Clark, Abby McGehee, 2016-12-05 This collection of essays presents the

exciting and innovative work being done in the field of medieval architectural history by scholars affiliated with AVISTA one of the most active sponsors of such research in the Anglo American scholarly community These studies constitute a snapshot of the range of new interpretive strategies being deployed by researchers in the reassessment of previous scholarship and identification of new modes of inquiry In recent years the study of medieval architecture has been transformed by the emergence of new critical perspectives and new technologies The contributors to this book are among those at the forefront of these developments Several of the essays present dramatic reinterpretations of canonical monuments including the Abbey of Saint Denis Beauvais Cathedral and Notre Dame in Paris Others consider broader methodological issues such as the applications of geometry workshop practice and the shaping of historical narratives Still others demonstrate how high tech scanning and visualization methods can enhance our understanding of construction methods and the behavior of buildings The publication of this collection of pioneering essays should foster further exploration by clarifying the state of research by establishing specific historical arguments and by providing models of inquiry to inspire emerging scholars

L'art Monumental de la France Romane Eliane Vergnolle,2000 The volume explores the evolution of the Corinthian capital sculptural decoration and architectural forms It focuses on the Loire Valley Berry Bourbonnais and Burgundy regions known for their innovative art during the Capetian era *Catalog of the Avery Memorial Architectural Library of Columbia*

University Avery Library,1958 **Legends in Limestone** Linda Seidel,1999-10-15 Whereas twelfth century pilgrims flocked to the church of St Lazare in Autun to visit the relics of its patron saint present day pilgrims journey there to admire its superb sculpture said to have been created by the artist Gislebertus whose name is inscribed above one of the church doors These two cults of sculptor and of saint form points of departure and arrival for Linda Seidel s study *Legends in Limestone* reveals how Gislebertus sculptor was discovered and subsequently sanctified over the course of the last century Seidel makes a compelling case for the identification of the name with an ancestor of the local ducal family invoked for his role in the acquisition of the precious relics With the aid of evidence drawn from the richly carved decoration of the building she demonstrates how medieval visitors would have read a different holy narrative in the church fabric one that constructed before their eyes an account of their patron saint s life *Legends in Limestone* an absorbing study of one of France s most revered medieval monuments provides fresh insights into modern and medieval interpretive practices

Dictionary Catalog of the Art and Architecture Division New York Public Library. Art and Architecture Division,1975 **Queen as King** Therese Martin,2006-10-31 *Queen as King* traces the origins of San Isidoro in Le n as a royal monastic complex following its progress as the site changed from a small eleventh century palatine chapel housed in a double monastery to a great twelfth century pilgrimage church served by Augustinian canons Its most groundbreaking contribution to the history of art is the recovery of the lost patronage of Queen Urraca reigned 1109 1126 Urraca maintained yet subverted her family s tradition of patronage on the site to understand her history is to hold the key to the art and architecture of San Isidoro This

new approach to San Isidoro and its patronage allows a major Romanesque monument to be understood more fully than before

Pygmalion's Power Thomas E. A. Dale, 2020-01-29 Pushed to the height of its illusionistic powers during the first centuries of the Roman Empire sculpture was largely abandoned with the ascendancy of Christianity as the apparent animation of the material image and practices associated with sculpture were considered both superstitious and idolatrous In **Pygmalion's Power** Thomas E A Dale argues that the reintroduction of architectural sculpture after a hiatus of some seven hundred years arose with the particular goal of engaging the senses in a Christian religious experience Since the term Romanesque was coined in the nineteenth century the reintroduction of stone sculpture around the mid eleventh century has been explained as a revivalist phenomenon one predicated on the desire to claim the authority of ancient Rome In this study Dale proposes an alternative theory Covering a broad range of sculpture types including autonomous cult statuary in wood and metal funerary sculpture architectural sculpture and portraiture Dale shows how the revitalized art form was part of a broader shift in emphasis toward spiritual embodiment and affective piety during the late eleventh and twelfth centuries Adding fresh insight to scholarship on the Romanesque **Pygmalion's Power** borrows from trends in cultural anthropology to demonstrate the power and potential of these sculptures to produce emotional effects that made them an important sensory part of the religious culture of the era

Open Access Mickey Abel, 2011-12-08 **Open Access** Contextualizing the Archivolted Portals of Northern Spain and Western France within the Theology and Politics of Entry explores the history development and accrued connotations of a distinctive entry configuration comprised of a set of concentrically stepped archivolt surrounding a deliberate tympanum free portal opening These archivolted portals adorned many of the small rural ecclesiastical structures dotting the countryside of western France and northern Spain in the twelfth century Seeking to re contextualize this configuration within monastic meditational practices this book argues that the ornamented archivolt were likely composed following medieval prescriptions for the rhetorical ornamentation of poetry and employed the techniques of mnemonic recollection and imaginative visualization Read in this light it becomes clear that the architectural form underlying these semi circular configurations served to open the possibilities for meaning by making the sculptural imagery physically and philosophically accessible to both the monastic community and the lay parishioner Pointing to an Iberian heritage in which both light and space had long been manipulated in the conveyance of theological and political ideologies Abel suggests that the portal's architectural form grew out of a physical and social matrix characterized by pilgrimage crusade and processions where the elements of motion integral to the Quadrivium sciences of Math Geometry Astronomy and Music were enhanced by a proximity to and cultural interaction with the Islamic courts of Spain It was however within the politics of the Peace of God movement with its emphasis on relic processions that often encompassed all the parishes of the monastic domain that the archivolted portal with its elevated porch like space are shown to be the most effective
