Space in Holocaust Research Janine Fubel, Alexandra Klei, Annika Wienert, 2024-05-20 In recent years the issue of space has sparked debates in the field of Holocaust Studies The book demonstrates the transdisciplinary potential of space related approaches The editors suggest that spatial thinking can foster a dialogue on the history aftermath and memory of the Holocaust that transcends disciplinary boundaries Artworks by Yael Atzmony serve as a prologue to the volume inviting us to reflect on the complicated relation of the actual crime site of

the Sobibor extermination camp to family memory archival sources and material traces In the first part of the book renowned scholars introduce readers to the relevance of space for key aspects of Holocaust Studies In the second part nine original case studies demonstrate how and to what ends spatial thinking in Holocaust research can be put into practice In four introductory essays the editors identify spatial configurations that transcend conventional disciplinary chronological or geographical systematizations *Fleeting Spaces Institutionalized Spaces Border ing Spaces Spatial Relations* Drawing on a host of theoretical concepts and addressing various historical contexts as well as different types of media this book offers scholars and students valuable insights into cutting edge international scholarly debates ***Photography and Place*** Donna West Brett, 2015-12-07 As a recording device photography plays a unique role in how we remember places and events that happened there This includes recording events as they happen or recording places where something occurred before the photograph was taken commonly referred to as aftermath photography This book presents a theoretical and historical analysis of German photography of place after 1945 It analyses how major historical ruptures in twentieth century Germany and associated places of trauma memory and history affected the visual field and the circumstances of looking These ruptures are used to generate a new reading of postwar German photography of place The analysis includes original research on world renowned German photographers such as Thomas Struth Thomas Demand Michael Schmidt Boris Becker and Thomas Ruff as well as photographers largely unknown in the Anglophone world ***Geography and Memory*** Owain Jones, Joanne Garde-Hansen, 2012-10-10 This collection shifts the focus from collective memory to individual memory by incorporating new performative approaches to identity place and becoming Drawing upon cultural geography the book provides an accessible framework to approach key aspects of memory remembering archives commemoration and forgetting in modern societies ***Forensic Science in Contemporary American Popular Culture*** Lindsay Steenberg, 2013-01-04 This book identifies traces and interrogates contemporary American culture s fascination with forensic science It looks to the many different sites genres and media where the forensic has become a cultural commonplace It turns firstly to the most visible spaces where forensic science has captured the collective imagination crime films and television programs In contemporary screen culture crime is increasingly framed as an area of scientific inquiry and even more frequently as an area of concern for female experts One of the central concerns of this book is the gendered nature of expert scientific knowledge as embodied by the ubiquitous character of the female investigator Steenberg argues that our fascination with the forensic depends on our equal fascination with and suspicion of women s bodies with the bodies of the women investigating and with the bodies of the mostly female victims under investigation ***Science Fiction Film, Television, and Adaptation*** J. P. Telotte, Gerald Duchovnay, 2011-08-02 The book examines the difficulty of adapting from one screen medium to another by looking at both successful and unsuccessful efforts in the area of science fiction Those difficult efforts at moving from film to TV and from TV to film reveal much about the technologies involved and this highly technological genre

as well *Four Days in Hitler's Germany* Robert Teigrob,2019-05-23 In 1937 Canadian Prime Minister Mackenzie King travelled to Nazi Germany in an attempt to prevent a war that to many observers seemed inevitable The men King communed with in Berlin including Adolf Hitler assured him of the Nazi regime's peaceful intentions and King not only found their pledges sincere but even hoped for personal friendships with many of the regime's top officials *Four Days in Hitler's Germany* is a clearly written and engaging story that reveals why King believed that the greatest threat to peace would come from those individuals who intended to thwart the Nazi agenda which as King saw it was concerned primarily with justifiable German territorial and diplomatic readjustments Mackenzie King was certainly not alone in misreading the omens in the 1930s but it would be difficult to find a democratic leader who missed the mark by a wider margin This book seeks to explain the sources and outcomes of King's misperceptions and diplomatic failures and follows him as he returns to Germany to tour the appalling aftermath of the very war he had tried to prevent *Reading Beyond the Book* Danielle Fuller,DeNel Rehberg Sedo,2013 This volume offers the first critical analysis of mass reading events and the contemporary meanings of reading in the UK USA and Canada based on original interviews and surveys with readers and event organisers The authors interrogate the enduring attraction of an old technology for readers community organizers and government agencies exploring the social practices inspired by the sharing of books in public spaces and revealing the complex ideological investments made by readers cultural workers institutions and the mass media in the meanings of reading **Jewish Anxiety and the Novels of Philip Roth** Brett Ashley Kaplan,2016-10-27 Uses Roth's novels as springboards to illuminate larger problematics of victimization gender racism and anti-Semitism **Philip Roth** Debra Shostak,2011-04-14 A collection of original essays on Philip Roth offering contemporary critical readings and assessments of recent texts *Hitler at Home* Despina Stratigakos,2015-09-29 A look at Adolf Hitler's residences and their role in constructing and promoting the dictator's private persona both within Germany and abroad Adolf Hitler's makeover from rabble rouser to statesman coincided with a series of dramatic home renovations he undertook during the mid 1930s This provocative book exposes the dictator's preoccupation with his private persona which was shaped by the aesthetic and ideological management of his domestic architecture Hitler's bachelor life stirred rumors and the Nazi regime relied on the dictator's three dwellings the Old Chancellery in Berlin his apartment in Munich and the Berghof his mountain home on the Obersalzberg to foster the myth of the Führer as a morally upstanding and refined man Author Despina Stratigakos also reveals the previously untold story of Hitler's interior designer Gerdy Troost through newly discovered archival sources At the height of the Third Reich media outlets around the world showcased Hitler's homes to audiences eager for behind the scenes stories After the war fascination with Hitler's domestic life continued as soldiers and journalists searched his dwellings for insights into his psychology The book's rich illustrations many previously unpublished offer readers a rare glimpse into the decisions involved in the making of Hitler's homes and into the sheer power of the propaganda that influenced how the world saw him Inarguably the powder keg title of the year

Mitchell Owen Architectural Digest A fascinating read which reminds us that in Nazi Germany the architectural and the political can never be disentangled Like his own confected image Hitler's buildings cannot be divorced from their odious political hinterland Roger Moorhouse Times

A Social History of Contemporary Democratic Media Jesse Drew, 2013-05-02 The last few decades have helped dispel the myth that media should remain driven by high end professionals and market share This book puts forward the concept of communications from below in contrast to the globalization from above that characterizes many new developments in international organization and media practices By examining the social and technological roots that influence current media evolution Drew allows readers to understand not only the Youtubes and Facebooks of today but to anticipate the trajectory of the technologies to come Beginning with a look at the inherent weaknesses of the U S broadcasting model of mass media Drew outlines the early 1960s and 1970s experiments in grassroots media where artists and activists began to re engineer electronic technologies to target local communities and underserved audiences From these local projects emerged national and international communications projects creating production models social networks and citizen expectations that would challenge traditional means of electronic media and cultural production Drew's perspective puts the social and cultural use of the user

at the center not the particular media form Thus the structure of the book focuses on the local the national and the global desire for communications regardless of the means
