Latecomers Latecomers:

The Economics of the Latecomers Jang-Sup Shin, 2013-05-13 This book examines the spectacularly successful economies of East Asia Japan and South Korea The comparison of the catching up process in Japan and South Korea includes studies of the iron and steel and semi conductor industries The author shows the difficulties involved in trying to detect general patterns of development as both countries appear to respond to different technological imperatives As a result general models of development should be treated with caution given the need to consider different historical and institutional contexts

The Other Latecomers Javier Papa, 2024-10-03 In recent years developing countries have seen the emergence of successful and innovative firms albeit often with state support Argentina which faces challenges including industrial decline and macroeconomic turbulence offers an intriguing context for studying latecomer firms as few have managed to innovate and compete globally without significant state backing This book examines why and how latecomer firms facing adverse policies and hostile macroeconomic conditions can nevertheless survive grow and catch up with global competitors while many other firms lag or fall further behind It presents on one hand a theoretical framework that builds on contributions made by Gerschenkron 1962 and Hobday 1995 on latecomer catch up in economic development theory and on those by Nelson 1991 2008 on firm level differences in evolutionary theory on the other it provides a contextual framework for the catching up experiences of firms from East Asia and Latin America which ends with a description of Argentina's main detrimental policy regimes over the past 50 years Further the book presents an statistical analysis of manufacturing firms performance along with the corporate characteristics that underlie it within the context of Argentina's worst economic crisis to determine which firm characteristics stood out during times of crisis e.g innovation and organizational capabilities To supplement the quantitative analysis and offer additional insights it introduces two in depth case studies on iconic latecomer firms TENARIS and IMPSA which bolstered by the examination of over nearly half a million newspaper articles illustrate their global success amidst numerous challenges It emphasizes the importance of long term corporate strategy a flexible organizational structure and a coherent set of technological and organizational capabilities while also addressing policy implications making it a valuable asset for researchers policymakers and corporate managers alike

Innovation-Development Detours for Latecomers Keun Lee, 2024-02-22 Many developing countries still face difficulties initiating and sustaining economic development Such difficulties have been exacerbated by the COVID 19 pandemic resulting in an increasing divergence between rich and poor countries One crucial question is whether to follow the trajectories of present day rich countries or seek out different new trajectories Although this is a fundamental question scholars offering mainstream prescriptions have not sufficiently explored it Drawing on extensive empirical studies of firms and industries Innovation and Development Detours for Latecomers proposes an effective alternative to prevailing development thinking It presents a rich menu of development pathways including a new role for Schumpeterian states

whereby they do not follow the paths of technological development already taken by advanced countries Rather they can skip certain stages and even create their own detours thereby leapfrogging advanced countries in both manufacturing and service sectors This title is also available as Open Access on Cambridge Core

Latecomers Andrew L. Yarrow,1991 Illuminated by real life stories and anecdotes Latecomers sensitively describes and explores what it means to be a child of older parents in the early years as an adolescent and as an adult A reporter for The New York Times Yarrow draws from questionnaires and interviews with over 800 people whose parents were over 35 when they were born

Latecomer Development Banji Oyelaran-Oyeyinka,Padmashree Gehl Sampath,2009-12-16 The most important issue for development centres on the debate about the centrality of knowledge technology and innovation to the process of economic development While this much is broadly agreed what is at issue is the precise mechanics of overcoming economic development challenges in different contexts At the heart of it all is about how economies at different levels deploy the unending streams of information and knowledge to developmental ends In time the notion of income convergence between the poorer South and the wealthy North has proved a mirage while a new economic divide has in fact occurred within the South itself and as well between regions and within regions The debate relating to latecomers is thus framed in discussions about regions and countries that arrive late to mastering industrialization in achieving economic prosperity through the use of knowledge In other words a new divide has emerged among the latecomers themselves and with it greater conceptual complexity in the ways of our understanding of the divergent ways of economic development We have thus separated fast followers and new late comers This book enters this debate acutely aware of the complexity of this process The authors argue that economic development is largely driven by innovation concentrating on the dynamics of process product and organizational changes and how they are embedded within specific and varied contextual institutions
