Landscape Ecology Of Small Mammals:

Landscape Ecology of Small Mammals Gary W. Barrett, John D. Peles, 1999-06-04 A summary of much of the experimental work on the spatial ecology of small mammals This field has entered an exciting stage with such new techniques as GIS and systems modeling becoming available Leading contributors describe and analyze the most well known case studies and provide new insights into how landscape patterns and processes have had an impact on small mammals and how small mammals have in turn affected landscape structure and composition

Landscape Ecology of Small Mammals Gary W. Barrett, John D. Peles, 2014-01-15 [Landscape Ecology of Small Mammals](#) Gary W. Barrett, John D. Peles, 2013-03-19 Small mammals can be regarded as excellent subjects to test suppositions about population growth migration and reproduction and in particular on how the complex physical structure of the environment affects the ecology of populations and communities In other words these small mammal studies can help formulate landscape ecological principles This book summarizes a great deal of experimental work on the spatial ecology of small mammals The field has entered an exciting stage with several new techniques such as GIS and systems modeling becoming available Leading contributors describe and analyze the most well known case studies and provide new insights into how landscape patterns and processes have had an impact on small mammals and how small mammals have in turn affected landscape structure and composition

Landscape Ecology of Small Mammals gw;peles barrett (jd), **Landscape Ecology of Small Mammals, with Special Reference to the Cotton Mouse (*Peromyscus Gossypinus*)** Valerie Ann Barko, 2000 [Landscape Approaches in Mammalian Ecology and Conservation](#) William Zander Lidicker, 1995 This book explores the latest ideas about landscapes as they apply to mammalian ecology and conservation The Contributors examine mammalian field studies and experimental model systems to landscape ecology and then present data on the use of such experimental protocols With its international perspective and incisive coverage this volume will be an essential resource for anyone concerned with mammalian and landscape ecology

Small Mammals in Their Environment Jessemine Lee-Saa Fung, 2000 We report on the status and behaviors of grasslands small mammals existing in Camp Dodge Iowa Although Camp Dodge is one of the few places left in central Iowa containing relatively large intact pieces of grasslands it is still affected by direct and indirect human interference Pressure to clear and row crop so much for the agricultural practices increases stress on the native flora and fauna Unless we pay attention to Iowa s rapidly diminishing natural habitats the state s unique blend of flora and fauna will be lost forever Because the world is composed of landscapes spatial mosaics are the focus of landscape ecology From an ecological perspective landscape ecology offers a way to consider environmental heterogeneity or patchiness in spatially explicit terms As we lose more contiguous natural habitats through anthropogenic processes analyzing species movement patterns and behaviors is essential to interpreting their response to habitat fragmentation We use the landscape ecology approach to look at the behavioral ecology of small grassland mammals in a fragmented landscape

Ecology, Cognition and Landscape Almo

Farina,2009-11-23 It is more and more evident that our living system is completely disturbed by human intrusion Such intrusion affects the functioning of entire systems in ways we do not yet fully understand We use paradigms such as the disturbance to cover large and deep gaps in our scientific knowledge Human ecology is an uncertain terrain for anthropologists geographers and ecologists and rarely is expanded to include the social and economic realms The integration of different disciplines and the application of their many paradigms to problems of environmental complexity remains a distant goal despite the many efforts that have been made to achieve it Philosophical and semantic barriers are erected when such integration is pursued by pioneering scientists Recently evolutionary ecology has shown great interest in the spatial processes well described by the emerging discipline of landscape ecology But this interest takes the form of pure curiosity or at worst of skepticism toward the real capacity of landscape ecology to contribute to the advancement of ecological science The past two centuries have been characterized by huge changes occurring in the entire ecosphere Global changes are the effects of human intervention at a planetary scale with consequent degradation of the environment creating an ecological debt for future generations On the other side of the issue new technologies have improved the welfare of billions of people and have given hope to many other billions that they may also see such improvement in the near future

Living Rivers:

