to sign and or ratify the treaty Why did they choose to do so at different times and in different ways What explains their foreign policy behavior Amy Below s book builds off the increasing significance of climate change and uses the Kyoto Protocol as a case study to analyze foreign policy decision making in Latin America Below s study takes a regional perspective in order to examine why countries in Latin America made disparate foreign policy choices when they were faced with the same decision The book looks at the decisions in Argentina Mexico and Venezuela via a process tracing method Below uses information obtained from primary and secondary documents and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of Conference of the Parties speeches by presidents and country delegates The book complies with convention in the field by arguing that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables Environmental Politics and Foreign Policy Decision Making in Latin America considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory The book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics

Debating Civil-Military Relations in Latin America David R Mares,Rafael Martinez,2013-09-01

The study of civil military relations in Latin America produced a rich debate and research agenda prior to 2000 But this agenda was largely abandoned during the past decade as the spectre of military dictatorship has virtually disappeared with the political role of the military in many countries dramatically diminished Indeed in no country that has initiated a process of holding the military accountable to civilian control has the military openly rebelled Yet the institutions and public attitudes that guarantee democratic civilian control of the military exist in a general context of political polarisation citizen insecurity and in many countries a sense of developing ungovernability The military coup in Honduras 2009 the military response to the police rebellion in Ecuador 2010 and the speculation concerning the Venezuelan military s behaviour in the event that Hugo Chavez is incapacitated or dies 2013 demonstrates the relevance and importance of the civil military relationship today In this volume leading scholars from Latin America the U S and Spain debate the ability of contemporary Latin American civil military relationships to weather these challenges The authors examine new types of regimes the rise of participatory democracy new political orientations the renaissance of the Left in Latin America and new missions for the military Debate centres on the indicators to evaluate the level of consolidation of civilian control the manner in which these indicators are measured and the empirical ambiguities that arise These challenges must be confronted in order to effectively address the question of how much progress has been made in the region in subordinating the military to civilian control which countries are lagging behind and why Published in association with CILAS University of California San Diego
