OpenWells® Software

Overview

Well Operations Information Management and Reporting System

Landmark's OpenWells® software is a fully comprehensive well operations reporting, data analysis and corporate data management system integrated with Landmark's The Engineer's DeskTop™ system. OpenWells software supports a complete operations history for any well. Well operations data reported from OpenWells software can be used for analysis with Landmark's engineering applications on the Engineer's Data Model™ (EDM™) platform. The software supports operations reporting for drilling, completions, well services, site construction and reclamation operations.

Operators and service companies can use OpenWells software to capture well operations information for corporate and regulatory reporting, performance analysis, offset well benchmarking and well planning.

The OpenWells package includes PROFILE™, Data Analyzer™ and Real-Time View™ software. These tools are integrated with The Engineer's DeskTop system, sharing a common database with Landmark's CasingSeat™, StressCheck™, WELLCAT™, COMPASS™, Well Cost™ and WELLPLAN™ software. OpenWells software is highly configurable, enabling operators to customize the system to meet their business requirements for different regions, operating environments and operations teams. This software supports multiple measurement systems and can be easily configured to support multiple languages.

Benefits

Efficient Engineering Workflows

Enter data only once. Integrated engineering workflows within The Engineer's DeskTop system save time and add value for drilling, completions and production engineering teams.

Faster Analysis

From essential well operations data captured with OpenWells software, key performance indicators can be quickly analyzed to help identify the operational "bottom line."

Time and Cost Savings

Operations planning with OpenWells software can save time and money. Detailed statistics from historical offset wells stored in the database can be obtained quickly and used to identify candidates for operations improvement.

Drilling Performance

Ease-of-use features can simplify personnel training, reduce time for data entry and insure more accurate information tracking. Rig personnel can spend more time focused on drilling performance and safety critical issues.

Features

WYSIWYG Data Entry Forms

What You See Is What You Get (WYSIWYG) daily operations data-entry forms can be customized to look like a familiar Morning Report and to match company workflow standards. The result can lead to less training time, faster and more accurate data entry, and more confidence in operations data.

The screenshot displays the OpenWells software interface, which is a WYSIWYG data entry form. It features a top navigation bar with various menu options. Below this, there are several tabs and sections for data entry, including a large table with multiple columns and rows, and a section labeled 'Daily Operations - Drilling'. The interface is designed to be user-friendly and efficient for data entry.

Configurable WYSIWYG forms simplify data entry.

Navigation Aid

The Navigation Aid interface emulates the standard IADC tour sheet simplifying data entry navigation. Rig personnel can easily navigate to the report of interest and quickly fill in the data that is required for their job responsibility. The feature is a benefit to new users unfamiliar with where to enter data. Navigation Aid views include:

- Morning Report view, designed to model Output Daily Drilling Reports
- Tour Sheet view, designed to look like a standard U.S. IADC tour sheet.