Trends and Challenges in Science and Management R.S.E.W. Leuven,A.M.J. Ragas,A.J.M. Smits,G.van der Velde,2007-12-20 All over the world sustainable river basin management is a leading principle of policy plans and legal instruments for water management e.g. the European Water Framework Directive The evidence however to underpin the full scope of sustainability is rather scanty In this book an integrative perspective on trends and challenges in river science and management is demonstrated The three pillars underneath sustainable water management ecology economy and sociology are elaborated by experts in their fields A number of papers integrate the current knowledge on the structure functioning and management of living rivers The book includes data and experiences concerning the rivers Allier Meuse Rhine Sava and Tagliamento in Europe and the river Illinois in the USA Sustainable river basin management asks for an orthodox rehabilitation programmes and ecosystem based and transboundary management approaches

How Landscapes Change

Gay A. Bradshaw,Pablo A. Marquet,2013-03-09 North and South America share similar human and ecological histories and increasingly economic and social linkages As such issues of ecosystem functions and disruptions form a common thread among these cultures This volume synthesizes the perspectives of several disciplines such as ecology anthropology economy and conservation biology The chief goal is to gain an understanding of how human and ecological processes interact to affect ecosystem functions and species in the Americas Throughout the text the emphasis is placed on habitat fragmentation At the same time the book provides an overview of current theory methods and approaches used in the analysis of ecosystem disruptions and fragmentation

Methods for Ecological Research on Terrestrial Small Mammals

Robert McCleery,Ara Monadjem,L. Mike Conner,James D. Austin,Peter J. Taylor,2022-01-04 All the information researchers students

and practitioners need to conduct innovative state of the art research on small mammals Rodents and insectivores constitute the vast majority of mammals on our planet yet we often overlook the importance of this group As seed dispersers prey species and disease regulators these animals are critical to the functioning of our ecological systems While considerable material exists that describes these species there has been no dedicated guide explaining how to effectively research them until now Methods for Ecological Research on Terrestrial Small Mammals is a one stop resource compiling all the information readers need to conduct state of the art research on small terrestrial mammals across the globe The authors cover the full spectrum of issues from capture handling identification reproduction demography and taxonomy to behavior diet evolution diseases movements morphometrics and more They also highlight the latest techniques while carefully explaining the tried and tested methods needed to conduct rigorous scientific inquiries provide step by step examples and case studies demonstrating how the methods discussed can be used in actual research projects compare and contrast methodologies analytical techniques and software packages helping researchers determine which pathways and tools will yield the best results for their studies A comprehensive and invaluable resource Methods for Ecological Research on Terrestrial Small Mammals is a must have for any ecologist working on small mammals **Cestode Zoonoses:**

Echinococcosis and Cysticercosis Philip Craig, Zbigniew Pawłowski, 2002 Parasitic zoonoses or parasitic infections transmitted from animals to humans are likely to become increasingly important in the spectrum of emergent and re emergent diseases for both developed and developing countries Tapeworm zoonoses form an important group of such pathogens and are being recognized more and more as a public health problem in Europe Central Asia the Middle East sub Saharan Africa Latin America and the USA Interchanges of Insects between Agricultural and Surrounding Landscapes B.S. Ekbom, Michael E. Irwin, Y. Robert, 2013-04-17 The chapters in this book were developed from some of the lectures presented at a symposium at the XX International Congress of Entomology held in Florence Italy in August 1996 The purpose of the symposium was to discuss the impact of evolving modern agricultural landscapes on the insect species of both economic and ecological importance that utilize that habitat Agricultural policy to some extent influences the choices that farmers make and thereby the shape of the agricultural landscape In order to move toward more sustainable agro ecosystems future policy makers will have to consider the history of land use consumer demands for both environmentally sound and affordable products and the conservation of biological diversity I would hope the information contained in this book will help stimulate discussion about the consequences of policy decisions on our agricultural landscapes and their insect inhabitants I thank all the speakers from the symposium and in particular those that have been able to contribute chapters to this book There have been many delays most due to circumstances beyond anyone's control I would like to express my appreciation to Gloria Verhey and Patrick Dumont for taking care of the book in these final months CHAPTER I INTERCHANGES OF INSECTS BETWEEN AGRICULTURAL AND SURROUNDING LANDSCAPES BARBARA EKBOM
