notably welfare reform that together with a host of other changes in the states and the private sector altered the landscape for social policy The poor have been the biggest losers as Democrats and Republicans have fought to win the middle class over to their vision of the future The authors first analyze the institutions and tools of policymaking including Congress the political use of public opinion polling and the politics of the deficit They then consider policies designed to win over the middle class including health care policy employer provided social benefits wages and jobs and crime policy Last they address policies targeted at the disadvantaged including welfare affirmative action and urban policy In addition to the editor the contributors include John Ferejohn Lawrence R Jacobs Robert Y Sha *Challenges of Urbanization in the 21st Century* Kalpana Markandey,B.
