The Economic Development of Latin America in the Twentieth Century André A. Hofman, 2000 This book provides an assessment of Latin American 20th century economic performance from a comparative and historical perspective The author uses growth accounting methods and previously unavailable long term series data to present a comprehensive analysis of Latin American development over the course of the century The performance of Latin American economies over this period is compared to that of three groups of countries the advanced capitalist economies of France Germany Japan The Netherlands UK and USA the newly industrialised economies of Korea and Taiwan and Spain and Portugal with which Latin America has historical ties This presents a long run comparative perspective of growth acceleration and slow down in Latin America The reasons for the comparatively poor or negative economic growth in the Lost Decade of the 1980s are examined as is the apparent economic recovery in the 1990s The author also reviews other problems associated with the Latin American economies including debt problems income inequality high inflation cyclical instability and political and policy instability and measures the ability of various countries to combat these challenges Finally the author analyses major stabilisation policies over the period and assesses their success This book will prove a valuable asset to students and scholars of Latin American economics

Fernando Henrique Cardoso, Enzo Faletto, 1979-03-19 At the end of World War II several Latin American countries seemed to be ready for industrialization and self sustaining economic growth Instead they found that they had exchanged old forms of political and economic dependence for a new kind of dependency on the international capitalism of multinational corporations In the much acclaimed original Spanish edition *Dependencia y Desarrollo en Am rica Latina* and now in the expanded and revised English version Cardoso and Faletto offer a sophisticated analysis of the economic development of Latin America The economic dependency of Latin America stems not merely from the domination of the world market over internal national and enclave economies but also from the much more complex interaction of economic drives political structures social movements and historically conditioned alliances While heeding the unique histories of individual nations the authors discern four general stages in Latin America s economic development the early outward expansion of newly independent nations the political emergence of the middle sector the formation of internal markets in response to population growth and the new dependence on international markets In a postscript for this edition Cardoso and Faletto examine the political social and economic changes of the past ten years in light of their original hypotheses *A New Deal for Latin*

Perspective André A. Hofman, United Nations. Economic Commission for Latin America and the Caribbean. Economic Development Division, 2001 This paper describes trends in economic growth and its causes in several Latin American countries in the 20th century This paper stresses that the proximate causes of economic growth are not independent of the ultimate causes of growth Proximate causes of economic growth are those areas of causality where models and quantification

is possible Ultimate causes of economic growth are much more difficult to quantify The paper concludes with a description of some of the most important characteristics of economic development in the region **Latin American Economic**

Economic development has been an challenge facing the countries of Latin America Because the United States from the very nature of its geographic and economic relationship with its southern neighbors must inevitably exercise a strong influence on the course which that development takes it is important that North Americans understand conditions in Latin America and the attitudes of its peoples Roberto de Oliveira Campos former Brazilian Minister of Economic Planning is in a unique position to evaluate both past accomplishments and future problems In this group of essays Campos gives a comprehensive analysis of many aspects of Latin American development in the mid twentieth century He examines relations between the United States and Latin America from a variety of angles and he outlines the basic problems of economic development of governmental policy and of public and private administration He gives particular attention in several essays to the relationship of foreign trade and foreign aid to economic development and he presents a long discussion of the Alliance for Progress its history its purposes its accomplishments and its failures Campos s philosophy regarding the role of the state in economic development and other questions emerges clearly from these pithy essays The valid distinction I see on the basis of my analysis of men and things is between pragmatic or functional nationalists and romantic or temperamental nationalists he writes The latter confuse intention with results They start with enthusiasm and end in fanaticism this being according to Santayana the art of redoubling efforts after losing sight of objectives Many romantic nationalists though they do not confess it favor the dangerous purgery of revolution The pragmatic nationalist seeks to operate within the frame of democratic institutions and prefers reform to revolution As to myself I shall continue considering myself a pragmatic nationalist I renounce the temptation of mobilizing resentment in order to gain the authority to plan development I would rather strengthen the national entrepreneur than merely antagonize the foreigner I would want the state not to do what it cannot do in order to do what it should do I prefer to love my own country rather than to hate the others **Latin American**
