and a sentence across cultures and linguistic traditions A must have collection for anthropologists philosophers linguists philologists theoreticians rhetoricians and scholars of poetics this is the one stop reference in cultural linguistics Cultural Linguistics and ELT Curriculum Minoo Alemi, Zia Tajeddin, 2025-10-10 This book

accumulates analyses and evaluation evidence about the cultural conceptualizations in English language teaching ELT textbooks framed by cultural linguistics It considers conceptualizations of cultural constructs such as family gender beauty and the home within ELT curricula Despite the strength of cultural linguistics as a theoretical and analytical movement few volumes in applied linguistics have sought to provide data based evidence about the application of cultural linguistics to language teaching curricula The volume addresses recent issues in cultural linguistics and presents the associated implications for curriculum planning materials development and textbook evaluation The aim of the volume is to enhance

understanding of ELT curricula through a cultural linguistics lens Relevant to cultural theorists education experts working in ELT and linguists in all language areas this is a landmark volume marrying applied linguistics to cultural linguists in English language education studies **Substrate and Adstrate** Micah Corum,2015-04-24 This volume provides a large scale in depth analysis of locative structures in Nigerian Pidgin and Ghanaian Pidgin English and compares those structures to locatives in their lexifier substrate and adstrate languages The work draws on new research methods for investigating substrate and adstrate influence in semantics and creole genesis **Space and Time in Languages and Cultures** Luna Filipovi?,Kasia M. Jaszczolt,2012-07-24 This is an interdisciplinary volume that focuses on the central topic of the representation of events namely cross cultural differences in representing time and space as well as various aspects of the conceptualisation of space and time It brings together research on space and time from a variety of angles both theoretical and methodological Crossing boundaries between and among disciplines such as linguistics psychology philosophy or anthropology forms a creative platform in a bold attempt to reveal the complex interaction of language culture and cognition in the context of human communication and interaction The authors address the nature of spatial and temporal constructs from a number of perspectives such as cultural specificity in determining time intervals in an Amazonian culture distinct temporalities in a specific Mongolian hunter community Russian specific conceptualisation of temporal relations Seri and Yucatec frames of spatial reference memory of events in space and time and metaphorical meaning stemming from perception and spatial artefacts to name but a few themes The topic of space and time in language and culture is also represented from a different albeit related point of view in the sister volume Space and Time in Languages and Cultures Linguistic diversity HCP 36 which focuses on the language specific vis vis universal aspects of linguistic representation of spatial and temporal reference **Ten Lectures on Language, Culture and Mind** Chris Sinha,2017-08-28 In this interdisciplinary collection of lectures Chris Sinha presents an overview of topics ranging from language in children s play through cultural conceptualizations of time to philosophical and linguistic relativism The intertwining of the evolutionary and individual time scales of human development is a key theme unifying the lectures as is the fundamentally cultural nature of language and cognition Familiar topics in cognitive linguistics such as spatial semantics and conceptual blending are addressed from these cultural comparative and developmental perspectives Chris Sinha also discusses the psychological roots of key concepts in cognitive linguistics and sets out a biocultural approach to language evolution Learning and Cognition Vibeke Grøver Aukrust,2011-02-17 This collection of 58 articles from the recently published third edition of the INTERNATIONAL ENCYCLOPEDIA OF EDUCATION focus on learning memory attention problem solving concept formation and language Learning and cognition is the foundation of cognitive psychology and encompasses many topics including attention memory categorization etc Most books in the area either focus on one subtopic in depth e g an entire book on memory or cover the gamut of subjects in a series of long technical handbook like chapters This concise reference offers

researchers and professors teaching in the area a new take on the material that is comprehensive in breadth but lighter in depth focusing on main findings established facts and minimizing the amount of space taken up by large multi volume references An introduction to a complex field via summaries of main topics in this discipline Contains contributions from the foremost international researchers in the field Makes content available to individual cognitive psychology researchers
