Cornerstones of Georgia History is especially suited for classroom use but it provides any concerned citizen of the state with a historical basis on which to form relevant and independent opinions about Georgia's present day challenges

The Jet Race and the Second World War S. Mike Pavelec, 2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec's analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport

Technological Innovation and the Rise of Aviation, 1903-1941 Charles J. Gross, 2024-12-30 This book provides an overview of American aviation from 1903 to 1941 covering major developments in aviation technology It focuses on the role of the military and selected firms Under the fiscal constraints imposed by the post war military drawdown and the Great Depression the US military sacrificed quantity aircraft procurement for gains in quality Until foreign powers began huge rearmament programs US military aircraft were some of the most advanced in the world They held numerous international performance records before the US fell behind other powers that had gone on a war footing It offers new insights into the contributions of immigrants and foreign technologies to American aviation while examining the relationship between the government and the aviation industry It also highlights factors that enabled America to field some of the war's most advanced warplanes which ultimately helped win the Second World War

Innovation and the Development of Flight Roger D. Launius, 1999 Perhaps no technological development in the century has more fundamentally transformed human life than the airplane and its support apparatus The nature of flight and the activities that it has engendered throughout the world makes the development of aviation technology an important area of investigation Why did aeronautical technology take the shape it did Which individuals and organizations were involved in driving it What factors influenced particular choices of technologies to be used More importantly how has innovation affected this technology Innovation and the Development of Flight a first strike at the new aviation history represents a significant transformation of the field by relating the subject to larger issues of society politics and culture taking a more sophisticated view of the technology that few historians have previously attempted This volume moves beyond a focus on the artifact to emphasize the broader role of the airplane and more importantly the entire technological system This suggests that many unanswered questions are present in the development of modern aviation and that inquisitive

historians seek to know the relationships of technological systems to the human mind Some of the subjects discussed are early aeronautical innovation and government patronage the evolution of relationships among airports cities and industry the relationship of engine development to the entire aviation industry the Department of Commerce s influence on light plane development pressure in the Air Force for the development of jet engines and lessons of the National Aerospace Plane Program Aviation historians and historians of technology will find Innovation and the Development of Flight a valuable examination of aeronautical innovation providing foundations for continued explorations of this field **Pushing the Envelope** Donald M. Pattillo,1998 The most comprehensive history of the aircraft manufacturing industry to date
