seventeenth and eighteenth as well as the nineteenth and early twentieth centuries He also provides an intellectual history that travels across multiple disciplinary territories in addition to literary criticism and literary history classical studies comparative philology historiography and political thought Against this background The Classic maps the evolution of Sainte Beuve's thought from an initially cosmopolitan conception of the classic close in spirit to Goethe's notion of Weltliteratur to an increasingly nationalist conception with a strong emphasis on the heritage of Latinity and France as its principal legatee This emphasis was taken up by the extreme right in France after Sainte Beuve's death in a determined mobilizing of a version of the classic on behalf of a proto fascist agenda The final chapter deals with this appropriation and ends with a question of our own about Sainte Beuve's original question in the light of this bleak history perhaps the time has come to dispense with the term classic altogether
